Miners set to defy court over militant meeting

● The NUM intends to start a militant policy conference today in defiance of High Court moves

 Draft agreements to end the miners' strike have been published, with divergences, by both the coal board and union

against the use of non-registered labour.

From Paul Routledge, Labour Editor, Sheffield

High Court moves to prevent striking miner's leaders from holding a militant policy confer-ence precipitated a fresh crises in the pit dispute last night.

The National Union of Mineworkers is going ahead with arrangements to hold an extraodinary delegate meeting in Sheffield to give for

in Sheffield to give firsh impetus to the 18-week-old stoppage, in defiance of court steps to halt the gathering.
The conference is certain to endorse an emergency resolution unanimously approved by

the executive which opposes all pit closures other than on grounds of seam exhaustion, and any reduction in man-Sir Robert Megarry, the Vice Chancellor, heard an application from working Notting-

hamshire miners last night too halt the delegate conference on the grounds that they had been prevented from instructing their representatives to vote against a new disciplinary code. The judge had earlier indi-cated a readiness to ban the conference if the Nottinghamshire vote - nearly 20 per cent

of the total - was not cast against so-called "Star Chamb-er" procedures to discipline union members who have worked through the stopage.
Mr Arthur Scargill, the union president, last night denied that the new rule had anything to do with the disp ite. It had been

London today.

The specially convened sit-ting of the High Court last night ordered today's special conference of the NUM not to discuss or vote on the proposed rule change aimed at disciplin-ing working miners. Sir Robert Megarry ordered

the union not to consider any rule change until Nottingham had the chance to instruct delegates how to vote.

Before the hearing Mr Scargill said: "As far as we are concerned our conference goes ahead. It has nothing to do with the Nottinghamshire area. If they have decided to cast their vote in one way or another, it is a matter for them."

Miners leaders meeting in Sheffield last night were clearly less excited about the court moves than the prospect of a very much longer strike. Mr Scargill insisted: "We are not, we will not, have not and shall not discuss the question of econoic pit closures. The only closures we are talking about are those where exhaustion of reserves has taken place."

The National Coal Board had indicated orally that it would meeting that would mandate withdraw its closure pro- delegates to oppose the rule gramme, but was reluctant to change. "It would be impossible

Jenkin resists call for council freeze By Julian Haviland and Philip Webster

had their first serious discussion on whether to impose a freeze on captal spending by local authorities, a step that they know would draw beavily on their remaining credit with their supporters in local government

and in Parliament.

Mr Patrick Jenkin, Secretary of State for the Environment, who would have to defend such a decision, went into a meeting at Downing Street determined to resist a demand that the Treasury has forced on to the Cabinet spends. He believes that a mora-

Ministers last night were said to be still deciding on their response to the raid, the thirty-second on neutral shipping in the region so far this year, and the first to involve a British vessel since the built carrier. He believes that a mora-torium, along the lines of that introduced by his predesessor, Mr Michael Heseltine, in 1980 would be wrong on every count. Although last year's capital spending was 10 per cent above the cash limit, his department The tanker, the 265,790-ton British Resown, on charter to a salvage company, was on its way to pump oil from the Swiss-woned tanker Tiburon, argues that it is too soon to conclude after three months into the present financial year that correspondent savings cannot be made within a capital

20 miles from the Tiburon, the Renown was first "buzzed" by a cash limit of £2,750m for 1984sauce aircraft, according to the master, Mr Noel Brookes, in a radio-telephone interview with

Mr Heseltine's experience proved that cuts in spending ordered in midsummer caused chaos for local councils' financial planners. Contracts already placed, for example for road and school maintenance which can only be done in the summer

simply to comply.

Cabinet ministers last night months, leave little room for

sanoeuvre. Mr Jenkia has been given ample warning in recent weeks that a freeze would encounter the deepest hostility from Conservative as well as Labour councils, as well as from Tory backbeuch MPs.

Many of these potential enemies have spent much of the past year fighting Mr Jenkin over rate capping and the parties. But Many of Mr Jenkin Walley and the parties at less night's meeting shale his belief that the Government would be footbardy to allegate them for them for them.

The Treasury's case is that ast year's overspend, put at about £300m, is continuing. The nown halfs' case, which the Department for the Environment supports, is that they are suffering from the curse of central government's short-term

Two years ago Mr Heseltine, fearing an investment shortfall required councils to increase capital spending, and they had to spend on unnecessary items

Growth in money fuels loan rate fears

By Peter Wilson-Smith

A sharp rise in the money supply in June has fuelled fears that interest rates will have to go up again after last week's crease in bank base rates from

9.25 to 10 per cent.
The Bank of England announced that sterling M3, still the most widely watched measure of monetary growth, rose by about 2 per cent last month, taking money supply growth above the Government's target

range.
This was more than the gloomiest forecasts and came on another poor day for the

pound.
Interest rates continued to edge up in the money markets, leaving many in the City convinced that a further rise in base rates is almost inevitable

onse rates. It almost inevitable and may be immainent.

Shares prices plunged even faster on the Stock Exchange, taking the FT 30 thare index through the 800 level to ead the day 18.6 points lower at 793.6. Government gill-edged stocks fell by up to £1.

However, the Government was quick to play down the money supply figures, saying they were not a cause for alarm. or for higher interest rates. Mrs Thatcher told a densive House of Commons that the domestic monetary situation was satisfactory despite the large June rise and that inflation was well under control.

The level of money market ratres is now pointing to a rise in the banks base rates to at least -11 per cent. Unless conditions after dramatically the banks will not be able to resist the pressure for long.
The 2 per cent rise in sterling

M3 brings money growth in the last four months to an annualized rate of 14% per cent compared with the government's 1984-85 target of 6 to 10 per cent, Whitehall officials were keen to point out that, taken over the past year sterling M3's growth a within target and Mo, the narrow measure to which the Government gives equal weight is comfortably within

saget.
However, even those who secept the Government's view on domestic conditions believe that the pound's persistent weakness may still force the Government to accept higher interest rates. Yesterday the poud clawed

back 45 points to \$1,3090 against a slightly weaker dollar but fell against the Deutsche mark. Its trade-weighted value slipped 0.4 to 77.2. This was the lowest since 1976 when the pound's overall value reached 74.2 during the height of the sterling crisis. Later in New York, sterling was slipping again to \$1.3040.

Dealers said that the combination of the miners' and dock strike were still undermining sterling

Exiles back Tarkovsky defection

From Peter Nichols

Andrei Tarkovsky, the Soviet film director, announced his decision yesterday to seek asylum in the West by telling a Milan press conference that he was facing the most difficult moment in his life. He was supported at the

conference by three famous figures in Russian cultural life who have chosen exile rather than returning to work in the Soviet Union Mstislav Rostropovich, the cellist and confac-tor, Yuri Lynbimov, the stage director and Vladimir Malisimov, the writer.

The crowded press confer euce took place under the auspices of the Movimento Populare an influential group of Roman Catholics active in political life.

You make the difference-we make the effort!

Claimants told to raid their children's piggy-banks By Philip Webster, Political Reporter

Parents should raid their children's piggy banks before applying for special assistance under the supplementary benefit regulations, the Department of Health and Social Security has ruled.

The ruling, condemned as iniquitous and heartless by a Labour MP who has com-plained about it to the Government, has come to light through the refusal by the department applications under the Supplementary Benefit (Urgent Cases) Regulations of 1980

from two memployed married claimants in the South-West. Under the regulations families on supplementary benefit can apply for help with special urgent needs. Those could cover day-to-day living expenses, a single payment to meet the cost of specific items, such as a cooker, or children's clothes or bedding, or an immediate need caused by a fire, flood or similar die But in the two cases the

claimants were turned down, the first because his son, aged nine, had £63 in a piggy bank, and the second because his child had savings of £33. According to Mr Gerry Ber-mingham, Labour MP for St Helens, who has taken the cases up, both amounts were

and Christmases accumulated over a few years. Mr Rhodes Boyson, Minister of State for Social Security, has written to Mr Bermingham that the regulations provide

Mr Boyson said that the basis of the provisions was that it was "reasonable to expect

at/2% interest.

someone who falls temperarily on hard times to look first to the money available to the family from its own savings. Mr Bermingham told Mr Boyson that the rule was anomalous because a claimant

benefit could have savings up to £2,500 disregarded.

rules for urgent need payment were intended to be much mor stringent than those for norm supplementary behefit and were in keeping with the principle that payments be made only in the last resort.

Mr Bermingham said last night "This is quite scandalous. The minister's reply is quite unsatisfactory. The fact that kiddles' piggy banks can be raided by a government shows just how mean a society we have become."

The department said last night that it was a general underlying principle of argent need payments that the claimant and his family should be expected to contribute some thing towards meeting the cost.

has made a formal complaint about the 'uncomradely' behav-iour of Mr Michael Cocks, Labour's Chief Whip, in a bitter dispute over the reselection of

A report in The Observer on Sunday said that Mr Livingstone was leading a conspiracy to unseat a number of Labour MPs in London, including Mr Peter Shore and Mr John Silkin, two members of the Shadow

Mr Cocks was reported as saying tha he was very dis-turbed by the report, about a group called Target 87 and it was suggested that the matter would be investigated.

The GLC's leader has written to Mr Cocks, with a cpy to Mr Kinnock, saying that Mr Cocks seemed o be impugning his behaviour on the basis of second-hand rumour, without making any attempt to check

He says: "It gave an oppor-tunity to an unfriendly journal-

uncomradely, not to say un-helpful to party unity, at a time when the entire movement is united as never before behind the crucial campaign to save the

Target 87, which is organized around London Labour Brief-ing, the journal of a left-wing Labour coalition, has actually been renamed Target Labour Government and aithough there has been some incidental discussion of reselection of sitting MPs, its main aim had been the placing of suitable candidates for London's marginal constituencies.

The group has agreed that women and blacks must be given suitable representation in the capital, reflecting the fact that at least 51 per cent of Londoners are women and at

ist to construct a story damag-ing to us all, by including highly Labour would win on a 10 per selective quotes ... conjecture and rumour. conjecture and rumour. conjecture are regard this as particularly distance of a Commons

majority. But Target Labour Government activists are also keeping a close watch on other constitu-encies, to ensure that women and blacks have a fighting chance of selection against the traditional choice of white, middle-class, leftist males.

One source said yesterday that if Mr Hilary Benn, a local councillor, had designs on the succession to Mr Sydney Bidwell, aged 67, in Ealing-Sou-thall, or if Mr Livingstone still wished to replace Mr Reg Freeson as MP for Brent East, they would face strong resist-ance from blacks in constituencies with such strong ethnic minority populations.

It is understood, however that although Mr Livingstone least 15 per cent are black or still has eventual parliamentary There are 23 marginal con-battle for the GLC.

Casino stakes rise in £1.2bn boom

Casino gaming is booming in amount staked annually rose by London. Though the number of 5.12 per cent. But a new field for machine increased, there has been a huge increase in the amount of money staked, the Gaming Board said yesterday.

Most money is being staked by players from abroad, the annual report of the board said. The big gamblers are understood to be mainly Arabs from the Gulf.

Throughout Britain, thanks mainly to the boom in London, the money exchanged for gaming chips in the 12 months to August 1983, known as the estimated "drop", was £1,218m, an increase of £211.1m over the previous 12 months.

In the past two years there has been, respectively, an 8 per cent rise and now one of 21 per cent. In the past 12 months covered in the report the "drop" in London rose from £702m to £893.5m, an increase of 27 per cent.

London's share of the total "drop" for Britain also continued to increase from 69.7 per cent to 73.4 per cent. Outside London the "drop" increased by only 6 per cent.-

But the bingo boom looks to be over. Numbers of licensed. clubs have declined steadily from 1979, when there were 1,697. In 1983 they had fallen to 1.436. After remaining almost static the previous year, the

gaming is opening up. The trend towards the increasing use of amusement - with - prizes machines in licensed bingo clubs, in substitution for the two jackpot gaming machines allowed, continued during the

Clubs are permitted to have in them a maximum of two jackpot gaming machines, which have a prize limit of £100 in cash. The devices replacing them are of the kind to be found in amusement arcades and public houses, in the form of fruit machines. The maximum prize allowed is £1.50 in cash or £3 in tokens to be exchanged for

The board says it is "concerned at the impact large numbers of machines may have upon the social character of bingo clubs.

Trinity tops Cambridge finals table

By Colin Hughes Trinity Hall tops this year's table of Cambridge college finals results, regaining the position it held three years ago.

Clare College, last year's leader, has moved down to third place, but Churchill retains second position.

The most impressive climb is Gonville and Caius, rising fromn twelfth to fifth, and the most startling drop is Emma-nuel, falling from sixth to seventeenth place.

Pembroke and St John's, which were at the bottom of last year's table, have moved up to the middle ranks. Both colleges have begun mixed sex entry since the men who sat finals this year were admitted, and if past trends are matched can be expected to climb further in future years.

Magdalene, the only remaining all-male college, has re-turned to last place after three years off the bottom of the

The table, comparable to Oxford's official Norrington table, is drawn up by Mr Peter Tompkins, a Cambridge graduate. Results are weighted to take account of varied performance in different subjects, and five points are awarded for a first, three for an upper second, two for a lower second, and one for

Mr Tompkins is currently compiling a similar table to give placings in Part I examinations.

Hopes rise for end to

Equity dispute Hopes of an end to the two-year-old dispute over actors' fees for appearing in commer-cials on Channel 4 and TV-am rose last night after the two sides involved decided to resume negotiations.

The actors' union Equity, which moved to the right in elections last week, decided to press for a meeting with the advertising agencies represen-tative body, the Institute of Practitioners in Advertising. The union has written to Mr John Whitney, the director general of the Independent Broadcasting Authority, asking him to arrange a meeting

between the parties.
The dispute, which has blacked out a large proportion of advertising planned for Channel 4 and TV-am, is thought to have cost the acting profession at least £2m in lost es, and been an important factor in last week's swing towards the Act for Equity towards the Act for Equity camp which is committed to spectrum and across London at Christic's, South Kensington, seeking a settlement.

of the church's present ban. The Synod by 254 to 145 to repeal the regulations dating from 1938 and 1957 which declared second marriages to be against church policy. It also approved after a long debate, the regulations which will replace this prohibition. Remarriage in church will be allowed if certain conditions are met. There were more than 30 motions and amendments on

the order paper at the beginning of the day. It was apparent, however, that the regulations as now drafted were slightly more acceptable than the procedures envisaged last year, which were withdrawn after much adverse comment. The new regulations are now

to be referred to the dioceses for comment, which will be considered by the House of Bishops next spring. Final approval of the new system is not likely until the spring or summer of next year, leading to the first remarriages in church next autumn under the new guide-

Proposed procedures for the. The Archbishop of Canter- penitance from the false? How bury, Robert Runcie, told the does one assess whether the new Synod a complete refusal of relationship was direct cause of remarriage in church would sound like "refusal to heal on the Sabbath."

He said: "Fidelity can make enormous demands, but what the strictest marriage discipline scems sometimes to ask is fidelity to something which has gone, like asking someone who is an agnostic to be martyred for

"Obedience in Christian marriage is one thing, and a great thing fidelity to a shadow is quite another," Runcie declared. He said the church would be accused of changing its doctrine. However. present policy also led to misunderstandings.

The biggest challenge to the new procedures came from a group of nine bishops led by the Bishop of Salisbury, the Right Rev John Baker. He attacked the regulations and their accompanying guidelines as im-possible to follow.

"How is one to tell whether a person is free of self-deception or falsification when one has no independent access to the fact?" he asked, referring to some of

the breakdown?" The approach was "incurably judgmental". He advocated that the church should always refuse a second marriage service, but make available a service of prayer after a register office

But in the proposed regu-lations, "the welcome comes first and then for some the kick in the teeth", when they were Proposing the new regulations on behalf of the House of Bishops, the Bishop of Guildford, the Right Rev Michael

that only churchgoers would be eligible.

But there must be some association with the life of the church: whether a rather private practice of discipleship, or a serious desire to discover the meaning of the Gospel."

Adie, corrected the impression

The new regulations envisage the possibility of a marriage being recognized as null on the Roman Catholic pattern. This will enable many Anglo-Cath-olic priests to work the regulations in some cases, and then was conspiculously less hostility the guidelines. "How is one to from that quarter than in some discern true forgiveness and previous debates."

Spending on tourism in **England** set for record

By Derek Harris

Record spending of £3,500m by British and overseas tourists in the first half of this yeae could make 1984 England's most successful year for tour-ism. At least 250,000 more jobs are likey to be generated in the industrs within five years. These were the forecasts

yesterday from Mr Michae Montague, chairman of the English Tourist Board, when its annual report showed spending up in the six months by £500m. more than 16 per cent, over the same period of 1983. To June, British tourists spent £1,900m, a 15 per cent increase, and overseas visitors spent nearly £1.600m, a 17 per cent increase But this success has revived a touting problem in London where mainly foreign visitors in dation, are inveigled to pay less than £5 a night for accommodation which often turns out to

be indormintories. Visitors are promised facilioften end up sleeping several to a room. At least 100 small hotel and dormintory places are being offered nightly, mostly to young people, according to the London Tourist Board.

The boost to English tourism comes after big growth in 1983. There was a 19 per cent growth last year in Britons' spending to record £4,300m, the tourist board's report says. Overseas visitors added an another £3,300m, showing a 15 per cent growth

Mr Montague said: "These figures underline the fact that tourism is one of this country's significant growth industries and a major provider of jobs. When people who should know better describe tourism as a Mickey Mouse industry they should remember there is no such thing as a Mickey Mouse job for the unemployed." Mr Montague was referring

to remarks by Mr Ken Livingstone, leader of the Greater London Council, when plans for the Battersea leisure development were announced.

Mr Montague called for more I right training in tourism skills.

the establishment of a true con

Mr Kenneth Clerke, Minister for Health, said in the Commons that he deplored the gross intimidation of staff that had taken place on the icket line at Barking Hospital, near ondon.

HOSPITALS

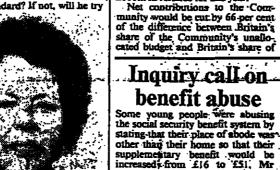

The industrial dispute is about the terms and conditions of employees of Crothall's, a private company carrying out the domestic services at the hospital, and Mr Clarke said this was entirely a matter for the contractor and its employees.

Mr Frank Dobson (Holborn and St Pancras, Lab): If Mr Clarke is saying that there is nothing the district health authority and nothing he can do to resolve this dispute, which is damaging patient care in Barking, will be acknowledge that this damage is the automatic product of privatization of these services, which means there is nothing the Government or the district such Government or the district authority can do to intervene in this dispute between the private contractor and the employees?

Mr Clarke: If there is any damage done - and I do not accept there is, done – and I do not accept there is, although obviously things are not well – that is the result of industrial action by those on strike and those manning the picket line at the hospital. Savings of £143,000 a year are being made which can be spent on nursing staff levels.

mportance of Fontainebleau is that t provides a much sounder inaucial basis on which to tackle Ms Jo Richardson (Barking, Lab): The reduction of 800 hours has these tasics.

The agreement reached met all any industry, fear that their work resulted in a deteriorating state of was also going to be transferred to cleanliness. The Department of the Government's objectives, quite cleanliness. The Department of Health and Social Security in a letter contrary to the claims made by the Labour Party. It meant that £440m. of refunds due for 1983 were, unblocked by other member states and Britain would receive some environmental health committee last week complained of 30 items that were not clean. Is he satisfied

Richardson: Deteriorating state of cleanliness

Mr Clarke: Savings have been made by the private contractor by cutting back on the overmanning of the previous contract. This has led to savings by the authority which it can spend on improving patient

Of course cleanliness at the moment leaves much to be desired (Labour laughter). It is hypocritica cleanliness when it is action on the picket lines, which Ms Richardson supports, which is making it impossible to out into practice all impossible to put into practice all the remedial measures that the authority and the contractor would

Mr Alan Howarth (Stratford-on-Avon, C): It is the interests of patient care rather than trade unions that ought to be paramount in the health service. Ancillary's services can do much to ensure that resources go to patient care rather than to a loss in the non-cost effective services. Mr Clark: It is not in the interests of

Rosaington.

At that point, a Labour Mp shouted The other way round.

Mr Yea: Will Mrs Thatcher assure us that the Government will not give way, but will look forward as I do, to Mr Neil Kinnock, Leader of the Opposition, condemning violence and that behaviour.

Mrs Thatcher: This is not about industrial relations. I hope that we restored because otherwise the pit faces abandonment. patients that the Labour Party chould campaign for cleaning costs to be kept at the level that the National Union of Public Em-ployees wants. That diverts money into cleaning and away from patient

relative prosperity. The ceiling on VAT revenue available to the Community would be raised from 1

The agreement reached by the European Council at Fontaineblean might well be seen as a turning point in the development of the EEC. Sir Geofficey Howe, Secretary of State Referring to an amendment tabled by a group of Conservative MFs which stated that it would be unwise for the House to express an one of the state of Geofficey Howe, Secretary of State for Foreign and Commonwealth Affairs, said in the Commons when unwise for the House to express an opinion on the settlement in Fontainebleau until full details were available of the mechanism for controlling public expenditure by the Community, he said: We have no intention of bringing forward the necessary legislation to increase own resource; shift Finance Ministers have agreed the necesse measures to Analy, said in the Commons when the moved a motion reliconing the successful outcome securing a fair settlement to the problem of bodgetary imbalances, a commitment to effective country of Community expenditure, and a sound basis for further development have agreed the precise measures to guarantee the effective implemen-tation of pudgetary discipling. While other member states VAT the outcome of five years of hard negotiation. They mark a growing realization by member states of

While other member states' VAT contribution would now be above I per cent. Beitain's, after taking account of the new arrangement, would be less than the present I per cent ceiling.

British would be paying only half of whit she would have paid had the Government taken the advice of the Leader of the Opposition (Mr Neil Kinnock) who had suggested that things should be left as they were. things should be left as they were. An increse in own resources was needed, to finance sensible new policies of potential benefit to Britain to support a prudent expansion of the regional and social funds of which Britain was becoming the largest beneficiary, and to allow other member states to

pay Britain's refunds.
Mr Robin Coek, Opposition spokesman on European and Community affairs, moved an Opposition amendment regretting that the outcome in Fontainebican had not provided for a lasting system for Community reflecting the relative ity of member states or for strict budgetary control of agricul-tural expenditure, but would result in a reduced level of rebase for the educed level of rebate for the United Kingdom and an increase in its net contributions. It added that it did not believe the settlement

Kingdom.

An intrigung item of £42m was to be written off - the sum about which Sir Geoffrey Howe had said the Community was in default and that steps would be taken to recover payment. That might be a realistic recognition of reality but was another concession by the Government in the course of securing a dubious deal for Britain.

There was a certain sauce in the

There was a certain sauce in the Commission, with the ink barely dry on the agreement for an increase in own resources, already asking for an advance.

What they had got was not a lasting settlement but an ad hoc interim settlement, lasting only until the 1.4 ceiling was reached. At that point a decision would be taken "ex novo" with no commitment. Mrs Thatcher had shown a flexibility which the select committee on foreign affairs had not anticipated and in a record time had climbed down from her publiclyespoused position, although the committee had said that some leaders would find that difficult in

the time available. Time after time in the past five ministers that one form of incres expenditure meant another form of expenditure had to be cut. if the Government could not afford to buy school books that were needed or open hospital beds, then it could not afford to fund even

larger mountains of food that was not needed. Mr Terence Higgins (Worthing, C) said no case for an increase in own resources had been made out. Less ought to be spent on agriculture. This was not apparently even the objective of the Government in the further negotiations that were taking place following the summit.

Mr Russell Johnston (Inverne Nairn and Lochaber, L) said that what was wrong was that the control, notably in the dairy sector. did not believe the settlement The only way effectively to established a case for an increase in own resources.

He said the settlement rep-

Envoy to be recalled for top FO post

Mr Ewen Fergusson, British Amabassador to South Africa, is to be recalled to Whitehail to fill a senior policy-making post in the Foreign Office (Peter Hennessy writes). He will succeed Sir John Leahy as deputy secretary responsible for Africa, the Middle East and the Commonwealth, probably in

September.
Mr Fergusson, aged 53, who played rugby for Scotland in the 1950s, won a high reputation in Whitehall as private secretary to the late Mr Anthony Crosland and Dr David Owen. Mr Fergusson's appointment,

to be announced shortly, com-pletes a substantial Foreign Office reshuffle. The senior men replaced have gone to import-ant posts abroad – Sir Julian Bullard to Bonn, Sir Patrick Wright to Riyach and Sir John to Canberra - the usual pattern for diplomats approaching the end of their careers.

The only significant change in the Foreign Office hierarchy is that its political director, formerly Sir Julian and since last week Mr Derek Thomas, no longer carries the title of deputy to the Permanent Secretary, Sir Antony Aciand.

Smith Monday since the Warrington by-election an anniversary that will be commemorated this evening by Mr Roy Jenkins is 2 lecture at Bedford College, London. It is also just more than a year since Dr David Owen succeeded Mr Jeakins as cader of the Social Democratic

In their very different ways both men have made a critical contribution to the party. It has become fashionable these days to write off Mr Jenkins as the political relic of a former age. ease in the Commons since his return from Brussels, nor has he mastered the contemporary art of television campaigning. He needs more time to develor

But it is doubtful if the party would have made quite the same early impact without the political weight of a man who had held so many high offices. His experience helped to give it substance. His close un standing with Mr David Steel was also invaluable in overcoming the initial difficulties in establishing the Alliance.

Owen's thrusting leadership

Dr Owen has in his turn provided more thrusting leader widespread acciaim as the most formidable leader of anyopposition party in the present Parliament. He seems to have something of substance to say on most issues of importance, and he appears to have thought more deeply than the others about what an alternative government should be offering

So it was surprising that his ideas should have been somewhat lacking in rigour when he spoke on his central theme of a social market economy at the Policy Studies Institute last week. He made clear his belief in the market economy and in the need for a spirit of commercial efficiency to infuse this country. But how would his social market economy differ from a market economy

Partly by a much more determined redistribution of income. Partly, perhaps, by pursuing an incomes policy in a half-hearted sort of way althogh this would not be indispensable to his strategy. But essentially by intervening when the market economy, judged to be politically incon-venient or socially undestrable. An Owen government would apparently play it by ear more

than one had supposed.

As an exercise in political philosophy, that is disappointing. Dr Owen does not yet have a considered doctrine or blueprint to put before the country. But he is a politician, not a political philosopher, and it is by that more practical standard that he deserved to be judged.

His style of leadership is to project a general attitude while making sharply pertinent comments on the important issues of the day. It is these comments – whethe on the Falklands war, the miners' strike, the Libyan embassy shooting, or the Nigerian kidnapping – that bave enabled him to command the attention of the Commons. But what about his general attitude?

Thatcherism without edges

It is essentially Thatcherism without the edges: the same emphasis upon economic efficiency but with a greater concern for social conse-quences. That he has not worked out precisely what this would mean in policy terms may not politically matter much at this stage. It is themes that an opposition party needs, not details. Precise policies are hostages that can be stolen or attacked.

Dr Owen is positioning himself and his party so as to present an alternative to the present Government that would not discard its principal achievements or threaten to turn down. He offers the prospect of changing governments while preserving a reasonable degree of continuity.

That might be just what many voters want in a few years' time if they have become bored with Mrs Thatcher or irritated with an accident-prone adminis-tration. But this strategy depends upon two conditions.

There must not be too strong a reaction against Thatcheris The Owen approach is designed to appeal to an electorate that, has become tired of quite a good government rather than disgusted with a bad one. He will also need to develop his ideas. further; not to provide to blueprint but to convince the country that he is doing more than simply striking an attitude-

Lord Lucas, questioned on the subject by Lady Sharples (C), said said endangered road safety, interrupted peaceful way. (Labour cheers).

The problems of splendid isolation

Scotland today: 3

fractured Western coastline, the region covers nearly half the Scottish landmass. Yet there are only 25 people to each square mile, compared with 611 in Britain as a whole. The distance from markets is prohibitive, the scale of communities so small that business is made doubly hard and travelling anywhere is

The drift from the Highlands of so many young and able people threatens to become a flood, compounding the prob-lems of the cities and depriving the region of those who have the drive and initiative for the future. So the Highlands and Islands Development Board was formed: one of the first quangos ever and supported in its time by both Labour and Torv governments as an essential spur for the region.

Last year it paid out £14.9m

in grants, £8m in loans and equity and £500,000 in social

grants for projects not expected to show a profit. The bulk of

assistance went in packages of less than £10,000 and the

Highlanders pay a penalty for living in a splendid wilderness.

The sheer remoteness of the Highlands and Islands, while acting as their main attraction to outsiders, hampers the The sheer remoteness of the Highlands and Islands, while acting as their main attraction to outsiders, hampers the continued economic survival of the local people. At the same building a strong network of time, the Government wants to cut regional aid. RONALD small businesses, prompted FAUX, our Scottish Correspondent, looks at the dilemma. perhaps by the experience of the development was matched by little more than some individent.

someone on the dole.

So much for the figures, which are small by the stan-dards of the Scottish Development Agency, but has the seed yielded any harvest in the almost 20 years the Highlands Board has been operating? The evidence given so far to MPs on the Scottish Select Committee looking into the operation of the board suggests that the Highlands would by now be much worse off without thisbenevolent big brother doling out its selective assistance from

Ms. Marie, Stauster level

Ms Marie Staunton, legal officer of the National Council for Civil Liberties, said yesterday it showed the need for an effective law of confidentiality.

Mr Steven Norris, Conservative MP for Oxford East, told The Times he intended to introduce a Bill into Parliament. "We want people to have

effective rights in confidence is breached," he said. When Edward Arnold, publishers of the book, first heard about the complaint last year, they temporarily suspended sales of the book, then said they would remove the offending page from copies in stock and

Police officers are still acting as agents provocateurs to secure the arrest of homosexuals in London despite Home Office guidelines forbidding the practice, according to a survey by the National Council for Civil

Liberties. The survey, which was conducted in the past six weeks, since the Home Office announced it was to reissue the guidelines in stronger form, shows there have been about 200 reported cases of importuning, indecent assault and gross indecency where no "victim"

was involved.

Most of the cases are believed to have involved plainclothes officers, and the others uni-formed officers hiding in such places as public lavatories.

The council has monitored all such cases reported through "gay" organizations, in particu-lar Gay Switchboard, and also

Mr Larry Costin, the coun cils' general secretary, said yesterday: "We are extremely concerned that these are all coveri operations, with no victim' involved, and no corroberatio other than the word of the police officer".

Despite Home Office undertakings to make clear to police that police were forbidden to act as agents provocateurs, all the evidence was that the practice was on the increase.

The findings coincide with attempts to be made today in the Lords to amend the Police and Criminal Bill to stop police acting as agents provocateurs and to make evidence unlawfully obtained inadmissable.

Labour front bench peers demanding that evidence of an stresting police officer be made in admissible at the trial of such offences unless corroborated.

A second amendment, which the Government is thought likely to accept, has been tabled by the Social Democratic Party peers, Lord Hutchinson of Lullington and Lord Hooson, which would give courts discretion to exclude evidence obtained by unfair, oppressive or unlawful methods.

entrapment came to a head after the arrest in May of Mr Keith Hampson, MP for Leeds Northwest, after an incident in a Soho homosexusi club. He has been He has pleaded not guilty.

their food and mistreating them. He said there is very little work, except for persons willing to take jobs with the Indone-

jobs have been filled with Indonesians," he said. The refugee's description of conditions tallies with that given in a letter in April from

the Bishop of Timor, Monsignor Carlos Ximenes Belo. The bishop described summary trials in which persons found guilty of contacts with the guerrilla fighters were hacked to "There is a real war in most

districts," he said, "and the people are suffering disease, hunger, lack of liberty and persecution." The church was also being persecuted. Bishop Belo asked for his letter to be revealed to the free world to open their eyes to the barbaric acts of which the Indonesians are capable".

According to the refugees just arrived from Dili, Bishop Belo was taken to Jakarta for interrogation because of the

Portuguese authorities are expecting a condemnation of Indonesia's actions in East Timor to come out of the Australian Labour Party congress this week in spite of the damage this could do the already deteriorating relations between Jakarta and Canberra,

Hawke puts party left to flight on uranium

From Tony Dubondia

The Australian Labour Party's national conference yesterday voted in favour of Australia continuing to mine and export uranium. The vote, 55 to 44, was a convincing win for Mr Bob Hawke, the Prime Minister, and the centre-left faction of

the party. The decision is binding on the Government, Mr Hawke had been known to favour a far more liberal policy on uranium mining. However, he was aware that his position would not have been accepted by the conference and is understood to be happy at the

Yesterday's vote allows the continuation of existing mines in the Northern Territory and gives the go-ahead for the Roxby Downs mine in South Australia, which will be the largest uranium mine in the world when it begins full operation.

Associated with the vote were a number of stringent safe-guards while the existing ban on the sale of uranium to France remains. The ban was imposed because of France's Pacific nuclear testing programme. Mr Bill Hayden, the Foreign Minis-ter, expressed regret at the continuing ban on sales to

France.
The left wing of the party had sought to totally and unequivocally close down the uranium mining industry in Australia.

The Prime Minister made a spirited defence of his pro-uranium position. "Of course there are problems but those who are deeply conscientiously knowledgable of those problems and who want to do what they can about them are saying that if you leave your uranium in the ground, not only will you have not done anything about those problems at all, but in the most immoral fashion you will have made that international nuclear fuel cycle the more dangerous by your decision.

Yesterday's decision was a clear indication of the ascendancy of the centre-left faction of the party and marks the demise of the once powerful left wing. The vote is also a pointer for today's vote on the issue of East Timor

The conference so far has been a disaster for the left with the opening day seeing the party vote by 56 votes to 41, for the entrance of foreign banks into Australia, one op the left's pet

But are you read for America?

<u>america's ready for british knitwear.</u> Sales of British knitwear increased

dramatically to over \$20 million in 1983. Forecasts are for even greater gains to come - based on demand for quality British goods in updated styles, the advantages of quota-free access in contrast to imports from the Far East, and an exchange rate favourable to

AMERICA'S READY FOR BRITISH CLOTHING ACCESSORIES.

The return to more formal fashions has also created a major role for women's accessories: sales of hats are up, and gloves are staging a major comeback. British hosiery and neckwear are amongst the products that can capitalise on these strong market conditions.

AMERICA'S READY FOR BRITISH CONTRACT FURNISHINGS

With sales of \$20 billion in 1981, contract furnishings is one of the fastest-growing industries in the USA. EXPORTER With British exports of carpets and furniture up 45% in the first ten months of 1983, there are significant opportunities for British producers - especially for producers of ergonomic seating and computer-compatible office furnishings. Wool carpet, too, is expected to double its market share ... in the next three years.

AMERICA'S READY FOR BRITISH FOOD-PROCESSING MACHINERY.

Food processing in the USA in the next decade will make gigantic strides as high technology developments satisfy the increasing demands of health-conscious consumers. The present British share of this \$1 billion market is \$10 million. AMERICA'S READY FOR BRITISH HEALTH CARE.

Expenditure on health care in the USA is currently running at \$316.6 billion, and some estimates put the figure as high as \$820 billion by 1990. America is Britain's largest single market in this field, buying \$109 million worth of medical equipment in 1983 - so there is

much room for expansion.

AMERICA'S READY FOR BRITISH COMPUTER SOFTWARE. The US computer services and software market is expected to be worth \$53 billion by 1986, of which \$15 billion will represent sales of software products. British software houses with the right products and marketing skills are already doing well - and could do better

AMERICA'S READY FOR BRITISH CONSTRUCTION EQUIPMENT AND SERVICES. Total activity in the US construction industry was worth

about \$195 billion in 1983. Real growth of 4-5% is expected

AMERICA'S READY FOR BRITISH NON-WEAPON DEFENCE SUPPLIES. In 1984 the USD epartment of Defense will spend some \$86 billion on the procurement of goods and services, of which non-military items will account for more than \$20 billion. The opportunities of this huge market have not yet been fully exploited by British suppliers. CAN YOU COME UP WITH THE GOODS? If your company is already exporting British goods, and

has expertise in analysing and segmenting markets, identifying and classifying competitors and persuading consumers that they want your product, then the answer is very likely: yes. But if it isn't and you would like to lean on the experience

of an organisation that last year alone arranged 78 joint venture missions to US trade fairs for some 1,300 British exporters, then simply fill in the coupon and send it to us. As a first step, we will send you details of the

British Overseas Trade Board's EXPORT USA initiative together with comprehensive reports on your sectors of interest. If you then decide to take our offer of help further, we will put you in touch with one of our eight special task forces as soon as possible.

Each task force is headed up by a major figure from the UK business community, with specific knowledge of the US market, who will invite you to join seminars in this country, or marketing missions to the USA.

Whatever your company's size or experience, just rest assured that EXPORT USA will prevent you being thrown in at the deep end.

British Overseas Trade Board, Dept 968, Freepost, Sunderland SR9 9AD.

widow

Britain had no legal right to arrest the Danish trawler fleet owner, Mr Kent Kirk, for fishing inside its territorial waters in January last year.
The European Court came to this conclusion in landlocked

Luxembourg yesterday after a lengthy study of the way in which Mr Kirk, on board his 140-tonne trawler, Sand Kirk, had been escorted into North Shields by HMS Dunbarton Castle and then fined £30,000 by the length resistance. by the local magistrates.

Mr Kirk appealed against the sentence to Newcasite Crown

Court, which in turn asked the European Court for its opinion of the Sea Fish (Specified UK Waters) Order 1982 (Prohib-ition of Fishing) under which the fine had been imposed.

The Danish skipper, who was deputy leader of the European parliament's Conservative group at the time, argued that the law was itself illegal and that the fine therefore had to be declared null and void. He bagan a personal £25,000 legal battle of principle.

Despite an opinion by Mr Marco Darmon, the European Court's Advocate General, last April that Britain was within its rights, the court itself has now found otherwise. Its opinion is that under Community law, as it existed in the early part of last January, there was no way in which one Community mem-ber-state could forbid ships registered in another memberstate from fishing in its coastal

The trouble was that what amounted to a legal vacuum existed in the early part of last January. All British waters had become Community waters his nets in order to qualify for from the time it joined the EEC arrest, even though he knew

is also a Government Minister -

Mr Kent Kirk; £25,000 battle of principle

on January 1, 1973. To give time for a common fisheries policy to be worked out, however, a 10-year period was agreed during which Britain could exercise control. The aim was for a common fisheries policy to be in place from the start of last year.

In the end, largely due to impossible to complete the necessary negotiations in time. Warned beforehand that a Danish trawler invasion of British waters was planned from the start of the New Year, the Government rushed through the Sea Fish Order, specifically banning Danish boats. The

Commission backed this. But Mr Kirk was determined to make a test case of the affair. On January 6 he led a small fleet of trawlers through an appalling North Sea gale into the prohibited zone off the north-east coast. Watched by a corps of very seasick journalists he then symbolically let down

He was duly arrested and fined. He then appealed and the Newcastle court asked the European Court's opinion. Despite the fact a common fisheries policy was agreed on January 25, Mr Kirk persisted with his case because he said that the British law was an attempt to deprive EEC citizens of their rights.

In the European Court's opinion, he was right to object. In the absence of an agreed common fisheries policy. Britain was not able to bring in on its own a law to exclude boats from another country. The right of entry to British waters had been agreed by all member-states when Britain joined, and could not therefore

The fact that the common fisheries policy subsequently gave Britain the right to control access to its waters did not matter. The court says that this would amount to retrospective legislation, which is contrary to the judicial code in all member-

121 miners trapped by blaze in Taiwan pit

rom a mineshaft fire last night prevented rescuers from reaching 121 miners trapped with imited air 6,500 feet beneath

the surface. A mining official said the danger at the Juifang coal mine's Mayshan pit, about 30 miles north-east of Taipei, grew

with every passing hour.
"We are doing our best to get them out. The longer the rescue work, the smaller the chance of their survival". Police said that only five of the 126 trapped after the blaze had emerged from the pit. Experts had been called in to

find ways of pumping air into the mine. The trapped men had gone down with air supplies. but these would last only a few hours.
The mining official said: "I

know the mine very well. The next few hours will be vital." Families of the miners gathered at the pit where the Taiwanese Prime Minister, Mr Yu Kuo-Hua, personally directed rescue Police said an initial investi-

gation showed the fire was started by a spark after a short-circuit. It lasted just over an hour, although smoke still filled the mineshaft.

It was the second mine accident in Taiwan in three Haishan pit, also in the north of of the island, caused a cave-in that killed 74 miners last

An inquiry after that disaster had prompted the Government to, consider closing 70 of Taiwan's mines. Some had already stopped production, while others were alleged by

MPs to be unsafe. . Only a fraction of Taiwan's coal is locally produced. Last year it imported 7 million tonnes, mainly from Canada and the United States.

After the fire at the Haishan mine, the Prime Minister ordered safety checks on all coal mines. He later threatened to close all unsafe and inefficient

Princess's private art preview infuriates Californians

Los Angeles art lovers were infuriated at being shunted aside yesterday to allow Princess Anne to have a private viewing of an exhibition of Impressionist paintings at the

county museum of art.

Most of the anger was directed at museum officials, who said that, at the request of the State Department and Scotland Yard, the building was cleared of visitors while the Princess and her party spent an hour viewing the 127 paintings gathered for a much-acclaimed exhibition entitled "A day in the country - Impressionism

and the French landscapt". Reagan ready to deny Greece sales of F16 jets

From Our Own Correspondent Washington is expected to decide shortly to block the sale of 16 F5 fighters to Greece, despite the fact that the row is making relations with Athens even more strained. However, officials yesterday

were at pains to emphasize the value the US places on its relationship with Greece as an important member of Nato. Greece is incensed that the aircraft, which it was trying to buy from Norway, may be sold to Turkey. As the aircraft are of American manufacture, the US retains the right to authorize transfers from third countries. A decision to block the sale would be, in the words of American officials, a "limited and carefully calibrated" gesture of the Administration's disap-

month of a suspected Jordanian terrorist. The Administration's attitude was summed up in recent Congressional testimony by Mr Richard Burt, Assistant Sec-retary of State for European Affairs, who said: "It is often very frustrating to deal with an allied government that defends

resolutions 242 and 338, or

Labour has stressed that it will adopt a new policy on settlements. Mr Gad Yaacobi, the party's chief economic spokesman, recently pledged that a Labour government newspaper advertisements would not set up any new which pledged: "No return to settlements in heavily popusettlements in heavily populated Arab areas, or spend money on those already established there. Labour is also committed to handing over in the West Bank and Gaza

Among Arabs living under their seventeenth year of occupation, a preference for Labour is detectable, but by no means universal. Many radicals are deeply suspicious of the impliapproach to the Palestinian problem. "Labour and Likud are two faces of the same Zionist coin", said Mr Jamil Nasser, the deposed mayor of Jericho. "The difference is that If the opinion polls are Likud says frankly: 'we do not want you in this country', while Labour disguises these sentiments with diplomatic declar-

Power share ploy by Shamir dismissed

Mr Yitzhak Shamir, the ness that had accompanied Israeli Prime Minister, said Israel since its birth in 1948, yesterday he will invite "all Mr Peres, who repeatedly responsible elements" to join a claimed in his presentation that he gets the mandate to form a brought the country to econ-new administration after the omic collapse, later dismissed July 23 elections.

Mr Shamir's invitation as

Mr Shimon Peres, leader of the Labour opposition, responded quickly that he would not join such a government and that he was not thinking of inviting Mr Shamir's Likud coalition government under his leadership if he got the mandate.

The Prime Minister announced his decision dramatically in the closing sentence of his presentation in a 30-minute television "confrontation" with Mr Peres, recorded for screening last night. He said his proposal arose from the need for a strong united effort by all parties and the nation to overcome the economic weak-

government of national unity if seven years of Likud rule had election propaganda.

Government but the national programme," he said. "If you have a government and you don't know what to do you'll paralyse the country.

Mr Shamir later declined to

amplify his suggestion or to say whether he would consider joining a Labour-led government of national unity. Some observers interpreted

Mr Shamir's invitation as a pitch to undecided voters a fortnight before polling day, when public opinion polls show that present coalition of nationalist and religious parties will not be able to muster a majority in the new Parliament.

Husain's dismay made clear to Mitterrand

Amman (Reuter) - President François Mitterrand stepped back 2,000 years yesterday when he toured the remains of lished the first overland trade

But amid the massive fortications, troops carrying automatic weapons provided a reminder of the main aim of the French President's visit - to help to break the deadlock in the Arab-Israeli conflict.

M Mitterrand, who arrived on Monday for a three-day visit, attended a state banquet on Monday during which King Husain of Jordan appealed for United Nations help in defusing what he called an explosive situation.

In a speech reflecting dismayat the failure of successive peace plans, he said prospects for peace had never been so bleak and spoke of a climate of

despair, confrontation and instability.

King Husain, a central figure in any future initiative, renewed Petra, an imposing desert his call for an international stronghold of the Arab Naba-teans, whose caravans estab-of the UN Security Council, of which France is one of five He said such a meeting of all

the parties concerned - includ-ing the Palestine Liberation Organization - on the basis of UN Resolution 242 was the best way to a settlement. President Mitterrand said he

shared Jordan's hopes for an allparty peace conference, but he did not believe there were any "miracle formulas." Diplomats said his reponse reflected his government's feeling that such a conference would be useful only prior agreement on key issues.

The French leader has made it clear his purpose is to listen to what King Husain has to say and to offer French help where

Greens put off decision on rotation of MPs

From Michael Binyon

Bundestag met yesterday to try within the party over the reluctance of some of its members to give up their seats halfway through their parlia-mentary term in accordance with the party's commitment to a "rotation" of its representatives. But they postponed any decision until after the summer

The Greens say roatation is the only way their 26 voting members of the Bundestag can keep in touch with the party's popular base, and avoid temp-tation of building up their public profile out of political

Several better-known members of the party, however, strongly oppose rotation, say-ing that it robs the Greens of their most experienced parlia-mentary speakers just they are beginning to make a mark on the political scene and on public consciousness. A crisis by two leading members, Frau Petra Kelly and Herr Roland

March.
Frau Kelly recently asked the party's Bavarian branch, which nominated her to the Bundestag, to extend her mandiate, but her request was turned down. She publicly regretted this, and hinted that she would either resign immediately and go back to her previous job in the European Commission in Brussels, or would defy the Bavarian party's

Bundestag.
This threat has put the Greens in a difficult position, for if they expel her and Herr Vogt from the parlimentary faction their numbers would fall below the minimum needed to constitute a faction, with its

Herr Vogt, one of the most active Greens in the peace movement, also said he would referendum of all party members in the country to see whether the "real basis" did indeed want its representatives

to step down. Many Greens would not be sorry to see Fran Kelly go, as she has been at loggerheads with her colleagues for some time, and sharply denounced the party after losing her position as one of its three

leaders or "speakers". She has expressed sympathy actions of her close friend, General Gert Bastian, who tary faction after accusing it of intrigue, dishonesty and ma-nipulation.

The Greens have also been wracked by a split between the pragmatists, led by Herr Otto Schily, who favour a tactical alliance with the Social Democrats, and by the fundamentalists who oppose any compro-

Herr Schily recently pro-posed a formal alliance with the SPD in an article in the party's newspaper Vorwarts; in which he said the two parties could jointly support Herr Oskar Lafontaine, the left-wing SPD Mayor of Saarbrücken, as a possible candidate for Chancellor.

conduct in fact prevented the constable from carrying out his duty, or made it more difficult for him to do so, and that the defendant intended that conduct to prevent the constable from carrying out his duty, or to make it more difficult for him to carry it out.
The Queen's Bench Divisional

Court so held in reserved judgments allowing an appeal by case stated by the prosecutor, Police Constable Lawrence Lewis, against the de-cision of Bristol Justices on September 2, 1983, whereby they acquited the defendant, Michael Vincent Cox, of an offence under section 51(3).

Mr Noel Sweeney for the

prosecutor: Mr Robert Duval for the

MR JUSTICE WEBSTER said that the facts as found by the justices were that on May 27, 1983, the defendant was present when his friend was arrested in Filton Road, Bristol for being drunk and disorderly. The friend was placed in the back of a police van by the

prosecutor.

The defendant opened the rear van door to ask his friend where he was being taken but the prosecutor shut the door and warned the defendant that if he opened the door again he would be arrested for

The prosecutor got into the van to drive it away. The defendant again opened the rear door to inquire of his friend where he was being taken.

obstruction.

It was accepted by the defendant that the opening of the door obstructed the prosecutor because it prevented him from driving the van away. But it was submitted before the justices that the obstruction was

That expression was to be found in the judgment of Lord Justice Griffiths in Hills v Ellis ([1983)QB

It was the justices' opinion that the principle laid down by that case in considering whether a defend-ant was guilty of "wilful" obstruc-tion of a constable in the execution of his duty, contrary to section 51(3) of the Police Act 1964, a court had to be satisfied that the defendant's conduct in fact increment the structed the police.

The justices found that the opening of the van door was not aimed at the police and that the defendant did not intend to obstruct

the prosecutor. They accordingly acquitted the defendant. acquitted the defendant.

The question for the opinion of the court were whether the principles applied by the justices were those laid down in Hills v Elis. and whether, on the evidence the decision to dismiss the charge was

perverse and unreasonable.

It could not confidently be asserted that the test whether the actions of the defendant were aimed at the police was the definitive and authoritative test of wilfulness. But the word "wilful" in section 51(3) clearly imported an element of mens

Although it might not be unbeloful in certain cases to consider whether the actions of a defendant were aimed at the police, the simple facts which a court had to find were whether the defendant's conduct in fact prevented the police from carrying out their duty or made it more difficult for them to do so; and whether the defendant intended that conduct to prevent the police from carrying out their duties, or to make it more difficult

for them.

Accordingly, in asking themselves whether the defendant had done an act which was aimed at the police. the justicies had not asked themselves the right question for the purpose of the present case, or the hole of the right question. Had they considered the matter,

the justices must have drawn the inference that at the time of the alleged offence, the defendant knew that the vehicle could not be driven away with the door open; and that before he opened the door the second time he knew that the prosecutor was about to drive the

On the face of it, the defendant must have been making it more Bristol; difficult for the police to drive the Bristol.

van away and intending so to do.

His motive for opening the door, namely to ask his friend where he was being taken, was irrelevant unless it constituted a lawful excuse for the obstruction, which had never been angeested.

Accordingly, the justices' decision was perverse and unreasonable, since had they asked themselves the right questions, they must have

right questions, they must have been satisfied on the evidence so as to be sure that when the defendant opened the door he intended to make it more difficult for the police to carry out their duties, even though that was not his predomi-nant intention. The case would accordingly be remitted to the justices with a direction to convict.

LORD JUSTICE KERR, agree-ing, said that the word "wilfully" clearly imported an additional requirement of mens rea. The act not only had to be done deliberately, but with the knowledge and intention that it would obstruct.

But in the absence of a lawful excuse, the defendant's purpose or reason for doing the act was irrelevant, whether that was directly hostile to, or "aimed at", the police, or whether the defendant had some other purpose. Indeed, in the majority of cases the intention to obstruct would not simply be "antipolice" but would stem from some underlying reason or objective of the defendant which he could only achieve by an act of intentional

offender, which could be termed "hostile" to the police. Equally, the motivation could be public-spirited defendant intervened on behalf of someone whom he believed to be innocent. Or it might be for a neutral reason, for example because he considered that the police officer should be engaged on a higher

European Law

Court of Justice of the European Communities

Fishing ban made before authorized by EEC

Regina v Kirk Case 63/83

Before Lord Mackenzie Stuart. President, and Judges T. Koop-mans, K. Bahlmann, Y. Galmot, P. Pescatore, A. O'Keeffe, G. Bosco, O. Due and C. Kakouris Advocate General M. Darmon [Judgment delivered July 10]

Member states could not prohibit from fishing in their waters before the adoption of Council Regulation No 170/83 of January 25, 1983 (OJ 1983 No L 24/1) other than as a By the Sea Fish (Specified UK

Waters) (Prohibition of Fishing) Order of December 22, 1982, the United Kingdom prohibited Danish fishing boats from fishing in British waters within the 12-mile limit. The order was notified to the Com-mission which approved it by decision of January 5, 1983. On January 6, Mr Kent Kirk, the on January 6, Mr Kent Kirk, me captain of a Danish fishing boat, was found fishing within the prohibited waters and subsequently fined. He appealed to Newcastle upon Type Crown Court, coatending that the United Kingdom had not been authorized to make the

committed.
On January 25, the Council adopted Regulation No 170/83 common conservation policy.

establishing a Community system for the conservation and management of fishery resources. Article 6(1) authorized the member states to retain the derogations under article 100 of the Act of Accession for ten years as from January 1, 1983, and to extend the six-mile

imit to up to 12 nautical miles. The crown court referred the matter for a preliminary raling under article 177 of the EEC Treaty.

In its judgment the Court of Justice of the European Communities held as follows:

Pursuant to articles 100 and 103 of the Act of Accession, derogations from the fundamental principle of non-discrimination were restricted to the transitional period ending December 31, 1982, and the introduction of any further measures was entrusted to the Community authorities, in particular the

Although the Council did not adopt such measures within the period laid down by article 103, the member states did not thereby have power to act in place of the Council, in particular by extending the derogations beyond the prescribed

It followed that, at the material time, article 2(1) of regulation No 101/76, which provided for equal conditions of access to waters coming within the jurisdiction of nation based on nationality, was In Case 804/79 Commission v UK

certain cases respond to concern for the conservation of fishery resources, it was clear that the measure in dispute did not have that objective. National rules prohibiting access to national waters whose objective was not conservation could not fall within the power of the member states to adopt temporary conservation measures.

Without examining in general the lawfulness of the retroscrivity of article 6 (1) of regulation No 170/83,

While rules on access might in

MR SCOULLER said that the obscure was not often used because

Further, by rule 9(2) of Schedule 1 to the Industrial Tribunals (Rules of Procedure) Regulations (SI1980, No 884) an industrial tribunal had to give the reasons for its decision. Unless and until the reasons were given with sufficient clarity to tell the parties in broad terms why they won or lost there could be no won or lost there could be no question of the industrial tribunal being functus officie.

End of the road for Wigan market

Wigan' Market Hall is a fine example of what can happen to a sturdy popular, traditional central market brilding. In April its 200 traders learnt finally of the imminent demise of the hall which has dominated the town centre since its opening in 1877.

The site is to house a large new shopping centre designed, in the words of the borough council leader, "to take Wigan into the 21st century". The scheme will provide shops, a supermarket, car parks and an inner ring road and the cost - between £20m and £40m - will be shared by the council and the developers, the North East Development Association. The site will include a new market hall.

Despite this, 50,000 people signed a petition against the demolition of the old market hall; We had them queuing up to sign" one of the organisers said. On a busy Friday it's hard to find anyone in the market, trader or customer, who wants a new market, or who thinks that in the recession hit North a new shopping centre will bring the trade back to the centre of Wigan that has been lost over the past 20

But the view of the Labour council is that there is pressure from national retailers for modern premise, which will in turn attract shoppers from outside the town. The Liberals, who want to keep the market hall as it is and refurbish it, say that the planners may be out of date now that shopping centres have given way to "out of town" sites, of which there are seven ringing Wigan.

Those are the arguments, usually couched in development speak. The market itself swirls with activity: stalls are crammed inside and out with food, clothing, flowers, everything. Here are nine butchers, each busier than the last: you can buy a pound of nails at that stall and a "Paragon" coal shovel here for £1.75.

The sweet stall sells "Norman's" home-made curly aniseed, herbal cough drops, treacle brittle, nutty nibs and dessert mix; Alf Peacock sells tea cosies for £1.75 and ladies' fancy knit vests with built-up shoulders. The pet shop is called Molyneaux and Smith.

Mrs Lesley Smith trades outside the hall. She sells hundreds of bolts of fabric from a stall (rent . £6.50 a day) she opened 12 years

One of her fears about the new

Interior of the hall (above). Lesley Smith (top right) has a stall outside. John Green (right) - his family have traded in the market since it opened

the area?

market is that the loading bays and Taylor, (kitchen rolls 27p, the stalls. How will she carry all those bolts that distance? She has other fears: "How many markets are there that are old fashioned now? Why spoil something that is draughty entry! They've had their good, that already works well? When you take the oldness away from a thing - well, you get that."
(Here she points to Wigan's first venture into modern shopping arcades - a blank, enclosed building opposite the hall which has a number empty units and largely houses national chain

At the household stall, Whelan

are to be underground, far from men's tissues 26p) Mrs Pauline Taylor is a tornado of energy: "I've been to lots of towns where

there are new markets. They're a washout! Every one just a atmosphere killed off!" Young Mr John Chadwick, butcher, with 28 employees, mostly young and exuberantly hard working ("and they're all employees, there's no job creation here!" he says) points out that the market houses "200 small businesses; where's the sense in swapping that for one big development?

John Green, whose family

butcher's firm has been in the hall since the day it opened, is chairman of the traders' group. He believes that the hall has been neglected for years by its local authority owner while various developers have sniffed at the site; why not, he asks, refurbish it and make the market a far greater

centres which already abound in

There's an odd fatalism about the whole redevelopment among the customers making purchases between stails, stopping to chat on the wooden floor (an award winning Victorian innovation -

blocks used upended to form a floor to last till kingdom come); they say things like "I don't want the market to change, it'll never be the same, but they've decided, so there's nothing to be done."

In 1984 Wigan people can be excused for feeling a little sore about their image; but Orwell's attraction than the shopping, tripe shop has long since gone and the market and its square represent something good and sturdy from the past that the citizens - at least 50,000 of them - want to keep. Why not let

Lindsay Mackie

VICTORIAN VALUES

The great covered markets of the North of England are in the main Victorian, monuments in stone and brick, fronwork and statuary to the expansion of domestic desire for

expansion of domestic desire for everything under the sun.
With their high glass roofs, the natural light falling on graceful cast pillars and honeycomb ventilators, the market halls were designed to take shopping up a notch or two; they were a suitable, dignified venue for the respectable and substantial shower (whose severants showed at shopper (whose servants shopped at

the open markets).

Modelled on conservatory designs, the halls sprang up in every northern town and city. The great Waterhouse built one in Darlington; Manchester, Leeds, Halifax and Huddersfield all boasted great halls, housing hundreds of stalls, piled high with fruit and vegetables, meat, hardware, herbal remedies, haberdashery, sweets and soft furnishings, great cheeses, tripe, braid and sequins.

The best of the surviving old

markets are still, miraculously, much the same, tributes to the popularity of this way of bringing buyers and sellers together in places that have existed, in one form or another, for hundreds of years." There's always been a market here." the visitor to these places is told.

But, centrally placed in coveted prime sites, there is hardly an existing market in the North which has not felt pressure from development. Many have already gone. Bradford, Huddersfield, Halifax, Warrington, St Helens, Manchester, Liverpool and Leeds have lost halls since the start of the

The disappearance of the great market halls of Britain has been happening, by stealth, over the past two decades. Customers, able to buy everything, almost, under one roof, loved them. So did the traders, since hundreds of small business have begun under the high roof of a market hall of around the sheltering outside

One estimate puts the number of these great halls which have been destroyed in the past 20 years at 70 per cent. The causes include disrepair, development and a number

Sometimes threats of alternative shopping centres or development merely wax and wane but they take up the traders' time, energy and cale in legal battles, Chorley, Preston and Accrington have felt these traders. There is hardly a local authority in the country that has not wanted to meddle with its old markets, to their detriment, according to the editor of the Market Trader newspaper.

moreover ... Miles Kington Lichfield's Indian summer

I waver violently between two opposite approaches to travel-ling to new places. Sometimes I dutifully do my homework in advance and arrive thoroughly othersted while at other time? educated, while at other times I arrive totally ignorant, or open-minded, and let first impressions educate me. The further I go afield, the more I tend to read up, so that when I reached Granada last month I felt I knew the place already. When this last weekend I found myself, unprepared, in Lichfield, it was as if I had come to a

strange, exotic place.
Now that I've been there, it seems even more strange and exotic. Wandering round the outside of the blackish, reddish cathedral, I paused to stare up at a grotesque gargoyle, shrieking silently into space. "If you're looking for strange creatures", said a local, over my houlder "aid a local over my shoulder, you want to go round the other side. They are really weird there. "So they were – a whole menagerie of devils, griffins and lions, leering and eating smaller stone crea-tures, the Middle Ages may have been without television, but they had a good supply of exotic documentaries from the church's natural history unit.

Inside the magnificent cathedral the accent was more on military matters. I do not recall having seen so many battle honours, regimental monuments, roll-calls of those dead in far-off places. India, mostly. The plaques of those who had passed away peacefully in bed seemed almost apologetic that they had not perished in battle.

Next to it was the strangest thing of all, a display board erected by Rackham's of Lichfield, local photographers, showing recent events in colour. A group of smiling Indian women in saris (India again), a great group of cricketers among whom I recognized Lord Lich-field, Ted Moult and Barry Norman and a crowd in front of the cathedral containing about 40-double bass players and an elphant. I never saw anything in Granada like this, nor can I think off-hand of any composer who wrose music for double basses and elephant.

I was in town to take part in a concert belonging to the Lichfield Festival, but our concert was not the main event of the evening. That was a concert given in the cathedral by sitarist Ravi Shankar - India again! The festival director told us that what he had heard of it had been magnificent and that two thirds of the large audience had been Indian.

It will come as no surprise to you to learn that when we looked round for somewhere to eat after our late concert, the three restaurants still open for business were Indian. And yet when we wandered round Lichfield on Sunday morning, admiring the trees and lakes in the middle of this admirable town of mystery, peering at the church-mason's quarter stretch-ing away like some inland boatyard and inspecting the spot where the last public burning in England took place (1612), we didn't see a single Indian face. Where were all the Shankar fans, the sari ladies, the Indian chefs? Where was the elephant trainer? What curious cycle in history was it that took all those Lichfield people to India years ago and then brought all these Indian people to Lichfield?

As I say, a city of exotic strangeness. And I probably wouldn't have noticed if I had done the proper reading up in advance, but instead would now be dabbling on about the bicentenary of the greatest Englishman of all time – as it is, this may be the first piece ever on Lichfield which hasn't bothered to mention Dr Johnson. Go to Lichfield and buy your Dr Johnson mugs if you like; I shall, till I am better instructed, think of it as an Indian city with parks and ornamental water, full of small f this looking good."

CROILING Stone 1984

Mick Brown

Daltrey changes his tune

Roger Daltrey is clearly a changed man. His clothes are more dapper. His aura is should we say? - mature. But the biggest difference appears to be in Daltrey's attitude; the former lead singer of the Who, one of the most idealistic bands in the history of rock and roll, is now a praematist.

"I don't have any illusions any more", says the forty-yearold Daltrey. "The illusion that rock and roll could change anything - I don't believe that. I've changed. Who would have ever thought that I'd end up saying I want to be an all-round entertainer? But that's what I want to be. Not that I ever want

to go to Vegas...".
Daitrey has become almost better known as an actor than as a singer. During the last two years, he has made his Shakespearean debut in The Comedy of Errors on television; has played MacHeath in The Beggar's Opera, which was directed by Jonathan Miller,

and has starred in a short film called Bitter Cherry.

One cannot help but wonder if singing has become an afterthought. "I love singing, and I don't want to stop," he says. "My solo career during the Who was like a hobby, because the Who's schedule was simply never enough for me, and there are all kinds of music I like to sing that the Who didn't cover.

Now I've got the freedom to do what I like, when I like.
"Pete (Townshend) and I both said the Who was an alternative to heavy metal, but towards the end, John got more into that and Pete and I further away from it. Because we were compromising so much, we ended up just settling into what we knew how to do best. It bored me to tears."

Even though he acknowledges that the Who had not really recorded a good album since the death of Keith Moon in 1978. Daltrey continues to believe that the Who had a symbolic importance. "We kept our ideals, a sense of fairness and giving people hope, and for and giving people hope, and for that reason the Who was a valid thing to keep going. I was very upset when it finished."

Daltrey's illusion that the Who could change the world was finally shattered by Townshend's increasing involvement with drugs and his battle to overcome his addiction in 1981.

"For years, Pete had been responsible for keeping me away from all that; I'd always

Portrait of a pragmatist: At 40 Daltrey says I have the freedom to do what I like

man I love very dearly doing that to himself, because heroin changes people permanently, even when they come off it."

Daltrey says he has hardly seen Townshend since the group played its last show in Toronto in December 1982. "He's stuck himself into a different world, and he's not really very communicative these days. Townshend's best stuff always came out of his worst problems. But I'd hate to think he'd have to go through more hell just to write songs. I just hope he happy, that's the

only thing I care about.
"I miss the Who very much, but it's over for good now, and you can't live in the past. I've got my own life to get on with."

Daltrey's immediate concern is finding the money to direct a film about the Kray twins. Stung by his experience in McVicar - based on the life of John McVicar, which Dattrey dismisses as " one dimensiona and too cops and robbers" - he has supervised the scripting of the Krays film, cast the characters and will direct himself "I'm fighting tooth and nail to get this the way I want it. It's not a gangster film, and I don't think it a subject which will only be of interest to British audiences.
"Ronnie was a paranoid

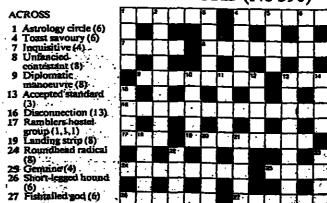

schizophrenic, and gay, who had an extraordinary relation-ship with his mother. When Reggie - the straight twin - fell-in love with a girl, Ronnie was very disturbed about that;

addict himself, I suddenly relationship between identical thought "We're human." It twins - except for Shakes-really distressed me to see a man I love very decided as peare." Daltrey visited Ronald Kray in Broadmoor to get his comment and found him

possessed of a "frightening charisma. But then that's why people are fascinated by criminals, isn't it? It's like the tigers at the zoo. I don't excuse what the Krays did, and I did tell Ronnie that he wasn't going to come out of this looking good."

Notes

Could it be true that all those interminable months of torture were finally over, at least for the time being? The relief I felt said they were, But then something strange happened which triggered doubts of a different nature. Walking through the covered corridors of the airport to immigration, I saw all types and ages of the members of my own sex walking about in tight slacks, short skirts, hot pants,

see-through blouses with their hair-flowing and their faces in makeup.

As I tooked at them, I felt a constriction in my chest, a tightening

of the diaphragm. It took me some time to recognize the symptoms of saxiety and then to realize that I had brought with me an in-built reject mechanism. This proved more deeply rooted than I was willing to admit that first day. Even now, two weeks after my arrival, every time I see a young couple holding hands in the street or see people standing outside pubs with their beer mugs or whicky glasses, my non-physical head seems to turn round to make certain nobody is watching them.

watching them.

Do these people realize how fortunate they are? Do they know what blessed luxury it is to feel the breeze in your hair, to say what you want to out loud, to wan what you file and go where you wish without forever having your heart in your throat and your eyes in the back of your head? Can they imagine what it is like to be imprisoned in a society where the least imprisoned in a society where this least of your heartaches, the least of your worries probably, is that tomerrow you may be strading against a wall, facing half a dozen rifles or rotting in

here. Two years, alone, a wom

underground world of eternal fear, trying to fend off a thousand common daily dangers and searching for the

Mehrabad Airport in Tehran, once the best equipped and most modern in that part of the world, was in shambles and looked like an emerg-eacy hospital after an unexpected attack. Everything was in disarray.
Officious-looking Pasdars (the socalled Revolutionary Guards, about whom more later) shuttled from one corner to the other, soft-padding their orders to equals and harshly screaming them at travellers cringing in corners. Turned-out suitrases littered the filthy hall, their owners, acting scared, pervish, brow-beaten, standing over them as over function blets. Arguments galore. Why did I have so many books with me (so many

be bringing them back; why did I have three pairs of shoes; why was I carrying a camera. And lectures, ad nauseam; real knowledge was the knowledge of Allah and needed only the Koran; material things weighed down the soul, especially in a woman: God-fearing women did not go around. taking pictures. In the end, I had to send back two volumes of English books (not allowed out because the country had paid for them in foreign exchange), my wedding ring and a set of six glasses (Persian handicraft)

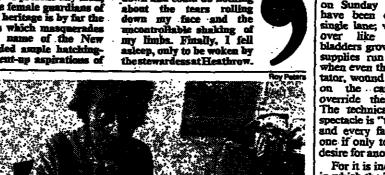

purchased at 30 peace each. I had arrived at the airport at three thirty in the morning, my flight was at seven. It was now half past six and I had not yet even checked in. There loomed ahead two other hurdles: collecting of passports, and bodily inspection.
Of all the brutal pastiness banded

out to individuals in present day Iran, that served by the female guardians of the revolutionary heritage is by far the worst. The chaos which masquerades worst. The chaos which masquerades itself under the name of the New Order has provided ample hatchingground for the pent-up aspirations of female sex not only as an inferior order but also as the offspring of Lucifer, the male is that of God. Every religious zealot will deny that and quote verses to refute it, but the fact

The following 20 minutes of my life I should very much like to forget. The sermous, the queries, the admonitions, scimons, the queries, the admonitions, the mental and physical probes, the sneers. But ultimately, it was over and, having divested myself of some more items (frilled handkerchief, perfume stomiser, eyebrow pencil, etc) which irked the Islamic principle. I was through the boarding gate and on

was through the bearting gate and on to the plane. Seven thirty, and yet there had been a number of people waiting for inspection behind me. The flight finally took off at nine. I had thought that once we were in the air, I would settle back, relax and feel relieved. Instead, I broke

age should be met. "I wanted to taste but no money the opportunity of buying studio quality pottery at mass market prices. It was all either 'fine china' on one

She never really meant to go into the potteries. After three years at Burslem Art School, she thought she would go to the Royal College and become a dress designer. In those days though, the Royal College only accepted people already in employment, so Miss Cooper took a job locally, as a paintress at Grays: Her sense of making the best of what was available grew from there. "What do all those art students contribute to born, she asked herself. "They go to Rome and Polperro and try to paint their great pictures and never again help our trade"

She eventually set up on her own in the spring of 1930, just after the Wall Street crash had sent calls of loan foreclosures A. E. Gray, director of the echoing through British indus-pottery where she had prewas at hand stood her in good stead. Paintresses started in her factory at 14. She had to teach them how to grind colour and how to apply it, how to space and how to trail. Early designs such as "Rolka Dot" and Exclamation Mark" were the outcome of searching for forms simple they could be

of hers ("Meadowlands" for Boots, "Inspiration" for Tesco), though no longer under her own label. After the war, she kept going as long as she could, even though raw materials were in short supply, she now had a husband and baby, and her showroom in Holborn Viaduct had been bombed out. But in 1957, a fire gutted her factory -Crown Works, Burslem and she amalgamated with

Royal Tuscan. in 1966, Royal Tuscan was acquired by the giant Wed-gwood group, which is currently celebrating its 225th anniversary. Susie Cooper thought it might be a new start, ("Such marvellous facilities - tunnel ovens, worldwide markets - I thought we could expand and develop our bone china end. Bone china was much more popular than earthenware after the war"), but the size of the its management and selection committees, the marketing policies ("could you shift £200,000 of this design?"), and their desire to follow rather than lead public taste has meant a steady drain on Miss Cooper's capacity to innovate. very ... masculine," she says, struggling for the word "There is no eminence for an individual, or for individual ideas. I produce designs, but they feel they can't afford to take the risk, so they are not put into production. Perhaps they are too stylized," she adds doubt-

Miss Cooper's great bugbare. "The industrial base is the wealth of this country," she says, "Export or die", that used to be our motto. But the word industry seems so downgraded. so . . . unappealing.

Miss Cooper is as spry and nimble as Mrs Tittlemouse, a tiny figure with sandy eyelashes who scurries about her house. Every morning, she makes the tea and takes it up to her son, Timothy, in any of the hundred odd cups that he neatly stacked in her kitchen cupboards: cups with feathers floating lazily through deep blue heavens; or with white horses prancing against earth-red; or leaves, stems and flowers stirring gracefully across a field of green. They sit and listen to the news before Timothy goes off to work and Miss Cooper, depending on which day it is, either does the washing (Monday), shopping (Saturday), cleans the unstairs or downstairs of her cottage (Thursdays and Friday respectively), or goes into her studio.

1986 has just been named Industry Year by the Royal Society of Arts, aware that the average schoolchild place industry bottom on its list of career choices. Susie Cooper was curious to know what this year actually going to involve. "The units are so big now, it's hard to see how the creative person can stay independent." Her son was trained to go into the Susie Cooper Pottery, but was put off when the company merged with Wedgwood. He's now in a small boat-building firm.

The perils of taking

your child on safari

ALAN FRANKS' DIARY

wheeled ovens queue for hours on Sunday motorways which have been coned off into a single lane; when tempers boil over like radiators, small bladders grow weak and nappy supplies run dangerously low when even the cricket commen tator, wound up to full volume on the car radio, cannot override the baby's bawling. The technical jargon for this spectacle is "the family outing". and every family should have one if only to cure itself of the

desire for another. For it is indeed an education in which the Three Ws form the basis of the core curriculum - I mean of course Windsor, Whipsnade and Woburn. What they have in common is that all involve motorway travel and all induce the desire for outlandish

pets and stately homes. This is a ypical post-visit dialogue: Parent: Don't be silly, of course we couldn't fit a giraffe into our back garden. Child: Just a little one.

Parent: How would you get it Child: By Helicopter Parent: What would it eat? Child: Mr Harris's trees. Parent: And what happens when it grows?
Child: We could move.

Parent: Where to? Child: Woburn Parent: I don't think we could afford that.

Child: We could sell the car. Sell the car. Why, yes. Not so daft as it sounds. No car equals no family outings, equals no mere of these bizarre possessive impulses which even the biggest animals call up. But such solutions are not on, for the tank is full Woburn it is.

The use of a foreign language is a well known way of pulling the wool over your children's really, seeing as they are doing the same thing to you, with their wild, wavering dipthones and their splashing sibilants. They make as much sense as natives, which, in the strict meaning of the word, is what they are, if you consider how much nearer than we they are to their moment of

By using the Pas-devant-les-petits dialect, you are only responding in kind; but let us not be fooled. In most house-holds where this fine old linguistic tradition is main-tained - like that of my horrible lawyer friend Parvis Mailand— self-approandisament is not for away. It gives the users a chance to flaunt their educations and feel that those endless hours of Balzac and Voltaire are at last asserting their practical value. A Level French may have been poor grounding for the argot of last year's holiday in Perigord (actually it didn't matter since everyone there was English), but it is just the thing for the Maitlands to use for keeping the children in the dark about their

social intentions for the evening. The trouble is that whenever intelligent kids (and the young Maitlands are certainly that)

NAME (Please print).

ADDRESS.

Perhaps it is for this reason that
Parvis and his wife have
switched into a new mode,
founded, as far as I can gather, on O Level German. One could call it Engleutsch. They practice it very loudly and (inevitably) very competitively, in the pub gardens of Richmond. The main aim seems not to be communi-cation, but the bamboozling of the partner, and other casual listeners, by menas of difficult references.

For example: Parvis: Heute abend gehen wir zum drei screen Odeonhaus.

His wife: Was zu sehen? Parvis: Der Gandhi-film von Reingardt Attenbürgher.

As the Maitlands are off to Venice for a fortnight next month, I expect it will be only a matter of time before a new notice goes up outside their dirty great house in Orchard Road. Everyone will hope it is a "For Sale" sign, but they will be disappointed, for it will read: "Britalian Spoken Here."

And so to Woburn, on a blistering Sunday. The motor-way is performing its function perfectly, distilling three lanes. into one mid-way between the first and second exits. The remaining lane has the surface. of a hunar farm track, and so the safari's progress is slow. But no matter, by the time we get to Woburn, the highest expec-tations are fulfilled. Monkeys jump onto the windscreen like tiny mechanics to wrench the wipers from their sockets; hippos loll like logs in the studge; giraffes stilt their way across open ground and great cats lounge in the shade of the

Hilaire Belioc comes to mind and I wind the windows shut toa roar of abuse. Over in the ! distance, a gigantic metal device al the Kaindow Kide is whizzing its yelling customers: high above the tree tops. It is a: German-made contraption Hitler's Revenge - but that doesnot stop the kids wanting a go. Tragedy strikes, for at the entrance stile is a board with a horizontal red line some five feet above ground level. Those who have not reached this point of growth are disbarred. My two eldest stand en pointe and crane their necks - it is a poignant sight – but they are well short of the mark. The world of adult pleasure is a mercilessly exclu-

Fortunately there is a thing nearby called the Sky Ride, which does not discriminate. The five of us pile into a cable car no bigger than a small loo, and in an instant we are gliding noiselessly over lettuce green grounds. This is better by far than a plane, and I dare hope it will fend off all those demands for air travel.

Suddenly a frightful scene comes into view 50 feet below; a female bison standing astride a dead focus. And this in the rural heart of blameless Bedfordshire. "Poor little basin", says the eldest child, and a-terrible gloom falls on the

Bountiful berries take the biscuit

summer for strawbernes? After the Californian, Israeh and Spanish imports what a glorious

thing is an English strawberry from Kent. Better still, but of course I am hopelessly biased, were the six scarlet berries that ripened in the shade of my window box geraniums. This prized but insignificant contribution to the country's bumper strawberry crop, and

strawberries this summer.

Raspberries are just beginning to come onto the market in particularly fine fettle, and the two fruits have an easy affinity.

Has there ever been a better THE TIMES COOK

the bounty of larger private strawberry patches than mine, and keep them cool for as short will not stop us spending around £44 million on English a time as possible before eating. Fresh raspberry and strawberry sauces - just the sieved

Shona Crawford Poole Neither berry benefits from being refrigerated. Chilling certainly does not improve flavour and seems to lead to a faster deterioration of texture. So choose the freshest possible strawberries and raspberries

> and slightly sweetened puree of ripe fruit stretched if you like with fresh orange juice - can be an even more enjoyable accompaniment to whole berries than a predictable dollop of Rather than dress the fruit up

in delectable but time-consuming tarts and puddings, why not serve it as it is with a fresh tasting fruit sauce and homemade biscuits, langues de chat or miniature palmiers?

Langues de chat or cat's tongue biscuits are easy to make from a basic mixture that can also be used for cigarette biscuits, or hiscuit bowls to fill with fruit or an ice. Langues de chat Makes about 75

110 g (4 oz) salted butter 200 g (7 oz) icing sugar, sifted

1/2 teaspoon vanilla extract 5 whites of large eggs 140 g (5 oz) plain flour, sifted 2 tablespoons melted butter (optional, see method)

Cream the butter in a bowl, add the icing sugar and continue bearing until the mixture is pale and fluffy. Add the vanilla and then the egg whites, one at a time, beating well between each addition. The mixture is certain to curdle but this does not matter. Add the flour and stir it lightly into the

If particularly thin biscuits are wanted, to make cigarettes or tulips, add the cooled, melted butter at this stage.

Pipe short lengths or spoon balls of the mixture on to baking sheets which have been liberally buttered and lightly floured. Space the biscuits well apart, and if moulded shapes are wanted, spread the mixture roughly with a knife and bake no more than four at a time. Bake the biscuits in a

hot oreheated preheated hot oven (220°C/425°F, gas mark 7) for eight to 10 minutes, or until they are pale golden in the centre and a little darker at the edges. Transfer the biscuits immediately on to a wire rack

To make cigarettes from round biscuits, wrap them while still hot and pliable round the handle of a wooden spoon, and leave them to cool and set into long cylinders.

To make tulips or bowls from round biscuits, shape them, again while still hot, over small ramekins or glasses. All these biscuits will keep

well in airtight containers. Miniature palmiers are another classic, crunchy com-panion to summer's soft fruits and ices. I would never make full puff pastry just to turn it into palmiers, or even rough puff for that matter, but it is a good way of using offcuts. Puff pastry offcuts are an exception to my rule of not freezing bits

and pieces which may come in

handy. Few ever do. Cheese palmiers to serve with drinks can be made exactly the same way by substituting a little grated Parmesan and cayenne pepper for the sugar.

Makes about 40 225 g (8 oz) puff pastry officuts, rough puff, or frozen puff pastry, thawed 85 g (3 oz) caster sugar I egg yolk

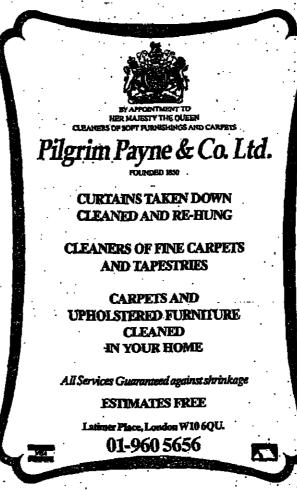

Sprinkle a worktop lightly into 7mm (4 inch) slices and set with sugar and roll out the them well apart on a greased pastry to a long strip. Sprinkle it with sugar and trim the dough to a long, narrow rectangle about 5mm/less that 1/4 inch

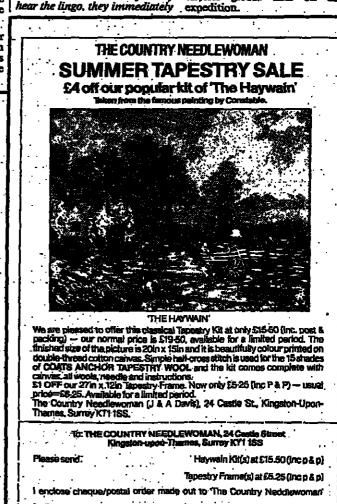

Fold the long sides of the rectangle into the centre. Brush the centre of the double strip of pastry with egg yolk mixed with a tablespoon of water, than fold the dough once more length-wise. Press the resulting long strip lightly with a rolling pin then chill the dough for about 30 minutes.

Cut the strip of folded dough

them well apart on a greased and floured baking sheet. The cut side, showing the folds should be uppermost. Chill the shaped dough for another 30 minutes before baking it in a preheated moderately hot oven, (200°C/400°F, gas mark 6) for eight to 10 minutes or until golden brown. Transfer the baked biscuits quickly to a wire cooling tray.

Perfectionists who like their palmiers equally browned on both sides can turn the biscuits after six or seven minutes in the

process that the second Premier Duke, Marquess and Earl of Jeland. When I rang the Marquess nat Maxwell's Oxfordshire home, Headington Hill Hall, a servant guffawed, "You must mean Mau-sice." Minutes later, "Maurice" adowned tools to tell me he had simply answered an ad in the local riaper. He had to get a job, he said, when his own gardening business, collapsed after one of his biggest customers went bankrupt. Another -in no danger of bankruptcy - was the Sultan of Oman, who drafted in othe 36-year-old marquess to combat Dutch Elm disease on his Wargrave estate. Despite being nouveau riche Maxwell is not looking for anything exotic. No ha-has - they, I suspect, are confined to the boardroom of Reed International.

Hours after the rescue of Alhaji Dikko, the George Hotel in Bridport chalked up the day's anniversaries above the menu: "Independence Day in Malawi, Boxing Day in Nigeria." The wag was hotel barman Timothy Hinlow Quirk.

No love lost

The chilly relations between Neil Kinnock and his party's inter-national secretary, Jennifer Little, have reached a new low. Her staff, I am told, subjected two of Kinnock's prominent lackies, PPS Derek Foster and Labour's overseas development spokesman, Stuart Holland, to the humiliation of being locked out of the recent Socialist International conference in Sheffield by failing to provide the correct passes. Foster and Holland were left raging in frustration in the bar manna to most, but Foster is

Coming unstuck

Ned Sherrin was right. Weeks ago be said in this column that his Raiepayers' Iolanthe would cause trouble, and it has. This GLC poster advertising the production - an allegory of the GLC's battle with the government, about to open at the Queen Elizabeth Hall – has been banned by British Rail from its stations on the grounds that it is political. Livingstone and cronies

say it is harmless and amusing and liken the ban to a decision by the officious Pooh-Bah in the Mikado. While BR bans, the poster has been accepted by London Transport zow under direct government scontrol: The paradox would have appealed to G & S.

The rehabilitation at 94 Vyacheskav Molotov, Stalin's foreign minister, after 20 years as a Mon-person has set the world's commentators speculating. Jacques Cellard of Le Monde has come up with the best explanation: Cher-nenko is grooming his successor.

Curtain up

Are the Russians turning soft? Three nore running dogs of the capitalist British media are to be allowed to set up office in Moscow - including, for the first time, a full-time BBC television team. It will be led by Tim Sebastian, who proved such a fearless reporter from Warsaw in the heady days of Solidarity that he was later refused a visa to cover the Pope's tour of Poland. Negotiations were not so tortuous for the others the National Front-bashing Martin Walker, The Guardian's first man in Moscow since Malcolm Muggeridge in the 1930s, and Patrick Cockburn of the Financial Times, whose office fias been closed since the expulsion fast year of Tony Robinson. Absurdly, the only "serious" British paper unrepresented in Moscow is the communist Morning Star, which apparently cannot find a staffman willing to endure life in the socialist paradise. Its last, Terry Bushell, left in disgust with firm anti-Soviet

The case for the prosecutor

by Walter Merricks

2,000-strong legal team of public prosecutors. Since the Philips Royal Commission on Criminal Procedure country's prosecuting solicitors can claim a level of professional country's prosecuting solicators can claim a level of professional competence and skill which justifies wider recognition. As for their impartiality, their restrained yet consistent campaign for indepen-dence from their client/employers (the police) gives the lie to suggestions that they are mere police landors. the interesting but essentially sec-ondary issue of whether the service should be organized nationally or locally. That matter has now been effectively decided: the prosecutors will be civil servants, answerable only to the Attorney-General.

The question now is how to build a service which will command the lapdogs.

in two years' time a new public service will be with us - a near

the public debate has centred round

a service which will command the confidence of the public and of the rest of the legal system. Since there will be no local accountability, it is doubly important that the individ-

tradition of impartiality, efficiency and robust independence be fostered

on a brand new service - particu-

larly in the unpromising atmosphere of the civil service bureaucracy?

There are already nearly 800

prosecuting solicitors working for the police in all but 10 of the police force areas in England and Wales. So

there is a corps of lawyers in post who would make up nearly half the new service. It is fashionable in some legal circles to deride both the

ability and the independence of

Ten or 15 years ago the criticisms

were perhaps warranted but today, with only few exceptions, the

This year the world population will increase by 80 million. In the eyes of

the industrial countries of the

"North", this does not amount to a

crisis. Their own populations are growing by less than half a percentage point a year. For the world as a whole, population growth

is slowing down. It would seem only

a matter of time before the poor countries of the "South" adjust to the same stable balance of birth and

The darkest projections of population explosion and inevitable

starvation are not proving correct. It

is possible to envisage the world population stabilizing at about seven

billion - against the present four and

a half billion - within tolerably

optimistic forecasts of the world's

But, in the meantime, large parts

of the world are suffering from a real

crisis. Recent rates of population

growth are without precedent; even if they are slowing down, they are still piling larger and larger absolute numbers of extra people into areas

and economies which cannot cope.

In the poorest 30-odd countries of

the world, excluding India and

China, population growth is, anyway, still rising.

today's teeming populations in a low

standard of living and it delays the rise to the kind of living standards

that have traditionally triggered a

So the World Bank, in a hefty new

report*, has channelled a formidable

amount of research into the

expression of its view that rapid

population growth is a danger. It wants to see a more rapid decline in

the high fertility rates of too much of

the "demographic gap" - when mortality has fallen sharply, but the

birth rate is falling only slowly. In Kenya and Libya, for example,

population is growing by more than

4 per cent a year.
But although death rates are still

falling in all but the richest

countries, they will no longer have a dramatic effect on population

growth. It is the birth rate that is

critical, and for a very simple reason. Medical advance tends first

to raise expectancy by saving babies' lives, then by helping the elderly to extend their lifespan from 60 to 70-

pius. The babies will grow up to have children; the elderly, with exceptions, will not.

these individuals.

ever, in a greatly expanded organiza-tion dominated by a civil service ethos, of a slump in internal morale and of the emergence of a bureau-cratic, inward-looking group of insensitive prosecutors — consisting mainly of those lawyers who cannot make a living elsewhere. First, there must be interchangeability between service in the prosecution and the remainder of prosecution and the remainder of legal practice. Not only should prosecutors be free to move for spells into private practice, academic teaching or other sectors of public service (such as court administration both in magistrates) and (commonty) but the cheek

and Crown courts), but this should he actively encouraged. Since this goes against the grain of normal civil service promotion patterns it will need to be specifically planned for

from the start.

Varied experience, particularly including defence practice, should

be regarded as part of a normal career progression. Long municirupted service as a prosecutor should These matters would need careful and early negotiation with the unions and with the Civil Service Commission.

Secondly, the career prospects and possibilities of job satisfaction must be such that able lawyers are attracted to stay and to join. There must be sensitivity to local conditions. The qualities required in Gateshead may not be those needed in Gloucester, while lawyers who work well in Barnsley may not appreciate a sudden posting to Battersea. But just as important, the salary structure must give prosecutors earnings and status compar-able to those of their professional colleagues - and to those of the police, whose cooperation and respect is essential.

In terms of job content there is one important matter yet to be decided. How far will the new prosecutors (who will be drawn from both barristers and solicitors) be able to act as advocates in the Crown court? There can be little doubt that opening up access to this court would enhance the attractions of the prosecution service. At present, when a big interesting case appears, or when the defendant elects for jury trial, the prosecuting solicitor loses control of the case to a

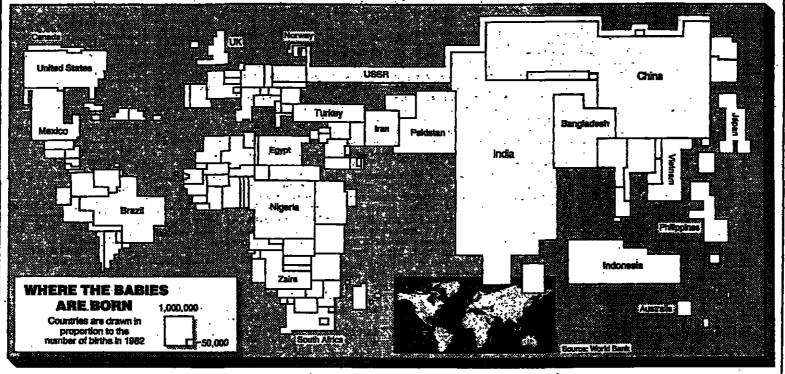

This divided responsibility for case preparation produces appalling results. Of those who plead not guilty at Crown courts, juries convict 50 per cent and acquit 25 per cent. The other 25 per cent have their cases thrown out by the judge -usually on the grounds of inadas public money is concerned, paying individual brief fees to barristers would in many cases be more costly than using salaried ádvocates.

The new service ought to be able to deploy its advocates to best advantage, instructing private bar-risters only where it is economically ionally sensible to do so. Claims from the Bar that such a move would result in decimation of their profession should be treated with the usual caution.

Ministers will soon be asked to approve plans for legislation. They will need sensitivity, imagination and clear-headedness if the new service is to be seen publicly as a successful innovation - not just a new army of petty bureaucrats.

© Those Newspapers Limited, 1964 The author, a writer on legal affairs, was a member of the Royal Commission on

Worlds apart: Sarah Hogg on where the graph is still going up

Counting the cost of the baby boom

babies) and China (21 million). The sheer weight of existing population is responsible for this; both countries, but particularly China, have abnormally low birth rates for their levels of economic development. (Skirting delicately round open criticism of member governments, the World Bank makes plain its disapproval of coercive methods; it notes, for example that China's onechild family policy had the disturbing by-product of an increase in the infanticide of girl babies.)

Since the world's poorest countries are concentrated in sub-Saharan Africa and the Indian subcontinent, it is not surprising that they have the highest birth rates: each woman has five to eight children, and life expectancy is still low. In eastern Asia and Latin America families are smaller (three to five children), incomes higher and life expectancy about 60 years.

All over the world; says the World Bank with proper humanity, people have babies to love and cherish. But in poor countries, the crude benefits of child-rearing very obviously outweigh the costs. Children do not spend years in school; at a very early age they can be expected to work. Bangladeshi children work several hours a day before they are 10; by comparison, one recent survey found that American teenagers spent only one hour a day doing

housework Children are an insurance against destination in old age: even where their parents could afford to put money aside, savings institutions be non-existent or insecure. Land, the safest investment, may need more children to provide a labour force. Against these benefits, birth control has a measurable financial cost; as well, perhaps as a social one.

The largest numbers of births points out, may be reinforced by each year are in India (24 million social custom. In Europe at a similar stage of development, people mar-ried much later than in today's

developing countries. At the time of the 1871 census, for example, one third of English women aged 25 to 29 were unmarried, and half of all Irish women. The average Bangia-deshi girl today is married at the age The World Bank takes pains to explain, a paradox: to each father it may seem sensible to have more

children to enclose and work the land but, if every family in a village tries to do the same, they will all be fighting for the same piece of earth. Its report makes plain the huge demands population growth makes on natural resources in many parts of the world. Food production may be in surplus in some countries, but in painful deficit in others. Forests, which help to control floods in areas like northern India are destroyed for firewood; an estimated 1.2 billion people in the world need to cut wood for their daily energy needs faster than natural growth replaces

worldwide is turning an extra 78,000 square miles of land a year into desert - an area the size of Senegal. Sheer population density is a problem in some parts of the world. Roughly 1,700 people live in every square mile of Bangladesh, nearly three times as many as in Britain. By the middle of the next century, even if Bangladesh's birth rate declines in line with likely economic develop-ment, there will be 10 times as many people on every square mile of land as there are in Britain today.

This population growth is pouring into the developing world's huge new urban "agglomerations" - a suitably unartractive word for these vast, unplanned cities. In 1950, World Development Report 1984, London was the world's second published by Oxford University largest city, after New York and its Press. vast, unplanned cities. In 1950,

suburbs; by the year 2000, it will not even be in the top 25. Mexico City and São Paulo will probably top the list, which will be dominated by

Of course all these are pressures that stimulate human ingenuity into devising new kinds of energy, agriculture or designs for living. The World Bank report does not fall into the fallacy of defeatism; it merely points out, very clearly, the drag on economic development caused by too-rapid population growth. At the family level, it points to studies which show that large, poor families have worse health and fewer countries where they are not actually short of food

The best answer is further rapid speeding up the change.

For there is no single point on the income scale at which breeding goes out of fashion. (In nineteenth century Britain, for example, it seems to have occurred curiously late. Today fertility is unusually high, in relation to income, in Mexico, Venezuela and Algeria.) A decline in infant mortality tends to reduce the birth rate; but the big change occurs when it becomes more worthwhile investing in the long-drawn-out process of educating a few children, rather than in breeding a lot for fieldwork.

Much of the report, naturally, is devoted to direct measures like family planning programmes. In some countries, better provision of contraceptives alone has had dramatic effect: use tripled in Mexico between 1974 and 1979, and births fell by 30 per cent. The same is dly true of Indonesia.

But in many countries, families still want four or more children, and it will take big economic and social changes to alter this. Social security systems, providing certainty in old age, are slow in developing. Perhaps the most significant gains have been made by improving women's edu-cation and social rights. With bberation, it seems, those who bear the burden of the population boom take its control into their own hands

have such a mentality. I think that

Asia and Latin America.

economic development to the point at which a population decline comes about automatically. But as rapid population growth itself makes this more difficult, much of the World Bank report is devoted to ideas for

ownership. So how can governments help?

> he was elected to protect.
>
> Indeed, I still cannot entirely convince myself that we were wrong

> Hovering in the background is a pervasive premise that public sector industries are stolid failures while private sector companies are dynamic and thrusting, and that the

is that if it is intended to be taken seriously we should expect to find that it is the worst failures of the public sector which are first in line for the shock therapy of privatiza-tion. Instead, as Enterprise Oil demonstrates, it is precisely the most profitable and fastest growing which are on the transfer list

survival of this argument represents the triumph of doctrine over empirical data. The stock market today is dominated by a trend to concentration of ownership in the hands of financial institutions, and this trend has been spectacularly swift in asserting itself over the shares of privatized concerns.
Within four months of flotation, the number of shareholders in Amersham fell from 65,000 to 8,600, with 92 institutions holding two thirds of the share capital. In the case of Enterprise Oil. ownership is already tightly concentrated in the hands of Livingston:

particular investment.

Two-thirds of incomes in Britain are clustered about the mean and high rates of income tax, but those below official poverty levels, though not subject to income tax, still pay excise duty. Is it not desirable that those in the nationalized and self-styled "caring professions" should know the extent of the fiscal

burden they place on the poor?
Governments have traditionally been wary of earmarking taxes for specific purposes and hostile to telling taxpayers what their taxes are spent on in a way they can understand. One can see why. It would be explosive. Of course it would be difficult to do. The cost of some items is clusive: what is the cost to the taxpayer of the Central Electricity Generating Board being forced to buy expensive British coal? Should that be included within the itemized amount the taxpayer is compelled to give each week to the miners? Writing off the colossal debts of nationalized industries would have to be added to the annual subsidies. But for which year, month and week?

There are no fewer problems in attributing items to individual taxpayers. It may be that these difficulties are insurmountable and the state and all its computers cannot do what even a barrow-boy will reluctantly do: give the customer an itemised receipt. If so, that

is bad, morally bad.

Even if a receipt cannot be devised to satisfy public accountants, one could be devised to help the citizen and satisfy the educationist, for the exercise is essentially educational: the voting taxpayer simply needs the best information possible to help him make an informed decision, it need not be definitive. Indeed it would be more educational if it generated a debate about the figures and items.

No government is likely to do its moral and educational duty and initiate a scheme of receipts. Nor can academic educationists and economists be expected to do anything so useful and collaborative. Again, it is not quite what the leather-jacketed radicals have in mind when they agitate for "political education"; it smacks too much of blazers. Perhaps this far down the column, where the editor has ceased to read, I could recommend it as a competition for readers of The

Privatization on parade

educational opportunities, even in In the early 1970s, when I was active the few institutions who are left countries where they are not actually in local government, our members' holding on to the issue they lounge was swept by gossip of a municipal scandal. The leading light of a neighbouring authority had privatized a surplus fire station by selling it to himself, thus anticipating the present government's liber-ation of state assets from the dead hand of public ownership. Later that year the same council identified the site as critical to a future development and bought it back from its enterprising councillor, who made a profit of £50,000 out of his brief

> Today, now that the higher logic of market forces has been revealed to us by the new establishment, we can more fully appreciate the magnitude of our colleague's achievement. We can see that he was playing a vital role in enabling a free market to operate to the benefit of the residents of his authority, and his profit represented his reward for assessing how this market would move and his return on the risk he undertook. Labouring as we did under the vulgar and primitive prejudices of the time, we were inclined to be censorious and even accused him of ripping off the public

or that the present government is not similarly failing to protect public assets. The debacle of the Enterprise Oil flotation should prompt reflec-tion on the wisdom of its infatuation with selling off anything that is not actually bolted to the floor.

best way to invigorate the nationalized industries is by applying the magic elixir of private share capital The problem with this argument

Another argument for privatization of public assets is that it widens the ownership of wealth by returning them "to the real public". The very underwrote.

Then there is the claim that privatization improves the efficiency of the economy by widening competition. But compention can be widened only by creating another competing enterprise. The sale of British Telecom will effectively convert a public monopoly accountable to elected ministers into a private monopoly accountable to non-elected fund managers. The sale of Enterprise Oil could still fall to RTZ, an existing North Sea oil operator, now the shares are on the open market.

At bottom we are left with the rather grubby justification that the Government is going in for privatizing because it wants the money. Yet even on this score the record does not emerge in credit from close examination as with the exception of its issue of Britoil and Enterprise stock, which the Government incomprehensibly launched in a period of falling oil shares, the Treasury has persistently undervalued the shares it was floating.

The converse of the Government's poor deal is that some purchasers have done very nicely in the process. On the first day after Amersham's flotation, £15m of its shares changed hands and the initial buyers cashed in at a 30 per cent

There are solid reasons why many of these assets were in the public sector in the first place. With some, it was their strategic position in the economy—such as the state holdings in the oil industry, which is of such critical significance to our energy requirement, balance of payments and tax revenue. It is bewildering that the government of Britain, alone among oil producing states. should be content to let all of these

be settled by the separate priorities of private ownership.

With others it is the external impact of their activities on the rest of industry in such matters as muchaeing policy of particular purchasing policy — of particular pertinence to British Airways, which will shortly renew much of its fleet and could close the remainder of the British civil acrospace industry if it does not buy British. With most of them there is also the obligation to social policy, neatly underlined by the recent publication of the licence for British Telecom which will allow the new private company to close at its discretion up to 5,000 rural

lephone booths.

Perhaps we should be grateful that things are not worse. As yet, Mrs Thatcher appears to have over-looked the example of the first Queen Elizabeth who pioneered privatization by hiving off the Navy through the issue of warrants to

New words for old: Philip Howard

Miss Lilian Bell was published in 1902. Its principal characters are rich Americans and titled Parisians, and the action takes place largely in Paris. Expatriates, whether used to refer to Europeans living in African countries, bureaucrats at Brussels, or Chinese abroad, has a whiff of snootiness in English.

It would be interesting to know whether the equivalent word has similarly faint derogatory conno-tations in countries such as Greece, Turkey, and Ireland, where there is a long tradition of expatriates supporting the economy by sending money home to their families. Modern Greek uses the medieval Latin root for the verb, Ekpatrizo, but its novel called The Expatriates by native word, apodemos, for the

adjective and noun. To my half-Greek, and Ancient Greek at that, ears, apodemos seems to have the melancholy of nostalgia rather than the snootiness of stay-at-homes. The Turkish phrase for an exile is Baska ilkede yerlesmek its connotations,

anyone's presence in a country by reference to his absence from another. At best it suggests a compound mentality in those thus

has for supposing that his (her?) Britons living abroad were patriots once, but are no longer. Perhaps

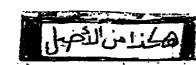

whether derogatory or complimen-tary, are Greek to me.

Even when printed right it seems to my friend tendentious to express

It is true that many Britons living abroad in tax havens and sunny castles in Spain, where servants and swimming pools come cheap, do anyway, just in case.

their behaviour and attitudes have contributed to the pejoration of 'expatriate". But "expatriot" adds another dimension to the insult. It would be difficult to know what grounds the writer who spells the word that way

they have ceased to be parriots because they wished to know the European election results. The older term for expatriates was exiles. But it is interesting to note that the first person cited for the use of "expatriate" in the OED was Shelley, one of that generation of romantic expatriates: "An Irishman has been torn from his wife and family, because he was expatriate." passed the jocular, and surely friendly, diminutive "expat" in a review by our thriller critic the other week. I guess that it escaped those formidable eyes. But duck, Philip,

A third-rate provincial poli-tician, a self-publicizing revolutionary whose organization of the "greatest demonstration by the working class in the history of Merseyside" produced a turnout less than half a Saturday gate at Anfield: Mr Derek Hatton has made the govern-ment give way. Mr Hatton and his colleagues threatened a course of disruptive action. Their reward is the abrogation of financial targets which four hundred other local authorities have been told are immutable. What matters is not so much the size of Mr Jenkins's concession a complicated mix of straight

and environmental conditions are no worse than on Messey side: why should there not be a special package for them put together at the cost of umpteen. civil service hours and lengthy ministerial deputations? ... : Some of the new money offered to Liverpool comes from

the Urban Programme. As such it represents no extra Exchequer commitment, rather an expedient transfer from the blighted areas of Wirral and Salford in order to buy off Militant, Therein lies the strongest criticism of Mr Jenkin's concession. Since the riots of 1981 Liverpool has been the centre piece of the government's resuscitated urban intitiative. In 1984-85 as in previous years there was a strong case for special help for Liverpool under the rubric devises by Mr Heseltine, emphasizing housing and environmental refurbishment and revitalizing projects such as the garden festival. What Mr Jenkin has done is divert extra money not as part of

kered refusal of the Cabour majority to enter any kind of building partnership with private capital. The city's economic, social and cultural problems are equally impressive within the framework of the government's existing programmes for Merseyside there would have been grounds for debating the scale and effectiveness of public assistance. Instead the govern-ment has allowed the Labour majority to dictate its version of Liverpool's needs, defined entirely by an inflated public payroll. Liverpool's spending target for 1984-85 – no more nor less unjust than those given to any other council - was intended to reduce that public employment. By exempting Liverpool from the consequences of spending above its target the govern-ment subverts its whole local government financial policy of the past four years; it issues an open invitation to councils to some capital programme but won't wear them.

FUGITIVE OFFENDERS

The revelation that the Costa del Sol has become a sanctuary for fugitives from English criminal justice ought to embarrass Britain no less than it has embarrassed Spain. For a hundred years there was an extradition treaty between the two countries. Spain terminated it in 1978 because from the Spanish point of view it had failed to achieve its purpose. In the century of the treaty's existence Spain had made 44 applications for extradition, of which only one was granted; in the same period 14 men were returned from Spain to Britain. The treaty had become a one way street.

Spanish exasperation with our extradition laws is doubtless shared by a number of other countries. Britain has acquired a reputation for being a country from which is is extremely difficult to extract a fugitive criminal.

All the extradition treaties to which the United Kingdom is a prosecutions on flimsy grounds, party provide that fugitives should only be surrendered for acts which are not only offences against the law of the requesting pounded by the restrictions State but which would also constitute offences against the law of the requested State if committed within British jurisdiction. This is a traditional and comply with the prima facie case universally accepted principle of requirement. Strict English rules extradition. Over and above this, of evidence apply, with only nowever. Britain imposes another, more controversial, con-dition on extradition from this difficulties for some States with other, more controversial; concountry: an English magistrate an inquisitorial system of crimimust be satisfied that there is a sufficient prima facie case (Spain seems to be a case in against the accused person such

this prima facie case requirement which is the most common single cause of failure of extradition'requisitions in this coun-

Many of the States with which we have extradition arrangements, notably those which follow the civil law, as distinct from the common law tradition, impose no such additional requirement on extradition from their territory. Provided that the offence comes within the terms of the relevant treaty, and provided that the documents are in order, they are in principle willing to teturn the fugitive offender to the requesting State without satisfying themselves as to the strength of the case against him. Our radically different approach is apt to cause offence these States on the ground that as they trust us not to bring we ought to trust them to do the same.

The problem is further comimposed by our extradition legislation on the kind of evidence which can be adduced before the magistrate in order to fimited statutory modifications. nal procedure. For some States point) it is simply not feasible for as would justify his being the evidence to be provided in a

committed to trial in England if form which would be likely to be his acts had been done here. It is acceptable to an English court. For other States (Nigeria is one current example) it may be that the form of the judicially procedure does not allow for reciprocal trust.

> Since Spain terminated the Anglo-Spanish treaty in 1978, there have been some important English judicial decisions which have significantly relaxed our law and practice in relation to extradition from this country, and which ought to encourage Spain to reconsider its position. There are limits, however, to what the courts can do within the framework of the existing on. Must needs to D done. An interdepartmental working party under the auspices of the Home Office suggested in 1982 (by a majority) that the prima facie case requirements altogether. That would be going too far, Britain, unlike many civil law countries, does not bar extradition of its own nationals to a foreign State. Given that extradition is only available for acts which would constitute an offence under English law if committed here, it would seem wrong in principle to send our own citizens away to trial abroad. on evidence which would be insufficient to justify their committal to trial in this country. The right solution is to retain the prima facie case requirement but to relax the rules of evidence in extradition cases requiring a relatively simple amendment of the Extradition Acts and of the treaties made under them.

PUSILLANIMITY ON POSTAL BALLOTS

The Government has now welcomed and in many respects moved several steps in the it is potentially the most solid direction required by its critics and useful of the changes. It will in the Lords who forced through make it much harder for union an amendment on postal ballots for trade union elections. It has the grounds that they are not moved its own amendments feasible, and it will create a basis with the intention of creating a from which a firm legislatory presumption in the Bill that requirement for postal ballots ballots will be postal; unless the union is satisfied that workplace ballots will, in the circumstances of that particular union, meet the Bill's requirements of secrecy, convenience of voting and freedom from intimidation. .

To the Government, the question of workplace versus postal ballots has throughout been secondary to its concern to put an end to branch ballots. which can be conducted by a show of hands and held at inconvenient hours, without proper notification. The Secretary of State for Employment. Mr Tom King, has been prepared to encourage postal ballots but not to outlaw secret workplace ballots held under the safeguards provided by the Bill. For one thing, he takes the view that turnout is important and workplace ballots tend to produce a higher turnout than postal ballots. In contrast, its critics take the view that turnout should be secondary to freedom from interference.

One major obstacle in the Government's mind was the lack of the proper central records, which would be essential to a postal ballot. This objection the Government has now met in its latest amendments by laying a new statutory duty on all trade unions to compile and keep up to date a register of their members' names and addresses.

leaders to deny postal ballots on requirement for postal ballots could be brought in later if it becomes clear that the dual system still gives rise to malprac-

It is far from certain, however, that the other concessions will provide sufficient assurance against malpractice, though they should help. A union can still hold a workplace ballot if it "is satisfied that there are no reasonable grounds for believ-ing" that this would be contrary to the Act's basic purpose of seeing that elections reflect the genuine majority will of union genuine majority will of union members. This, however, still leaves a union as judge and jury in its own cause. The remedy provided against the union's judgment is the right of appeal against it to the High Court, which can order an election to be held again by postal ballot if it finds that a workplace ballot has fallen short of the Bill's requirement. There is further safeguard that a complaint can be made (without legal cost) to the Certification Officer, who can investigate and make a legal declaration that there has been a

court would have regard. It is plainly not the Government's idea that such appeals would usually be made by ordinary individuals or small groups for a postal ballot though this would be possible. It seems This is wholeheartedly to be to be envisaged rather that they

breach of the Act, to which the

would be used by candidates and their supporters who felt they had reason to believe that a workplace ballot would go against them through malpractice. The Government's hesitancy to go faster and farther in part reflects its softly-softly approach. It also seems to fear, rather

oddly, that as signatories to the ILO convention dedicated to free trade union association, it must do nothing that could possibly smack of interference with unions' rights to fix their own rules. Yet to give union rights primacy over members' rights is comparable to giving company rights primacy over shareholders' rights, and who would countenance that?

But the principal fear seems to be that the unions might ignore an absolute command to a postal ballot, and that (in the event of a complaint) the court would conclude that using the workplace method had produced exactly the same result, as would clearly have been produced by post - with the result that the law would be regarded as badly

This approach seems unduly timorous. Though there has to be allowance for workplace ballots where only these are feasible, the law would be better framed if it made postal ballots the statutory norm placing on unions the onus of showing why the other method was preferable in their circumstances, the court then finding for or against them. The concessions the Government has made are useful, but they could have gone further. Their full implications need the closest scrutiny in parliament

LETTERS TO THE EDITOR

Rome would seem to have no

quarrel with Dr Kfing, whose views

on these questions are very similar

Though in their various state-

ments criticizing On being a Christian the German bishops did

describe Kung's treatment of Mariology as inadequate, and though Cardinal Höffner did men-

ion the virgin birth in a letter to King, listing what he saw as the

major differences between "the faith

of the Church" and the views of

theologians, neither issue was specifically raised by the German hierarchy. — nor later by the Doctrinal Congregation when it withdrew Küng's licence to teach as a Roman Catholic theologian.

Sir, I was amuzed to read in your leading article dated July 5, headed

"Tomorrow's bishop", that on the testimony of his contemporaries Dr

lensley Henson was an excellent

was disliked by many parishes

not only for his ecclesiastical views

but also his brusque manner which

left people seething.
It was the Dean at that time, Dr

Alington, whom the people loved and respected. He was called upon

to pour oil on waters troubled by

Hensley Henson.
I lived in the diocese of Durham

Sir, The late Professor C. S. Lewis

made no claim to be a theologian,

but by any standard could play into

the ground a round dozen randomly selected from those who do.

He said of liberal theologians

They ask me to believe they can

read between the lines of the old

texts; the evidence is their obvious

inability to read (in any sense worth discussing) the lines themselves.

They claim to see fern-seed and

From Mrs Elsie Walker

The conflagration and the consecration in York Minster

Robert Runcie, repeated the words of the chief fire officer that "the

Ford was on our side as we battled with those flames" (report; July 10). I wonder whom He supported when the conflagration started.

Sir, In your second leader (July 5)

you quote from the formal protest of the Bishop of Oxford (Dr Charles

Gare) to the then Archbishop of Canterbury (Dr Davidson) on the

appointment of Dr H. Henson to the see of Hereford. It would have been fairer and

more helpful if you had also added that Dr Gore withdrew that protest

because - and only because - of a public exchange of letters between the Archbishop and Dr Henson, in

the course of which the Archbishop

I am perstanded that when you repeat the words of the Creed you do so ex animo and without any desire to change them.

To this Dr Henson replied "... of

course what you say is absolutely true. On the basis of that assurance

Dr Gore "joyfully" accepted the situation and withdrew the protest (Bell's Life of Davidson, Vol 2, pp

874 and 878). Had Dr Jenkins had the good

ense and homility to have given a

written public declaration in terms no less stark and unqualified, much of the present difficulty would have

been avoided. It is the unequivocal

public assurance of Dr Jenkins personally - not of the Archbishop

of York - that is called for, and

without that it is not surprising that

some of those present in York

Minster (and even more of those

outside it) may have found it

difficult to respond positively to the

question as to the acceptability of Dr

Sir, In commenting on the case of

the new Bishop of Durham you

write (July 5): "If Dr Jenkins stood

to Canterbury as Dr Hans Kung stands to Rome there would be more

reason to get in his way." But on the

two issues of the virgin birth and the interpretation of the resurrection

From Mr.O. W. H. Clark

A. WISEMAN, Witchwood.

From Mr Patrick Heron Sir, York Minster is England's Sir After the York Minster fire had Parthenon. Quite simply, it is the been successfully contained, the greatest, the most monumental yet Auchinshop of Canterbury, Dr. most delicate, masterpiece our Robert Runae, repeated the words forefathers have left us in the entire fand. Its magnificently intact sur-vival every conturies has itself symbolised farilized continuity for millions—quite spart from provid-ing us with a minicle of art and

The extreme urgency of its immediate shoring up, and total restoration, is something which demands in account of the control o demands an instant government decision - the decision to marshall all conceivable aid, financial and

physical, as from today.

The greatest Gothic building in Northern Europe, York Minster must be saved by the nation. Everyone should know at once of the total commitment. Yours etc.

PATRICK HERON Eagles Nest, Zennor, St Ives, Cornwall.

July 9.

From Mr Anthony J. Petitt Sir. I share the sadness which, I am sure, all your readers felt at the news of the severe damage by fire to York Minster. I also share the pleasure of learning that many priceless and irreplaceable objects were safely

But the news recalled to my mind the prophet Elijah calling down the "fire from heaven," which consumed the altar to the Lord which he had built in the presence of the prophets of Baal; and I wondered wryly if the fire in the Minster was also the almighty fire threatening to burn down a cathedral in which recently there had been consecrated a bishop of our Anglican Church, who publicly expressed disbelief in several tenets of the Christian faith shared by all confirmed members of the Church.

I am, Sir, yours sincerely, ANTHONY J. PETITIT, 8 Lullington Garth, Oaklands Road, Bromley, Kent.

From Miss Dorothy J. Russell. Sir, "Just lightning" says the Bishop

dismissively.
To those as old-fashioned as lightning is the wrath of God. Yours etc. DOROTHY J. RUSSELL.

3 Le Chateau, Chatsworth Road, Croydon, Surrey.

Sir, in their letter, "Gambling on cost of pit closures" (June 28) Dr Bryer and colleague argue persuas-

ively against applying market-forces criteria when closing "uneconomic"

coal mines. Whilst not agreeing with

that, I mainly take issue with them on their fashionable statement that

for making closure decisions, especially as it is virtually impos-

sible to reopen pits once they have

nonsense in mining engineering terms which is, I think, the sense intended. The young George Stephenson made his reputation as

an engineer by reopening the High-Pir at Killingworth when his pumps mustered the flooded shaft:

In the days when market forces

mainly operated (pre-NCB) old mines were reopened as and when the price of coal and demand came

Plainly this last bit is a piece of

... market prices are a poor guide

Economics of coal

From Mr V. Campbell

Precisely this happens now a worked in a coal mine previously bandoned in 1870, reopened in 1908 and eventually employing over 3,000 men until closed in the 1960s by Mr A. W. Benn.

In the Durham and Northumber-

nd coaifield lately the closure of coal mines is quite often followed by the opencast companies coming for coal. One of the wonders of the age in West Durham is to see the giant diggers clawing away at the under-ground galleries of coal mines long abandoned as "worked out". With the help of new technology that uneconomic coal of the 1920s is now winnable and economic in the

7 Bromley Close, High Shincliffe, June 29.

Gibraltar heritage From Brigadier J. R. E. Hamilton-Baillie (retd.)

Sir, This society has, for the past ten years, among other objectives, worked for the preservation of post-medieval artillery fortifications. At the start of that period the general opinion was that these always interesting and often very handsome structures would be better replaced by utilitarian modern buildings. Happily the tide of opinion is now turning and there is now much more support for the preservation and

conversion of forts This, of course, forms part of the general trend towards conservation and against new buildings unsympathetic with our heritage from the past, as discussed in your recent

in one place, however, for very understandable reasons, time has stood still. I speak of Gibraltar. It is clear that with an open frontier a multi-storey car park must be essential to prevent the narrow streets of the historic centre of the town being choked with traffic. A plan to provide one was made in 1965 at a time when admiration of

structures now so widely criticized was at its height. Faringdon, C This plan placed the park on and July 2.

Control of firearms From Mr Colin Greenwood

Sir, In your June 28 issue, Mr David Powis, Deputy Assistant Com-missioner, Metropolitan Police, called for stricter comrols on shotguns because, he claimed, they are used in two thirds of armed

The logic of his position is best demonstrated by his own comments just one day later when he claimed, in another newspaper, that British criminals are giving up the shotgun because it lacks the "macho" image. Strict controls on pistols have existed since 1920 yet pistols are used in robbery four times as frequently as the much vannied sawn-off shotgun which Mr Powis quotes. After 60 years of the most stringent controls possible the number of illegally held pistols is at least double the number legally held. From a total of 50,000 legally held pistols on the market police have

managed to confiscate 300,000 unlawfully held pistols since the end of the war!

The fact, supported by a mass of published evidence, is that Mr Powis's proposals would have no effect on the rate of armed crime. The rise in the use of firearms in London was halted and turned downwards for a three-year period from 1977. This was the result (to quote the then Commissioner) of 2 campaign against armed robbery and the criminals who commit it. That success was overshadowed by a doubling of the figure from 1980 to 1981, with the increase primarily in

the use of pistois and primarily

against: "soft" targets such as sub

post offices.
Research suggests a direct link between that increase and the complete loss of control by the Metropolitan Police in certain areas of London. Slowly, the police are regaining control and, though they are far from restoring the position,

their activities have produced reduction in armed robberies of 25

per cent for 1983. The use of firearms in robbery is a constant proportion of the total rebbery figure. The factors which influence this are, principally, police efficiency or the lack of it, and not the size of the forms which legitimate shooters must complete to obtain a licence. The Home Secretary recently said:

"The link between armed crime and the private possession of firearms is not as clear cut or simple as is sometimes imagined." Calls for stricter controls on shotguns by senior police officers are too frequently a simplistic attempt 1-conceal their own failings. Yours faithfully, COLIN GREENWOOD.

Broadstone Farm, Colden, Hebden Bridge, West Yorkshire.

Nuclear dumping in Irish Sea

From Mr John Carroll and others Sir, As your readers will be aware, we in Ireland have no nuclear power stations, no reprocessing facilities and hence do not generate nuclear waste. Despite this, our eastern scaboard is washed by the most radioactive sea in the world, auclear carriers ply the waters close to our shores, radioactive waste has been dumped a few hundred miles off our southern coast and the very presence of Windscale threatens thousands of our people and hundreds of square miles of our land in the event of an accident leading to a major release of radioactivity from the plant.

For more than 25 years, successive British governments have seen fit to allow what was admitted to be a controlled experiment in the Irish Sea by the discharge of levels of radioactive effluent from the Windscale pipeline which would have been outlawed in any other

country in the world. At long last, Britain has agreed to "close to zero as possible" by introducing the "best available technology", as required by the resolution accepted by delegates to the Paris Commission called for diocesan bishop.

During his bishopric in Durham

the implementation of the resolution to be treated with "urgency". To date, despite repeated attempts to glean some indication of the British government's intentions by way of parliamentary questions, letters and telexes by Greenpeace, the only response has been from British Nuclear Fuels Ltd who envisage a '10-year programme" of implemen-

This position, if supported by the British government, is simply unacceptable and the undersigned now call on the Department of the Environment to announce their intention of stopping the discharges in a period of time – at the most two years - which would indicate the sincerity of the British government's desire to redress the situation.

If such a statement is impossible, the reprocessing of spent Magnox fuel - the major source of radioac-tive effluents from Windscale should be suspended, pending the installation of technology which is capable of stopping completely the discharges.

THE TIMES

You can't argue with glass that talks

Some time ago two bright STC scientists came up with a rather novel idea.

ATT OF THE PARTY O

They were experimenting with threads of pure glass the thickness of human hair as a possible practical optical wave-guide with important potential in a new form of communication.

Optical fibre transmission had been born. Even in those early days, nobody could argue with its potential for having an almost unlimited capacity for high quality signals.

Over the years, we've remained in the forefront of the production and technical perfection of optical fibre in the UK.

After having developed the first practical transmission system between Hitchin and Stevenage we opened Europe's

first factory for optical fibre cable.

We have produced the world's first high-capacity

commercial singlemode optical system that operates between Luton and Milton Keynes.

And currently we're producing the world's first international underwater optical fibre cable system.

Key components in both these systems are high-powered

STC lasers for signal transmission.

All these things demonstrate the international scale of

All these things demonstrate the international scale of STC's transmission activity.

Thanks to inventions like talking glass, British communications has a future well worth speaking of.

If you would like to take a closer look at how STC is shaping the future, we'll be delighted to send you our colour brochure. Write to:

Peter Earl at Standard Telephones and Cables plc, STC House, 190 Strand, London WC2R 1DU.

Making sure the future has a future

THE ARTS

In Milan yesterday, Russia's most celebrated living film director, challenged the Soviet authorities. He talked to David Robinson, in an exclusive interview

Andrei Tarkovsky: Lammot gully

When Andrei Tarkovsky announced that he was to give a press conference in Milan yesterday, and that it would be introduced by the exiled Rostropovich, the French and Italian press prematurely - and as it proved correctly - leapt to the conclusion that he was to seek asylum in the West - most likely the United States. The thought had undoubtedly not been far from Tarkovsky's mind in the preceding days, but speaking to me in the small hours of yesterday morning he was still adamant that there was at this point no question of defection. He intended to present the Soviet authorities with an ultimatum rather than a fait accompli.

He explained that his intention was to challenge them to say whether they wanted him or not. "So far it has seemed as if they do not want me. So I am asking for an answer. I am not a political person. I conflict with the Soviet government. I am not guilty. If there is a disconnexion, it will be they who

Until now, Tarkovsky has be-aved with extraordinary tact towards his country. He has never made any public or international protest about the problems that his films have suffered before and after production. When last year he made his first film abroad, the Italian

The Royal Opera has just opened on its first visit to the United States. Paul Griffiths was in Los Angeles to see Turandot

In the city of cruelty

Turandot Dorothy Chandler Pavilion

Los Angeles is going to get more than its fair share of national anthems over the next few weeks, if all goes well. On Monday night it got two: ours to mark the entry of Her Royal Highness Princess Anne at the first appearance of the Royal Opera in the United States, and then theirs, which was how the first people to sing with the Covent Garden Orchestra on this occasion were the members of a packed audience in the Davis hugely amplifies the spacious sombreness of the Dorothy Chandler Pavilion. There was sombreness, too,

in the opera, but also a in a triumphant and very monstrous flash of spectacle variously triumphant, orchesthat vividly concludes a year of tral and choral performance. Sir striking additions, so that Colin has evidently looked into inevitably one recalls the cobait and nurtured all the delicacies brilliance of the nightingale at and exquisitenesses in the score: the start of the season. Royal there are silken sheens in the Opera's repertory: with strings, beautifully precise perrurandot, designed by Sally custom tintinabolations, lumiwooden pagoda sashed with red loveliness even in background silk, a city of masks and knives and implacable cruelty. As the producer, Andrei Serban, told comes from a full realization of John Higgins on Monday's page, his ancient China is a land of mystery, but it is mystery in sharp focus and edged with the comic and satiric. For once this is a Turandot that does not first time, produced all the forge the extravagant absurd-necessary volume and reined in

stage in flapping multi-coloured costumes. Their interruption of and her troupe in Ariadne Auf Naxos: the tragic machine is stopped in its tracks. However Mr Serban is prepared as well to twist the knife of parody from outside the opera. There are times, particularly in the second the glamorized Orient of The King and I: Altoum, a real "son of heaven" as Calif calls him, descends seated on a cloud-like tasselled cushion, and Sir Colin dangerously thin orchestral magnificence.
But there is only one element

wind lines. There is also slicing

The title role is not yet so completely achieved. Gwyneth Jones, singing the part for the tites of Gozzi, even if it finds her vibrato, but two things she them through Oriental theatre.

This year's musical anniversaries have fallen into Cheltenham's lap: Delius, Elgar, and Phillip, who commissioned the the Spa's own son, Gustav Holtz, all 50 years on, all very English and not one of them too uncomfortably modern. More of that later. It also happens to the audience who were able to be the fortieth birthday of both use the work, mantra-like, as a the festival and of John Tavener. On Thursday his rapt; those who followed "Ritual Procession" Towards through its naive progress the Son will be given its first waiting for event had to make performance on Sunday it was do with respect if not restlessthe premier of another Greek Orthodox-inspired work, Ikon

of Light.
St Symeon's epithanic experience of Devine Light as related in his tenth-century Discourses has inspired Mr Tavener to attempt yet another expression of the inexpressible. For not only does the central role of the Transfiguration in the mysti-cism of the Orthodox Church take the merely intellectual wind out of the sails of its theologians, but the central invocation to the Holy Spirit, which forms the central movement of Tavener's 40-minute work, lacks any of the neat verbal paradoxes and conceits of comparable litanic outpour-ings in the Western rite.

In other words, musical invention had precious little to hang on to: it must recreate side rather than through its subject it must hope for a response from both performers and audiences which is as committed and subjectively

BATTLE **OF ALGIERS** sympathetic as the composer's. The Tallis Scholars under Peter work, set it forth vividly and memorably, with all the austere harshness and flashes of jewelled colour it requires. Those in use the work, mantra-like, as a

The central invocation, chantd high and low by soloists above a sub-strata of sustained voices, is framed by a *Trisagion* ("Holy God, Holy and Strong, Holy Immortal, Have Mercy on Us"), articulated by sharp bursts of the word fos (light) built up and down as if by a dimmer switch in layers of consonante, shifting and in-radiating in vocalized chords as cogent an auralization of the presence of uncreated light as one could wish for. In between the vocal radiations come exhalations from a string trio, distanced behind the singers

and symbolizing the soul "yearning for God". Tewkesbury Abbey's acous-tics played their own vital part of course: no such help was forthcoming in the Pump Room on Monday morning for the vacuous Four Duos by Peter Dickinson, also receiving their first public performance. The fragments were written for amateurs and, even in the hands of professionals like Sarah Francis and Alexander Baillie, they sounded inesca-pably like it. Their borrowings from Ives (a 12-note row from his 1905 Three-Page Sonata) and from Dickinson himself (Juilliard Dances) doodle around in little contrapuntal exercises whose most notable

contrasts are between legato and staccato, and which serve no

clearly definable expressive

The "slightly sinister" third movement, the "something jazzy which never completely arrives of the last, epitomized the composer's apparent lack of courage in his own convictions, a quality which weakens, too, Herbert Howells's Sonata for Oboe and Piano (Francis and Dickinson), which was ex-humed earlier in the recital as one of the festival's proclaimed rediscoveries of landmarks in

Composed when Howells was: starting on his long pilgrimage of liturgical works, it evokes long hours in the organ loft, mind and finger wandering ruminatively, chancing on one or two green moments, then side-stepping once more into stumbling cadence and musical daydreams. Only in the scherzo with its volatile time signatures and pert repartee does the work truly engage. Howells, though, soon crept away, marking a safe 4/4 against the second 7/8 section and expressing an understandable understandable uncertainty about the work which has led to its 42 years' silence.

A livelier rediscovery was made on Sunday evening in the town hall by the Northern Wind Orchestra, an enterprising young professional band, just one year old and with assured style an a repertory ranging from Shostakovich to Sousa and Stockhausen. Donald Ezard conducted the first performance of Holst's Three Folk Tunes, a short and irresistible single movement, possibly from an incomplete military band suite. it was encored after being set off earlier by the First and Second Suites, and with properly sophisticated performances of Hammersmith and A Moorside

A SPECIAL REPORT

There is history in every inch of Bristol: now new merchant venturers in the high-tech and sunrise sector are putting down roots

Bristol, unlike its elegand-acighbour, Bath, it essen-tially a workaday cart. It cannot by conventional, standards be described, as beautiful. It is seared by some hideous post-war building sind by large patches of decay. Yet it has some unique and fascinghas some unique and fascingting features and a wide range of splendid architecture. It is a city from whose busiling streets your can lift your eyes to the hills.

In its heyday Bristol, grew rich on rum, slaves, sugar and tobacco. by the mid-eighteenth century it had become the century it had become the moving in not least for lack of Oxbridge's justified or not, it is leading English city and port outside London. Its importance declined with the shift to the Midlands and the North of Britain's main industrial activity. Today, with a population of just under 400,000, Bristol is England's seventh largest city. And its troubled port at the mouth of the Avon is well down the national table.

For much of the post-war period Bristol suffered from a loss of confidence and direction. Symptoms of the mood were harbarated alternates and strains of the century. None the surface of the harbarated plants of the century. None the surface companies and financial and the motorway Still the Confeders with the city's collaborate with the city's well qualified to collaborate with the city's with being the first university in the work with being the first university in the world to take solid-state with the city's with being the first university in the world to take solid-state with the city's well qualified to collaborate with the city's with being the first university in the world to take solid-state with the city's well qualified to collaborate with the collaborate with the colly's well qualified to take solid-state with the collaborate with the colly's well qualified to leading English city and port

Symptoms of the mood were haphazard planning and ugly reconstruction. That phase has passed. The design of many of the latest buildings is exemplary, and dilapidated areas are being carefully restored. There largely concealed by the dominant of the century. None the manufacturing sector has markedly declined to be manufacturing. It is a decline largely concealed by the dominant of the century. None the manufacturing sector has markedly declined to the manufacturing sector has markedly declined to the manufacturing sector has markedly declined to the manufacturing sector has been accounted to the manufacturing sector has been accounted to the manufacturing sector has markedly declined to the manufacturing sector has a sector h is a new buoyancy in the air.

Out of recession.

The economic recession has not by-passed Bristol, though the city has fared less badly than most. After all, it never was an industrial city of the Birmingham, Manchester or Sheffield kind, and its structural changes, though pronounced, have been less harmful than theirs. Bristol's unemployment quota in May was 10.6 per ceat, compared with 12.7 per cent nationally. Its relative prosperity is, however, unequally all — Hewlett-Packard. But the May was 10.6 per ceat, compared with 12.7 per cent nationally. Its relative prosperity is, however, unequally spread – deprived parts of south Bristol have up to 30 per cent unemployment, with little pros-

rovd

moving in, not least for lack of

ning of the century. None the less the manufacturing sector has markedly declined - less than 40 per cent of the working population is employed in manufacturing. It is a decline largely controlled by the dominance of British Aerospace and Rolls-Royce, which together employ some 21,000 people, and by the relocation of many incurrence. insurance companies from London to Bristol. This is now Britain's largest insurance centre outside the capital.

Great hopes are pinned on the sunrise sector of high-tech companies which have been attracted to Bristol, including such famous names as Marconi growing concentration of such companies on the city's north-ern flank and the jobs it has pect of improvement. There, created has only partly compen-old industries have died and sated for the loss of employ-new ones are deterred from ment in the traditional indus-

excellent anniversities in the area, Bristol and Bath, and of the highly regarded Bristol Polytechine.

Whether Bristol's whispered boast of being the third-ranking university. in Britain after Outsidge is justified or not it is contained a mail condition.

The high-tech firms in-surance companies and financial institutions were attracted to Bristol because it is also a pleasant place in which to live and to work. The old docks in the city centre, from which John Cabox set sail to North America, have been transformed into an agreeable place for leisure, sports and cultural activities. On Bristol's historic waterfront the city's seventh World Wine Fair opens tomorrow, Windsurfing and sailing take place in the harbour where once the ships of the world lay at anchor. Each year power boat racing is held there - on a course considered to be the most spectacular and one of the most dangerous in the world.

A project of national importance is the Bristol Maritime Heritage Centre which is being developed around the SS Great Britain, the first iron-hulled ocean liner, now undergoing restoration. Bristol city council allocated £500,000 towards the capital cost of the centre, put at £1.2 million, and the English

down roots in the Bristol area - It points out ge the city council says some 200 of them are now here - but the arrival of Hewlett- Packard is regarded as the biggest capture of them all.

Since last January the American computer giant has been represented by a computer peripherals factory in Yate, to the north east of the city, conveniently close to the M4 and M5 motorways. It employs about 200 people. But this is only the beginning. The company will soon be

moving to new premises at the Wallscourt farm site at Stoke Gifford on Bristol's northern fringe. And it is also bringing research and development ac-tivities to its Bristol base.

It has acquired 55 acres and has an option on a further 110 acres. The company plans to employ some 450 people there by 1986, and envisages continued expansion after that.

Hewlett-Packard chose Bristol as a base after considering several continental sites, notably Stuttgart in West Germany. Bristol won the race on many counts - Hewlett-Packard was impressed by the skills of its people as well as by the keenness of the local authority to have the company here. Communications and the proximity of excellent universities

were other factors. Hewlett-Packard and its subsidiaries are engaged worldwide in the design, building, market-ing and servicing of a wide range of precision electronic instruments and systems for measurement, computation and analysis. Its products, now numbering more than 5.000 are used in engineering, science, business, education and medi-

cine. About half of its sales are

States. The Bristol plant manufacturing products for the

It points out gently that the development programme ben-esits the host countries as well as Hewlett-Packard. The programme offers opportunities to local technical graduates, enabling them to pursue careers close to home.

However, some sources are rather sceptical about the city's sunrise sector. They say that although there is a strong presence of small software flouses, the rest tend to be regional or national sales outlets for larger British or international firms rather than the home-grown computer based companies that have sprouted at the other end of the M4

Importance of defence contracts

The city's manufacturing fortunes, they argue, are tied in with, for example, Rolls-Royce's international deals on its aero engines. The region is indeed dependent to a considerable extent on defence contracts.

Marconi Avionics, another of the prestige high-tech companies in the Bristol area, employs about 250 people in a modern factory at Nailsea, a rapidly growing town in Bristol's commuter belt.

It is an innovator in the design, development and supply of airborne electronics systems for both military and civil aircraft. It produces extremely compact power conversion units for avionics and general military applications, for instarice for the Tornado, the F16 and the Spearfish torpedo.

Marconi Avionics has used Continued on next page

KINGS HOUSE

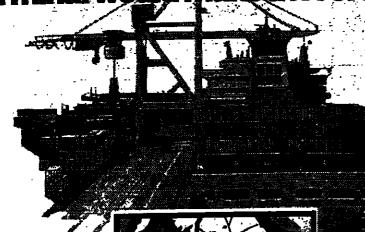

An impressive, new, high quality office development providing some 70,000 sq. ft. of air-conditioned accommodation, arranged in three inter-linking blocks capable of flexible sub-division together with private parking. Situated close to Broadmead, M32 and Temple Meads station. Ready for occupation. All enquiries to the sole agents.

64 Queen's Road, Bristol BS8 IRH Tel: (0272) 290731

Yourservice and our container terminal would make a lot of sense!

Take a closer look at our advantages. It's no surprise that for the 1980s, Royal Portbury Dock's SWIFT terminal makes Bristol the ideal UK call for container, ro-ro or unit load services.

Our West Coast location makes a lot of sense in terms of steaming times and relative sea milieages. And our superb Motorway connections with vital UK markets - and competitive distances - minimise inland hauls in an era of very expensive trucking.

We're not so choked with traffic that your service cannot have the best of ours. In fact, we can probably offer a customised operation to suit your particular needs. Operated by the Port of Bristol Authority, the SWIFT terminal - now

with two cranes for faster throughput - can put time back on your side. And for the 1980s, that's a pretty important benefit.

the spicing of the worldwide recession through which the airline industry has been pass-Bristol airport is no ing. Bristol arrivort is no exception. If reported a £500,000 profit for the financial year. 1983-84 and the number of passengers using its facilities in that period was the 23.9 per cent at 375,600.

Future business company

ecasis are bullish and, based on these, the corporation of Bristol, which owns and oper-ates the airport, has decided to proceed with a £1.3m development starting this autumn. The project includes the extension of the international departures lounge, the extension of the aircraft apron, and construction of a new fire station. The cost be funded wholly from

revenue surplus.

At the same time, the corporation is reviewing further development of the terminal building, and has planning permission for the construction of a cargo centre, with 45,000 square feet of offices and

South Wales, although it is in direct and continuing compe-During the 1983-84 financial ear, the airport handled 4.000 Cardiff tonnes of air freight - and made profit from that side of its from Bristol to the Balearies, the Canary Islands, Channel

The airport has resident freight agents, customs facili-ties, and a bonded warehouse. Its operators claim that its pricing system for freight is competitive with that at the London airports, and that the service is also "more friendly". There can obviously be no real comparison between services offered at Bristol and those at Heathrow, but the two airports are linked by the M4 motorway so that the speedy nterchange of goods is possible.

Most of Bristol's scheduled

network is to Amsterdam, Belfast, Brussels, Cork, Dublin, Guernsey, Jersey, Glasgow, the Isle of Man, Leeds/Bradford and Gatwick London. Airlines which operate to the airport on a regular scheduled basis are Dan-Air/Metropolitan, Aer Lingus, Euroflite and Jersey Two airlines, Euroflite and Jersey European have applications to the Civil Aviation Authority, in London, for licences to operate a service between Bristol and Paris Charles de Gaulle airport, and hope that flights will be started before the end of the year. Avon Aviation Services has a licence way of Bournemouth.
In addition to its scheduled thriving package tour business, drawing its customers not only from the Bristol communication,

> onger. There is duty free shopping, and passengers are offered modern catering facili-ties, and a bar open for 24 hours in the international departure

These facilities were cited by the airport manager. Mr Les Wilson, as a major reason for the economic success which the airport has been enjoying

recently. Tour operators, he claimed have now recognized Bristol as one of Britain's important departure points. Instrument landing systems were installed in the past financial year on two runways and Dan-Air increased the airport's status by introducing its new British Aerospace 146 80-seater airliner on its route to

Amsterdam, replacing turbo

prop BAE 748s and reducing flying time by 30 minutes.

This bustling scene today is a far cry from that in 1930 when the first Bristol airport was then Duke of Kent. This did duty until late 1955, when the present site at Lulsgate was bought from the Air Ministry for £55,000. Operations began

two years later. When it opened in 1930. Whitchurch was only the third municipal airport in Britain and in that first year there were 535 aircraft movements carrying 929 passengers. The first foreign flights began two years later 11 carrying as few as 11 passengers in all. Air freight was carried for the first time in 1936

and amounted to 500 kilos.

By 1939 traffic, had increased 4,000 aircraft movements and 5,000 passengers, but with the war airport was taken over by government. Restrictions on future expansion prompted the corporation's decision to switch to Luisgate. This, too, had been used by the Air Ministry during the war and had been disused for 10 years when it was bought by the city.

The new airport was opened 1957 by the late Princess Marina, Duchess of Kent, in the years since then the airport committee has carried out a gramme, including lengthening the runway and extending the terminal facilities.

By 1963, the airport was being used by 105,000 passen-gers. Ten years later, the figure had increased to 183,000 and by the last financial year, as stated carlier, to 375,000 with the chairman of the airport committee, councillor Jack Bosdet, forecasting that during the current 1984-85 financial year the airport will handle more than 400,000 passengers for the first time in its 54 years of

Fit and hungry for business

Bristol rate-payers of the burden of the city's loss-making docks

has also presented the port with a golden opportunity for a fresh start and a real chance to begin to pay its way.
In a deal with the Trustee

Savings Bank, Bristol City Council has taken out a £55m loan to write off the capital debt of the municipally owned Port of Bristol. The loan is to be repaid by selling off long leases on some of the city's commercial and industrial property.

The port was losing more than £11m a year and losses this year would probably have increased without the initiative, Gordon Scott Morris, a former maritime adviser to the Government of Malta, was appointed general manager in muary and he has very firm ideas about the way forward - a port leaner and fitter and

hungry for business. Much of Bristol's prosperity was founded on its west facing port. For centuries trading ships plied the tidal Avon to load and unload their cargoes at the old inner city docks until the age of larger vessels led to the construction more than 100 years ago of new docks six miles downstream at the mouth of the

The Royal Portbury dock, opened six years ago on the opposite bank, was designed to cater for larger vessels, up to 70,000 deadweight tons, offering modern, capital intensive cargo handling systems, while the older Avonmouth docks continued to handle more conventional vessels and car-

Nobody would deny that the last few years have been difficult ones at the Port of Bristol Losses and debt charges, political rows and the burden on the rates were a millstone, but now there is determination to strike out towards profitability.

Mr Scott Morris said: "The spirit is coming back, but it is a tough business world out there. The ship owner wants a good, efficient and trouble-free service and a fast turnround and that is

He believes the port will break even within two or three

years and in the meantime a world-wide advertising cam-paign is to start to attract new business. The port employs about

1,600 people, 600 of them registered dock workers. The down by about 900 over the last two and a half years and that process is continuing through voluntary redundancy. There is already a solid

foundation of regular business at the port, particularly Royal Portbury dock where Abbey Hill, the Yeovil-based distribution company, and Nissan have their own vehicle handling Abbey Hill are largely involved in handling imports for General Motors and Fiat while

Nissan deal with their own vehicles. Last year the port handled about 94,000 vehicles and Mr Scott Morris said: "We shall be one of the biggest car importing ports in Britain." Last year a total of 3.3 million tonnes of cargo was handled at the Port of Bristol. about 1.3 million tonnes of its bulk fluids, including oil products. Most of the major oil companies operate storage and distribution depots at Avon-mouth. A self-contained oil

berths for ocean-going tankers. Molasses form a sizable roportion of the port's bulk liquids trade and United Molasses has an advanced handling and blending installation at Royal Portbury. Bristol is also a major UK

port for handling animal feed-ing stuffs and forest products, such as timber, woodpulp, plywood and blockboard, which are important products.

Chasing revenue

Bristol was singled out in a British Road Federation report as having the best road connexions of any UK port. Cargo leaving the dock can be on the M5 motorway within minutes, linking directly with London, South Wales and the Midlands and north. It also boasts of the extensive space available for commercial and industrial development on nearby land

Mr Scott Morris said: "I want to turn the Port of Bristol into a commercial enterprise, to get our people chasing revenue and new cargoes and making the customer right." He said contacts were aiready being made with cruise line

operators to persuade them to put Bristol on the list of ports visited by passenger liners.

He added: "I like the idea of a challenge. My aim is to break even in two or three years

Craig Seton

Fighting back: Gordon Scott Morris, general manager of Bristol docks, hopes to lift them out of the red.

premium draw for insurance

The growth of the insurance and financial sectors in Bristol during the past decade has brought great benefits to the city. It has created employment, basin provides five deep-water placed valuable contracts with the construction industry and given a powerful boost to Bristol's morale.

Large buildings in central Bristol bear some of the most famous names in the business among them Phoenix, Sun Life, London Life, Clerical, Medical and General, Guardian Royal Exchange and Commercial Union. Bristol has also seen the development of a financial services industry which includes unit trust and investment advisory companies, banking, building societies and account-

Vacant offices

insurance companies moved the bulk of their activities from London was because of cheaper office space. They chose Bristol, sometimes in strong competition with other contenders, because it is a pleasant city with good amenities and excellent communications.

A senior manager of one company said its move to Bristol was the best thing that had ever happened. However there are signs that the post 1980-revival in office development in the centre of the city are coming to an end - only two new starts were made in 1983.

This is chiefly because of the increasing level of vacant office

space created not only by new development but also by an increase of second hand floor space coming onto the market. In the vanguard of the insurance sector's move to Bristol was Phoeaix, which now employs 1,200 people in the city. The first phase of the move took place 12 years ago, and the second and much larger phase in 1982. Phoenix looked at a

number of alternative locations, among them Peterborough and Cambridge, but was finally drawn to Bristol. Phoenix retains its executive head office in London as well as its marine and aviation in surance, re-insurance and investment denartments, but its main administrative office is in Bristol. It has established roots

in Bristol in other ways too - it owns Gloucester County cricket ground which is situated in the While the withdrawal of life assurance premium relief is a setback for the industry, Phoenix, which has concentrated on pensions and protection basi-ness, should be less affected

than many other companies. Along with others, Phoenix reported no significant improve-ment last year in its overall nonlife underwriting result. None the less its pre-tax profit of higher than in the previous year, because of a larger investment income and profits from the life business. Total dividends for the

Sun Life, which began to relocate to Bristol at about the

biggest employer in the insurance sector – with a staff of 1,400. Originally, Sun Life had chosen Croydon as a tentative main base, but this was rejected because of the high cost of housing and higher rents for office space.

The company made a better deal in Bristol. It has forged close links with the area and sponsors a wide range of West Country events, including the last night of the Bristol proms at the Colston Hall. It also promotes a highly successful brass band.

Praise for schools

The company passed another milestone in terms of new business last year. Total new premium income amounted to a massive £214m, almost double that of 1982. Substantial new business has been secured in single premium bonds, protec-tion, school fees, self-administered pension plans for execu-tives and the self-employed and business in connexion with group pension

London Life is the latest of the big insurance companies to complete its relocation to Bristol. Its three-phased move £23,7m in 1983 was 35 per cent was completed last year, ending a period in which its labour force was split over a number of locations. The company praises year were increased by 13 per cent over those for 1982. good bousing. It impressed by the encouragement of. the

to want us here", said an executive.

A newcomer to the financial sector is Welbeck Finance which has become the leader in the retail credit industry in the four years since its formation. Two months ago it completed the relocation of its head office and the consumer credit operations from two centres in Tannton and Watford to a new office in Bristol.

The company considered other possible bases, including Swindou and Basingstoke, but concluded that Bristol had the edge on these and other contenders. Welbeck, which is officially recognized by the Department of Trade and Industry as carrying on a banking business, employs 400 people in Bristol, 250 of whom

were recruited locally.

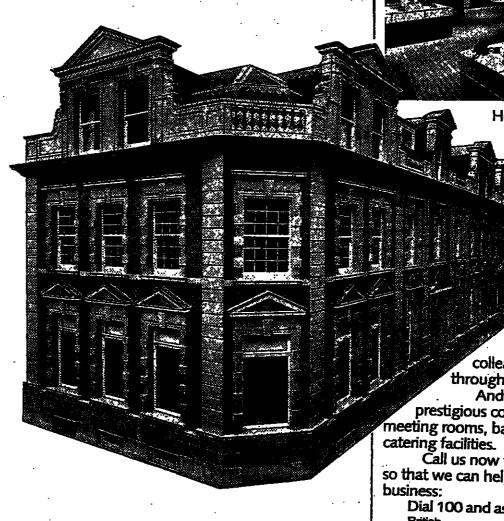

The credit card business operated by Welbeck has its origins in the Debenhams group. By 1980 sales on Debenhams credit schemes had increased to £94m. Welbeck was formed to take over these activities and to provide similar services to other retailers. It now services 40 retail groups and trade associations, and last year its pre-tax profits more than doubled to £1.7m.

It is considering expanding its operations to West Germany and the Netherlands. By attracting insurance companies and financial institutions Bristol has shown an awareness of where continuing growth can be expected.

THE MINERS ON STRIKE HAVE BEEN MISLED...

ABOUT THE FUTURE OF THE INDUSTRY.

We are now starting the 18th week of a strike that everybody knows is damaging our industry.

in lines

A line
he leader
instrume
formation

I

We'd all like the strike to end. So why then is it continuing?

The simple reason is that the men who are striking are doing so because they have been led to believe that the future of their industry is at stake.

But this is not true. It cannot be true.

Coal is potentially a cheaper energy source than oil or gas. And, unlike oil and gas, it will still be around a hundred years from now.

To take advantage of this massive national asset, Britain needs a successful, prostable, and growing coal industry.

Sales of coal have been declining for many years.

But we believe in two to three years time, we can do something that hasn't happened for many years. And that is to get coal sales going up – instead of down.

It must start with reducing the average price of our coal. So that it's cheap enough to sell against the competition. To do so, we must mine more coal from low-cost mines, and less from high-cost mines.

We must stop spending hundreds of millions of pounds a year supporting mines without a future, and put that money instead into our mines that have a future.

We also need to have good men working in our best pits.

This is why it is necessary to close the worst, where we are paying around £90 a tonne to mine coal which we could have difficulty in selling at half that price.

To all the men working in those pits, we promise: If you want to stay in the industry, you will be sure of a job. In most cases, this will be in easy travelling distance – but if you have to move, we will pay the costs involved.

The newer mines will give a better working environment. A better chance to use skills and talents to earn more. It will also give security – because our mines have long projected lives.

That's what we are offering to men who want to stay in the industry.

To men who want to go, the Government is offering even more generous voluntary redundancy than last year.

Remember, over the past three years, not a single miner who has

wanted to stay in the industry has been made to leave.

That is why there is no reason to fear the future.

The Government is providing us with £2 million a day to invest in our industry. No other country in Western Europe is investing so heavily in the future of coal.

We all have every reason to believe in the future of our industry.

However, there is one big BUT.

If we want to sell more coal, we will need many new buyers in British industry and overseas.

But they won't switch to our coal – however good the price – unless they can be sure they can rely on our deliveries.

This strike – not the Coal Board – could butcher the industry.

That's why it is so important that this strike ends soon.

It was called by the miners' leaders. It now needs to be called off by the miners themselves.

FINANCE AND INDUSTRY

Executive Editor Kenneth Fleet

Markets poised to call the Government's bluff

Mrs Thatcher's confident assertion that the monetary situation is "satisfactory" cut little ice in the Commons and even less in the City. The money figures for June are much higher than the markets expected most significantly, sterling M3 rose 2 per cent, seasonally-adjusted during the five weeks to June 20, and together with the Bank of England's annual recalculation of the way it does its ... seasonal adjustments, this boosted the annual rate of growth during the first four months of the target period to 1474 per

n,

Monetary growth is likely to slow during the second half of the financial year, but it is a long way back to the Chancellor's target range of 6-10 per cent.
Admittedly "little Mo", on which the
Chancellor is naturally placing considerable emphasis nowadays, is still growing at an annual 61/4 per cent, slap in the middle of its target range. But the widest measure of private-sector liquidity - PSL2 - has grown at an annual 20 1/4 per cent since the start of the target in mid-February, even though the change in the seasonal adjustment has tended to damp down the growth rate of this aggregate.

This should, in a sense, help to simplify life for the Government. While monetary growth was arguably within target, it was painful to have to raise interest rates merely to support sterling an admission of monetary dependence on developments in the United States which governments of Mrs Thatcher's independent stamp find : particularly hard:

But the June figures plainly show troubles too. They have been extraordinarily erratic from month to month, but everything seems to have gone wrong together in the lastest batch. The public sector borrowing requirment was high, and not matched by sales of government debt to the non-bank private sector, providing an expansionary impulse of £400m. Sterling lending was also high unexpectedly so - giving a boost of £1.5 billion. This was £200m higher than the average for the past six months, when it was expected to be much lower. There was a £490m rise in holdings of commercial and local authority bills, and sterling bank advances rose by more than £1 billion. Persnal borrowing was strong, again, but there was new growth in borrowing by manufacturing industry.

And that touches the Government on a raw nerve. Although company liquidity is much stronger, industry still needs to borrow to finance the investment boom economic growth this year depend. Higher interest rates, it is generally feared, will damp down that recovery, already battered by industrial trouble.

But - as in 1981 - the combination of domestic and international monetary pressures give the authorities no choice. The difference between now and 1981 is that the Government appears to be dragging its feet, leaving it to well past the last sensible moment to respond to market pressures for higher rates. It may be overreacting to experience in 1981, when two bold steps - each raising rates by two percentage points - were criticized as over-reaction. But under-reaction has its dangers too.

As has so often happened recently in the United States, bad money figures paradoxically pushed up sterling yesterday; but the respite was short-lived. The markets beliseved the authorities would have to raise interest again, If the merchants now

decide that the Government is trying to bluff things out, they may quickly decide to call that bluff. Again.

Goodison outflanks SE rebels

Sir Nicholas Goodison, the chairman of the Stock Exchange, appears to have won an historic victory by emerging from yesterday's meeting of the Stock Exchange Council with unanimous agreement in favour of a competing market-maker dealing system when the market is reformed next year. Unanimity automatically implies the complaisance of the three so-called "rebels" with were elected to the Council last month, yet the decison equally implies the formal acceptance of the principle of dual capacity, the very point which the rebels were pledged to

In the same breath, the Council has nailed its colours to the mast of a unified market instead of the various two-tier options which were being canvassed. This may console many of the small and medium-sized stockbroking firms who feared that they would be permanently relegated to the oblivion of a second-class status if the market were split into large-volume stocks and "others". At the rate, the rebels can claim that they have taken the establishment away from the impenettable pages of the notorious Stock Exchange discussion paper. Last night's announcement makes it clear that the system which is now being remommend differs materially" from the alternatives described in that document.

Final judgment will have to wait the publication of the full details of the proposed system next week. But it is clearly to be built on the spine of the existing jobbing arrangements: anyone bold or confident enough to take the jobbers on will be free to set up his or her

The objection remains that such a system will favour the big firms, those who can use their financial muscle to shred margins by trading in bulk. The smaller fry may be driven to deal in the less frequently traded shares, when they would be even more vulnerable to the threat of a large line of stock dumped on them which might take a painfully long time to disperse. The pressure of time appears to have pinioned the rebels'

Pilkington looks fragile;

Mr Antony Pilkington, chairman, of the eponymous company and the fifth generation of Pilkingtons to run the show. sounds like an irritated man plagued by a

poor share rating.
Yesterday in London, he extolled the virtues of the revamped glassmaking group. Britain was now back in the black, after three-and-a-half loss-making years, which have piled up enough tax losses to make domestic profits tax-free. The cost of redundancies £50m during the 1980s produced an annual cost saving of £60m. The controversial 30 per cent stake in the US group, Libbey-Owens-Ford was now worth \$40m over book value, Annual

licensing income of £25m was here to stay. That sounds fine. Meanwhile in the City, Pilkington's shares are underperforming alarmingly. Yesterday, they tumbled 15p to 233p. Since June 13, when the final figures were announced, the shares have fallen by a quarter, four times faster than the market.

RTZ coasts to 29.9% stake in Enterprise for 1p premium

By Jonathan Davis, Financial Correspondent

Rio Tinto-Zine succeeded original 185p a share offer price with almost embarrassing ease yesterday in picking up the share which RTZ was prepared extra 32 million shares in to pay for its additional Enterprise Oil needed to raise its stake in the newly-privatized North Sea oil company to its institutional investors to its target level of 29.9 per cent.

hood of any change in the Opec marker price of \$29 a barrel, disclosures and protecting Lloyd's names from abuses. disclosures and One document relates to the though the Nigerian delegation auditing of syndicates, the other to the introduction of a is continuing to press for "special case" status to be standard underwriting agency allowed to increase production of their high-quality crude to earn more foreign currency. agreement. Comments have to be in by the end of September and mid-October respectively. Opec still feels that Britain

The auditing document for-malizes and extends the February bylaw enforcing auditing and filing of all syndicate accounts at Lloyd's. Auditors will have to have relevant insurance experience before being approved by the Council of Lloyd's. Those now on the Lloyd's panel will not necess-arily be chosen.

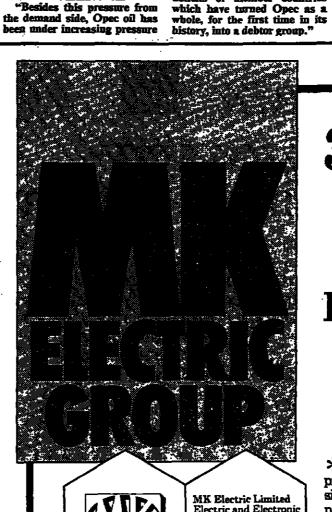

Syndicate auditors will not be allowed to act for the managing agent of the syndicate as well. The same restriction applies if a partner or employee of the auditor is a name on the syndicate, or where the auditor seeps the accounting records of

No more than 15 per cent of an audit firm's fees may come from syndicates managed by the same agent. More than 15 per cent can come from Lloyd's business. Managing agents, rather than names, will be responsible for appointing and removing auditors

The standard agency agreement governing the legal relationship between names and their agent, to be enforced from January 1, 1986, would outlaw clauses exempting agents from liability for negligence and permitting them to vary the terms of the agreement.

No decision was taken on a mandatory deficit clause making allowance for losses incurred when calculating profit commission. Such a clause would operate vertically and cover only a single syndicate's results over successive years. It will not pool the results of syndicates in which the name or agent has an interest.

Names will not be allowed to terminate summarily the agent's authority to underwrite, although agents will still decide who is in the syndicate.

United Leasing's residual problem

in the state of the assets

Over half the gross profit for the year of £10.2m has not yet been earned and is merely the company's estimate of what it will eventually trake when assets which it leases are finally.

It is a strange arrangement but one which United Leasing master is the norm for the computer leasing industry. What is worrying is that the profit figure which is taken is arbitrary and is based only on figure expectations and reserved. future expectations and past experience.

The company's record in assessing residual values has so far proved good but this is no guarantee that the accuracy will guarantee maintained. Further, the figures are now getting bigger and by United Leasing's own admission the shape of the business is changing, with more attention being paid to restricted any other matter. peripheral equipment rather than mainframe processors.

Add to this the uncertainties over the future of the leasing odustry in the wake of the changes to the corporation tax regime and it all makes for

United Leasing argues that the end-of capital allowances will work in its favour by reducing the dominance of hanks on the leasing moustry, leaving the independent com-panies free to exploit new madesing opportunities. It is fair comment, but one which the commy is obliged to make. Whether the intyroduction of a full accounting standard dealing with the treatment of leases will persuade United Leasing to resort to a more traditional method of accounting for its residual values remains to be

It might achieve a better understanding of its policies it it took account of the assets

through a reduction in the depreciation than an addition to income.

The shares fell 3p to 284p yesterday and anyone considering investment should take a very close look at the accounting policies before making a a new avenue of growth decision.

F H Lloyd

Mr Lewis Robertson, chairman of F H Lloyd, had just the hint of a gleam in his eyes yesterday as he unvailed the company's annual results. Not without two years in the helm he has at last put this particular ship back on an even keel. . He had inherited a company

dogged by bitter boardroom struggles and operating in industries plagued by chronic overcapacity. However, a shake up of the management has brought a keen edge of efficiency to the group's operations and closures of the largest steel foundry and two steel mills have mitigated the problems of overcapacity sub-

The closure of the steel foundry in the Midlands under the Lazards reorganization scheme for British foundries has proved to be quite a coup. When Mr Robertson took over as chairman F H Lloyd did not want to take part in the scheme

It was an essential move since if the foundry had continued to make huge losses the group's financial position would have been able to close the foundry, which it had to do anyway, yet at a profit to the company since the deal has been heavily subsidized.

With these deals safely out of the way it leaves the group a slimmer more efficient organization. However, the markets in which it operates still remains depressed and further improvement will come at the

The year ended 31st March 1984 was an excellent period for United Leasing plc. The current financial year is already showing many healthy signs. The Group is in the process of reducing its exclusive dependence upon IBM. This is being achieved by exploring new but related business areas. In the United States this includes financing for high technology products, including satellite transpondens, in the United Kingdom it includes diversifying into micro-computer and micro-software distribution, software finding and lease tracking for one off financial states there is the business effect of the 1984 builted is expected to reduce the floridation of the main clearing banks and to one the market is independent. subsidiaries of the main clearing banks and to open the market of independent leasing companies having the creative talent to develop new market opportunities.

We welcome this challenge The current year already looks very promising for the Group. We are certain that our year-end results will again be exciting.

# British market'

Imports, which accounted for footwear, a £4m sales sector 56 per cent of the British which had seemed another footwear market in 1983, are strength for British makers, saw footwear market in 1983, are strength for British makers, saw running at around 67 per cent import penetration up 15 per penetration following an unprecedented flood of foreign products into Britain in the first four months of this year.

in the second half of any year but import penetration in 1984 as a whole now looks likely to be considerably more than 60

per cent.
When the imports surge first showed up earlier this year, there were trade reports suggesting that the flood would subside because there had been a peaking in the imports. But there is still no sign of the

Some of the key sources abroad of footwear imports showed big surges in the four months to the end of April. according to the latest returns of the British Footwear Manufacturers' Federation.

Volume imports from Spain. fourth largest national supplier to Britain, jumped 81 per cent. Hongkong, second largest source, was up 25 per cent in volume, Taiwan, the third largest source, sent in 40 per cent rise, all the increases being comparisons with last year.

A worrying trend is that the biggest import increases are in leather footwear, up 22 per cent compared with a 12 per cent rise in non-leather. Leather footwear, the higher priced sector, has been the stronghold

The specialist niche of safety

The imports surge follows considerable shrinkage in the British footwear manufacturing industry. A big shake-out during 1982 saw around 20 companies close down. Now employment in British factories is creeping back up again - there was a workforce rise of 1,000 to 54,800 in April - and while short-time working has plunged, 40 per cent, the numbers on overtime have risen by almost as much.

This partly reflects export performance by the British makers which increased volume exports in the first four months of this year by 6 per cent overall. Exports to EEC countries rose 14 per cent.

But while there are trade reports of a continuing strong trend in retail sales of footwear - there was a 16 per cent April deliveries are static and orders sluggish, according to the federation. Before any British makers move in any numbers to replace lost capacity, clearer indications of a sustained improvement in sales will be

Price rises are feeding the retail pipeline through reflecting sharp increases in ray hide costs, which rose 40 per cent over five months to April. But hide prices now appear to

### **Economic Commentary by Tim Congdon**

# Shoe imports taking 60% of Why the dollar should be controlled rather than dictate interest rates

Contrary to popular mythology, monetary policy was not invented in the 1970s. Interest rates and the money supply have been part of economic reality for many continues and reality for many centuries, and

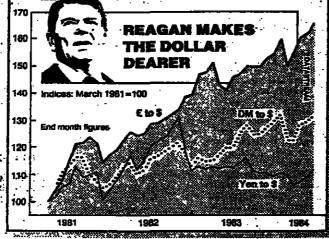

their behaviour.
What was new in the 1970s was the monetry policy become focused expressly on the rate of money supply growth. This was in sharp contrast to previous practice. Traditionally, the Treasury and the Bank of England had based decisions. particularly, decisions about interest rates, on movements in the exchange rate or, "more generally, on "external factors":

The shift towards money supply targets implied a quite different approach. Although the growth of the money supply can be much affected in a medium-sized, open economy such as Britain's by external enfluences, it is usually domi-nated by domestic financial trends, notably the strength of the private sector demand for credit and the size of the budget

deficit. In other words, the adoption of money supply tagets signalled a greater appreciation of the role "domestic factors" should play in interest rate decisions.

Sometimes domestic and external factors point the same way. Rapid growth of bank lending and an excessive budget deficit logically should accompanied not only by above-target money supply growth, but also by exchange rate depreciation, In such circumstances, the message for interest rates is unambiguous.

But there are occasions when domestic and external factors give conflicting signals. The domestic economy may be depressed, with low or moderate money supply growth and sterling is being battered on the foreign exchanges. The Treasury and the Bank of England are forced to exercise discretion. Either domestic factors have priority and interest rates are lowered, or external factors take precedence and interest rates are increased.

domestic and external factors is an ancient theme in British monetary policy. Until the abandonment of fixed exchange rates in 1972, external factors were paramount, but much criticism was levelled over a long period against the authorities because fo the resulting interference

### Tension between domestic and external factors

domestic economic perform-

Kaldor's advocacy of devaluation in 1964 ("to free the economy from the balance-ofpayments constraint") was in the same tradition as Keynes's repudiation of the gold standard in 1925 (to prevent an overvalued currency causing unem-ployment). Indeed, the folly of basing interest rate decisions on exchange rate fluctuations was a constant in Keynes's career. In a speech to the House of Lords in 1943, acting in effect as a govenment spokesman, he

To quote: "We are determined that, in future, the external value of sterling shall

made his views plain.

policies, and not the other way round. Secondly, we intend to keep control of our domestic rate of interest.

"Thirdly, while we intend to prevent inflaion at home, we will not accept deflation at the dictare of influences from outside. In other words, we abjure the instruments of bank rate and credit contraction operating through the increase in unemployment as a means of forcing our domestic ecasionry into line with external factors.

"I hope your Lordships will trust me not to have turned my back on all I have fought for. To establish these three principles which I have just stated has been my main task for the last

In fact, Keynes's words were forgotten for a generation. When Britain was on a fixed exchangrate between 1945, and 1972, the internal value of sterling conformed to the external Only since 1972 has follow Keynes's prescription.

For the last 12 years it has had the option to ignore the exchange rate and set interest rates according to the state of the domestic economy. This option became more transparent with the announcement conform to its internal value, as of money supply targets in debtor the world has ever seen? & Co.

1976. Ideally, indifference to exchange rate pressures is one of the rules of the money supply

Even the argument that sterling's fall threatens the Government's infaltion objectives is not really persuasive at present. The decline in the pound's exchange rate against the dollar has coincided with a sharp drop in commodity prices in dollar terms. According to the *Economist* index, the net effect over the month to July 3 was actually to reduce com-modity prices in sterling terms.

More fundamentally, the fall against the dollar is virtually certain to be reversed over the next two or three years. The dollar's strength is deviant and should not be allowed to disturb monetary policy in Britain or, indeed, the other industrial countries.

Some sceptics may say that economists have been forecast-ing the dollar's collapse for two years. They may claim that, as it has and happened yet, it will never happened. But the antics of

### Central banks should intervene

the American currency in recent months have been so eccentric that they are not just a mockery of economic theory. They have also become an affront ot

despite the US's widening trade and current account deficits. Does it really make sense that the more heavily and rapidly a nation incurs debt, the more popular its currency will be to speculators? Does anyone be-lieve that low inflation is the right reward for deliberate and excessive budget deficits, or that the present saix of American macroeconomic policies can be sustained indefinitely without the US becoming the biggest

It would be a mistake for central banks around the world to react to the latest rise in the dollar by putting up interest rates. In most countries apart from the US, domestic demand is increasing no more quickly than the underlying growth of productive capacity. There is no early danger of accelerating inflation. On the contrary, the

latest news on commodity prices suggests that the pros-pects are for further declines in In this situation, central banks - if they wish to resist the dollar's advance - should intervene on the foreign exchanges, not make credit more

expensive. Intervention can be justified on the argument that it is best to sell an asset (the dollar reserve) when it is dear as well as on wider macroeconomic criteria. Probably the best approach would be for the five leading central banks outside the US (the Bank of Japan, the Bundesbank, the Bank of England, the Banque de France and the Swiss National Bank) to coordinate their actions.

> Their combined foreign cur-rency reserves are about \$110 billion. They should announce 20 per cent of this amount into each others' currencies by reducing their dollar holdings by spot and forward sales on the foreign exchanges. Since every dollar sale would be matched by a purchase of another foreign currency, there would be no effect othe moneyt supplies of

> But the dollar would be unsettled by the need for the foreign exchanges to absorb over \$20 billion of selling. With appropriate supporting noises from the Federal Reserve, it might no longer be necessary for interest rate decisions both in Britain and elsewhere to be upset by an external factor of manifest and increasing perver-

the five economies.

# **ALLIED#LYONS** People in all continents eat, drink and enjoy our products.

# **AN EMINENT POSITION** *IN THE FOOD AND DRINK INDUSTRY*?

EXTRACTS FROM THE STATEMENT BY THE CHAIRMAN SIR DERRICK HOLDEN-BROWN. TO SHAREHOLDERS AT THE ANNUAL GENERAL MEETING ON 10TH JULY 1984.

We have budgeted for an increase in profit, for this year as a whole contributed by each of the three divisions. From where we are today I cannot see any reason whythat profit budget should be altered.

In the last three years we have seen our pre-tax profits grow from £112 million to £195 million and the amount attributable to ordinary shareholders has increased from £52 million to £122 million. The amount naid as dividend per ordinary share has risen from 5p to 6.81p and the cover for ordinary dividends has improvedfrom 24 to 28.

With the purchase of Lyons we set up the third division of the group. The Food Division is now well established as last year's results show, and is producing substantial profits of steadily improving quality. It has a sound basis from which to grow, and it is playing its full part as one of the three contributors to the group's future development and success.

We have pursued a policy of brick-by-brick acquisition within the fields with which we are familiar. All three divisions have made acquisitions, some at home some overseas and particularly in the United States. We shall continue with that strategy.

We have built up an eminent position in the food and drink industry through the great strength of our brands. a strength which is evident equally in all divisions.

# Cunningham set to join **Manchester City**

Manchester City have agreed a fee of £100,000 with Sheffield Wednesday for Tony Cunningham, the 26-year-old forward Wednesday signed from Barnsley early last season for £80,000.

City also hope to sign David Phillips, the Wales international full-back, from Plymouth Argyle

David Pleat, the Luton Town manager, hopes to complete a two-way deal this week which will take the full-back Kirk Stephens, to Coventry City in exchange for the utility player Ashley Grimes.

The Football League has lifted the er embargo on Wolverhampton Wanderers after agreement was reached between Wolves and the

Irish club, Glentoran, over a payment due for the transfer of Sammy Troughton transferred to Molineux last season...

Bobby Moore, the Southend United manager, has appointed Harry Cripps, the former Millwell defender as his assistant and team coach. The pair began their playing careers together on the West Ham United groundstaff. Meanwhile, the Southend central defender Chris

United groundstaff. Meanwhile, the Southend central defender Chris Turner. signed from Cambridge United last season, has been forced to retiré because of a back injury.

Mike Watterson, the former Derby County chairman, who resigned as vice-chairman of Chesterfield last November, has rejoined Chesterfield's board.

Olympic medals for World Cup winners

# When Owens sang Italy to victory

GLANVILLE looks at the origins of the tournament, whose early win-ners included England, Bel-gium, Uruguay and Italy.

gium, Uruguay and Italy.

Before the World Cup was born in 1930, it was the Olympic Games football tournament which alone brought together the countries of the world. Not Britain, it is true, after 1920; but even a strong British professional team, had there been such a thing, might have found it hard to beat the brilliant Uruguayan witners of 1924 and 1928.

Even when the World Cup had taken its primary place, Olympic football remained interesting. The Italian "Students" beat a brave Austrian team in the Berlin final of 1936. In 1948, a splendidly exciting Landon tournament, in which Great Britain's amateurs distinguished themselves, was wen by a superbosedish team. The competition of 1952, in Finland, was won by them glerious Hungarians of Pushas and Kocsis, emerging for the first time from Eastern Earope.

There was football of a next in the Paris Olympics of 1900, though it did not count as a an Olympic sport, officially, England, represented by Upton Park, FC, beat France, represented by the Union Française of Athletic Sports, 4-8. Eight years later came the London Olympics, and the first official tournament, at White City.

The France, who lost 9-8 and 17-9

White City.

The French who list 9-9 and 17-9 to Desmark, improved no disc.
They had even, it reported, smoked furiously at half-time.

The Danes, exponents of a miscular English style on which they have greatly chalcented since, pushed the United Kingdom surprisingly hard in the final, lesing only 2-0. Four years later in Stockholm, in a much larger tournament, Desmark again, gave the United Kingdom a tight game in the final, losing 4-2 sithough they had to play much of the game with only 10 mes, after an injury. Lefty Mils Middleboe, who played in both those Danish trans,

went to Norway, in the first

faal was torrid. Bearded Lewis, a noted English strator, was referee. He gave rough play, the whole team marched off with him. Beiginm were awarded te final, the Czechs were expelled.

Breaking point: A competitive wrestler since the age of eight, Brian Aspen bends to a task

Aspen loves the fighting and the glory

# No sequins on the strong man who wrestles for a medal

you see on television on Saturday after-

noons. It requires discipline, hard training and self-sacrifice. In Bolton, SIMON BARNES met Brian Aspen, a modest young man who dreams of becoming the first British wrestler to win an Olympic medal in 32 years.

of the ta-ra-ra-boom-de-ay Olym-pics in Los Angeles, with its trust-fund athletes and its professional tennis players, people might readily assume that the traditional Olymassume that the transman crym-pian is an extinct species. Not so. Go to Bolton for contradictory evidence. Brian Aspen was rather savouring his lager and lime (just a half). Why not? It would probably be the last drink he would have until the tunnals and the shouting is over in America

and the shouting is over in America. Lester Piggott's life of near-star-vation has permitted him to become a millionaire several times over. Aspen also lives a brutal regimen of self-denial: though he and his dad are doing all right with their roofing business, it is fair to assume that they will not be setting up a company in Lichtenstein this year. It is for glory alone that Aspen self-

Aspen is a wrestler: not one of the silly wrestlers with sequins you get on Saturday afternoon telly, but one of the esoteric ones. It is his dream

to become the first British wrestler to collect an Olympic medal since Ken Richmond, the man who hanged the gong in J. Arthur Rank films, did the trick in 1952. "A medal", Aspen said, with nothing less than awe in his voice, "would be everything I've wanted".

Fashionable

His normal weight is around the 10st mark: he needs to midge the needle down to around 9st to compete in his chosen category. "By the time: it's two weeks before a competition, you're feeling ever so weak. But once you've weighed in, your strength starts coming back". He won gold at the Commonwealth Games two years ago, and television actually showed a full minute of the final bout. This is not the most fashionable of sports.

Aspen had come back from 3-0 down to win: "It's a funny thing", he said, "but your opponent always looks bigger than you are. Your first reaction when you see him is always to think: Look at the size of him! I thought it was just the British who thought like that. But the eastern block wreathers say it's just the same

Aspen has been a competitive wrestler since he weighed in at 4 st at the age of eight. He had already been going to a wrestling club for two years. His father had been an Olympic wrestler ("He thinks I wrestle terrible") and naturally introduced his son to all the fun. "I love wrestling. Wrestling is fascinating. Wrestling is my life. My

only mates are in wrestling." Aspen is married, and has a child, having met his wife at one of life's rare non-wrestling engagements: at school. Wrestling must dicinte life's pattern: "It's rare for me to have a drink. There are no nights out. You have to give up a lot to make the weight. My wife's suffering. I'm suffering. I like my food." He said the last wistfully. visious of a shepherd's pie as big as the Ritz doubtless wastling across his mind.

Aspen isn't one of those who thrives on pions discomfort and self-denial. "I train hard", he said, "but I don't like it." What he loves is the fighting and the glory: "I love competing, I could compete every day."

Glory

Aspen would like to think that an Olympic medal would put wrestling closer to the British sporting mind. But his sim is gloxy: and a very private glory at that. "I thought that winning the Commonwealth gold would open a few doors for me", he said. "It didn't. I got invited to lots of dimers in Bolton and that was an

Aspen is a man who deserves all the bot dinners he could wish for. I hope that glory will come his way as well as the dinners: he is a modest with life and sport in a sens perspective. He is not the typical sportsman of our times: more a throwback to the zolympian ideal. And he is certainly an Olympian for

# Hinault's charge a warning to pack

Becoming a great cycling champion is as much a matter of pride as of ability. The story of yesterday's twelfth stage of the Tour de Francewon in opportunist style by Pascal Poisson, a 26-year-old Frenchman-centred on Bernard Hinault, who is desperate to win this colossal race for a fifth time.

On Monday, Hinault was upstaged by his younger French rival, Laurent Fignon, who gained 53 seconds in the final two-mile ascent to Guzet-Neige. Like an injured lion, Hinault made a dramatic attack yesterday, midway through the 69-miles stage out of the Pyrences to this suburb of Toulouse. He gained a good half-minute on a pack that was reluctant to chase on an afternoon of humid, 90-degree heat.

The challense was finally

neat.

The challenge was finally accepted by the Renault-Elf team of Fignon and the yellow jersey. Vincent Barteau. The chase split the bunch into several sections echelon fashion

Hinault was brought back to heet, of course, but his attack served as a reminder that there is plenty of life left in his 30-year-old legs. He was made to pay for his aggresion later, when the Remault team sent several of their own riders into the attack, including Greg LeMond, the world champion.

champion.

LeMond yesterday climbed to seventh place overall after winning a 12-seconds time bonus at an intermediate sprint. He goes ahead of Sean Kelly, while Robert Millar dropped to tenth place after losing 23 seconds in a group that lost contact in a bectic finish.

The stage was decided in the final 15 miles. Poisson, a Renault rider, went with a five-man break that was went with a five-man break that was

# CRICKET: MAGNIFICENT EARLY STAND ADDS TO GLOUCESTERSHIRE'S TROUBLES Boycott passes milestone on Yorkshire's road to recovery

195 runs in 32 overs, steered Yorkshire to a commendable victory against a depleted Gloucestershire side, yesterday. Yorkshire were set to make 280 in 48 overs and worf comfortably to achieve a measure of breezy 49. At the intervent rehabilitation after last week's stood only 163 runs on. disasters against Essex and

It was hard, though, not to feel sympathy for David Grave-ney, whose declaration always looked generous on an easy. Carrick into the adjoining paced pitch, and who, in the football field and pulling Denderous over, lost Lawrence, his nin for a fourth six over midmain strike bowler, and the only man who ruight have slowed down Yorkshire Lawrence went to hospital with the webbing of his left hand split after he tried to catch Lumb off Shepherd at long leg.
Yorkshire had 53 overs

available and won with 17 balls to spare as rain started to fall. Boycott drove Bainbridge past mid-off for his eleventh four to win the match and provide a suitable climax to a superb three-hour display. Boycon's career aggregate stood at 44,999 runs when he started batting and although the passing of this milestone went unnoticed by the crowd, nearly every other run in his 142nd century was. cheered deliriously.

ked

Lumb had been caught behind in the ninth over, but Boycott and Sharp settled down to play some glorious perfectly timed strokes which found the gaps and left the Gloucestershire bowlers helpless. Yorkshire needed 111 from the final 20 overs, and although Sharp, who hit two sixes and nine fours, was caught by the wicketkeeper down the leg side off his glove with 13 overs to go,. Hartley stayed with Boycott to Goucesterheire would never

have been in a position to declare without a polished and

BRADFORD: Yorkshire (21pts) forceful innings from Athey, beat Gloucestershire (5) by eight who must have enjoyed making wickers. his first hundred for his new A magnificent second-wicket stand between Geoffrey Boycott and Kevin Sharp, which added Phil Sharpe in the list of recent players who have make cen-turies for and against Yorkshire. Gloucestershire had lost four wickets before lunch, including that of Dale, the nightwatchman, who hit seven fours in a breezy 49. At the interval, they

> Afterwards, though, Athey began to drive and pull with great certainty. He scored his second fifty in eight overs. driving three enormous sixes off wicket just before the declar ation came.

> Athey and Cunningham put on 10t in 13 over in their unbroken sixth-wicket stand. and although Yorkshire's attack lacked Fletcher, with a pinched sciatic nerve, this should notdetract from the fact that Athey batted with splendid judgment for just over two hours.

# Hardy demonstrates a Nelson touch a ssault from Wells and Parker after lunch. Wells hammered 54 in 31 minutes with five fours and five sixes, hitting Hemmings for 31 in two overs, while Parker hit four sixes in an unbeaten 56. Hemmings had the last laugh, micking on three for 82 in a him.

By Alan Gibson

T.4UNTON: Somerset (8pts) drew wuh Hampshire (3): Hampshire began the day at 187 for five, 210 behind, and the first question was whether they would save the follow-on. This they failed to do by four runs. Hardy continued to bat bravely, but once he had lost Cowley there was no one left able to support him. It must have been,

champinship debut for him.

When Hampshire batted again, they were soon in trouble. Both Terry and Nicholas out when the score was 44. Then Turner was bowled by Davis for nought, the second time in the match. Poor Turner is in no sort of form at present. Davis on the other hand, is bristling with vigour. He bowls almost fast with intelligent vwria-tions, and had a most successful match. Kilve, the Somerset village, whence he hails, must be proud of

lo settle in druring the second unnings, but both were smartly caught at square leg. When Cowley was out to a good close catch by Popplewell just after tea and Hamshire were 89 for seven, Somerset seemed to be ambling An eighth-wicker stand by two

descendants of former Somerses players. Parks and Tremien, thwarted them. Jim, Harry, and Maurice would all have been pleased had they witnessed this stand. Aithough Tremlett was out in the thirteenth over of the last 20, by that time he had ensured that Somerset would need to but again. I should have known it would

# East excels as Selvey's strategy goes west

three balls had virtually condemned this match to a draw. Selvey, not unreasonably, decided to continue Glamorgan's first innings yesterday morning in the hope of bowling Essex out cheaply a second time, but although the bounce was not always consistent, the pitch was too good

for that plan to succeed.

East, promoted to No 3, made 81, his highest score of the season, and Gladwin also showed good form as Essex played out time in the afternoon surshine after they had gone in again, 192 runs behind. Glamorgan briefly smelled victory in the first hour after teat McEwan and East were out and then Fletcher fell with the around level and 25 and East were out and then Fietcher fell with the scores level and 25 overs remaining. Hardie and . Pringle, however, stood firm, helped by a rash of no-bells from the West Indians' recruit, Davis, and Gla-morgan called off the hunt with 13 overs less and firm michael accompand overs left and five wickers required.

Glamorgan added 77 runs before iunch, but with no great sense of urgency. Foster, who produced a good ball to have Davies caught behing, bowled throughout, though it was debateable whether he or Acfield, posted to third man at each end because of a damaged finger, covered more ground. Foster certainly expended more energy.

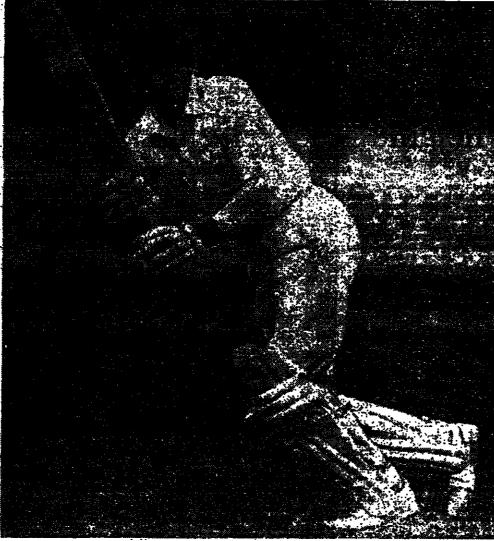

Eighty overs remained after the interval. Prichard fell in the overs left and five wickets required.

# Hadlee's encore is beyond Sussex

aconvincing 142 run win over Sussex at Trent Bridge. After declaring their second innings at 242 for five, with Randall hitting an unbeaten 110. Sussex, set 325 to win, were dismissed for 172 by mid-afternoon. Another superb all round per-runance by Hadlee paved the way for Nottinghamshire's victory. The New Zealand bowler followed up his four wickets in the first innines by taking four for si in 10 overs and bitting 67 before Nottinghamshire

Randall for the fifth wicket. Sussex were immediately in trouble at 17 for four but delayed the inevitable in an astonishing assault from Wells and Parker after

them in second place.

Northamptonshire beat Surrey in the last over at Northampton with only three balls to spare. They won by seven runs to record a double over their rivals - the only Championship games they have won this season. Cook, playing despite a damaged foot, declared Northants' second innings at 250 for six, leaving Surrey the strainable target of 269 in 48

shatters up.

MAIDSTONE: Kent (1pt) drew with his rate of scoring. Yesterday, though, apart from when in the lin the best possible way. Lancashire and Kent contrived to fashion a splendid finish after a virtual washout on the second day.
Kent, required to score 331 to win
in 97 overs, were set on their way by
Neil Taylor's first hundred of the season and a return to form by Chris Tayare. They were denied victory, indeed almost beaten, by the unflagging Jack Simmons, who, as the battern fouth to keep up with the asking rate, captured five wickets for six runs in 19 deliveries with his offeries. with his off-spin.

Kent had declared at 74 for one in the morning Underwood again enjoying himself Lancashire then forfeited their second innings. This was sporting, even generous; but then they have been bogged down in stalemates of late and have yet to win a championship match. Something had to be done.

Although water had scoped under the covers during the thunder storm on Monday - when only 6.2 overs were bowled - the ball still came on to the bat. What lift and turn there was, Taylor and Tavaré, if not the others, countered well. Indeed, they batted beautifully between lunch and rea, when they made the bulk of their 161-run partnership in 53

Tavare, of course, has had a lean season to date. "We'll play him into form", was the dry observation of the man from the Manchester Evening News, and he was correct, lathough Lancashire, and particu-larly Folle and Sommons, did not bowl badly.

Towards the end of his innings of 79, Tavare stepped back and lofted Simmons on to the bank that faces the North Downs. It was, perhaps, the moment that his confidence was

As for Taylor, he has not always

# Barnett may take a risk The Northamptonshire captain, Geoff Cook, plays against Hamp-shire in the championship match at

The Derbyshire captain, Kim Barnett, may go against his doctor's advice and play in the County Championship game against Kent at Maidstone. Barnett, who has been suffering from a groin injury went to Chesterfield Royal Hospital yesterday because of fears that he had suffered a heroia. onffered a bernia.

He said: "It turns out to be only a muscle injury but the doctors have told me I ought to rest for ten days. I shall see how I fiel in the morning, and if the injury is not too sore I may well decide to try and play through it, and keep my place against Kent."

Leicesterhsire bave recalled open-er, Chris Balderstone, for their championship match against Sussex starting at Grace Road today.

Boan (Reuter) - Patriz IIg, the world 3,000 metres steeplechase champion, has withdrawn from the West German team for the Olympic West German tram for the Olympic Games because of a viral infection. He has been troubled by the infection throughout the summer and had to drop out of a 1.500 metres race on Sunday after only two laps because of exhaustion.

Willi Wiselbeck, the 800 metres has already pulled out of the games with a foot injury.

**EQUESTRIANISM** 

# Happy ending for Billington

Geoff Billington won the Midland Bank championship at the Great Yorkshire Show in Harrogate yesterday with two clear rounds on Preschan, in spite of an incident in the collecting ring beforehand, when his mount took hold and jumped a hedge into the crowd, colliding with a pram. Billington was later relieved to discover that the young boy in the pram was unharmed, and resolved to by a new pram with his winnings. Billington's first clear round forced a jump-off with the Clympic shorthisted rider, Gary Gillespic, on the German-bred Lorenzo.

Azainst the clock Prechan went reachan, in spite of an incident in Against the clock, Prechan went

Steve Cram completes a bectic 72 hours of racing as part of his Olympic preparation when he represents England in the international match against Poland and Hungary at Alexander Stadium, Birmingham on Sunday. He will be in action at the Peugeot Talbot Games, on Friday at Crystal Palace, then moves up to the Midlands for the U-Bix sponsored match.

the U-Bix sponsored match.
The world 1,500 metres cham-

The world 1,500 metres champion needs as much competition as possible before leaving for America because his plans for Los Angeles have been upset by a calf injury, which has kept him out of action for over two weeks. Cram limks up with Jack Buckner in the 1,500 metres while Dave Moorcroft tackles his second 3,000 metres in nine days after a lone law off through miney.

after a long lay-off through injury.

Steve Ovett is in the middle of an even more arduous spell. The Olyympic 800 metres champion,

who is also doing the 1,500 metres in Los Angeles, goes from Lausanne, where he raced last night, to Crystal

Palace for Friday's meeting and then on to Birmingham. There he

inst over a restricted course, still incuding the double and treble which had caused so much initial trouble, and was again faultless, in 38.16 sec. Lorenzo, with which Gillespie jumped some excellent

rounds in Aachen last month, faulted in the middle of the combination of uprights set at two-stride intervals. Gillespei slowed noticeably after that, but his time was only 0.8 sec slower.

Vin Poulson showed Elite to gain his ninth hunter championship of the season, with Archie Thomlinson's Aristocrat, only third in his class at the Royal Show, standing SWIMMING: Britain's 40-strong class at the Royal Show, standing

class at the Royal Show, standing reserve.

# Injury to Mumby mars win

Northern District Great Britain

Whangarei (Agencies) - Great Britain opened the New Zealand leg of their tour here today with an carly win over Northern Districts Britain led 16-0 at half-time.

However, the international centre, Keith Mumby, was taken to hospital with concussion. Playing full back, Mumby was carried from the field after a heavy tackle in the second half. He was discharged after a check-up, but his fitness for Saturday's match against New Zealand is still in doubt.

Britain scored eight tries, but took some time to settle against the weakest of New Zealand's four provincial sides and had to wait 29 provincial sides and ned to wart 29 minutes before their first touchdown. They fielded a shadow team, with only three players from the third international against Australia last weekend selected, and appeared content to play at half pace for most of the game.

Northern Districts came back just after half-time to exploit weaknesses in the British defence, scoring two quick tries. The strength of the British forwards finally won the day and the touring side picked up five tries at will in the final quarter, against a weary home defence.

SCORERS: Northern Districts: Tries: Smeath, R Campbell, Great Britain: Tries: Basnett, W Proctor, N Adams, K Beardmore, Carit, A Gregory, J Joyner, M Smit Conversions: D Hobbs (3), Proctor, Panal

# Katies to confirm status as queen of the milers

With £20,000 added to the not have beaten Pebbles wven if he won bolting home by four lengths. So if he is on his best sweepstakes, the Child Stakes is she had been at her best.

. Katies and Pebbles are the respective winners of the 1,000 Guineas in Ireland and England this season. Since winning those classics they have clashed already in Ascot in that memorable Coronation Stakes which Katies won by a length and a half. That result stamped her as an improving filly who should be followed and she is napped to beat Pebbles again this afternoon on the same

More spice is added to the race by the presence of Meis El-Reem and Mahognay in the field. Meis El-Reem finished three lengths behind Pebbles in the 1,000 Guineas and meets her conqueror now on 6th herrer terms. In theory that should draw them together, but to may

arter a fluent victory in the Fred Darling Stakes at Newbury, but after going well for threequarters of a mile she went out like a damp squib in the less than the less th damp squib in the last two furlongs and eventually finished sixth. It was said afterwards that she was running a temperature.

The point to the state state states, Gay Hellene.

Pacific Mail, my selection for the Bernard Van Cutsem the was running a temperature. However, by taking a line customer at home, by all through Shoot Clear, who accounts, but he did absolutely finished two lengths behind nothing wrong in his first race Mahogany at Newbury would at Yarmouth a week ago, when morning.

Tapping Wood.

Today's programme opens

with the Princess Maiden Stakes

which has been won by some

good fillies in recent years,

Satinette, who will be back to her best distance after failing to stay further at York and Chantilly, also seems held by the big two on a line through the best distance after failing to stay further at York and Chantilly, also seems held by the big two on a line through the best distance after failing to stay further at York and Chantilly, also seems held by the big two on a line through the best distance after failing to stay further at York and Chantilly, also seems held by the big two on a line through the big two on a line through the best distance after failing to stay further at York and Chantilly, also seems held by the big two on a line through the best distance after failing to stay further at York and Chantilly, also seems held by the big two on a line through the best distance after failing to stay further at York and Chantilly, also seems held by the big two on a line through the best distance after failing to stay further at York and Chantilly, also seems held by the big two on a line through the b behavious again he could easily pick up another nice prize for. Henry Cecil, who also has hopes of winning the Anglia Tele-vision July Stakes for the third time, on this occasion with Vertige, who was successful at Kempton a formight ago. much the same, first at Goodwood and then at Doncaster. Yesterday George Robinson, However, I am tempted to take a chance with Dan Thatch, out Newmarket correspondent, said that he expected to see

who landed a prodigious gam-ble at Redcar last month. Some Katies win again after watching her completely outclass that good filly, Chapel Cottage, in a recent gallop.

So if Katies does live up to will think it strange to oppose Prime Dominie, who did after all win the Coventry Stakes at Royal Ascot, But he did not win our expectations she could that race with the authority that I expected and that is why I easily be the first of two winners this afternoon for Philip Robinprefer Dan Thatch now at a son, who is given a good chance difference of 51b.

of winning the Duke of Cambridge Handicap as well on Burang, who ran so well in his first race of the season to finish fourth behind The Miller in the Churchill Stakes at Ascot, could be the one to plump for in the Kennett Maiden Stakes.

Finally, Hannah Moore looks notably Desirable, Royal Her-oine and Tolmi. My best information concerns Gay Hela good bet to win the July Mahogany started hot favourite for the 1,000 Guineas after a fluent victory in the Fred Darling Stakes at Newbury but a story in the Fred Darling Stakes at Newbury but a story in the Fred Darling Stakes at Newbury but a story in the Fred Shown by the two-year-old could be a story effort against Marie Cath in the Warwick Oaks there last month. > ● Late last night Pebbles was found to have slighly injured a leg and a decision about her participation in the Child Stakes will be made this

Hern and Piggott scale the heights
By Michael Seely

By Michael Seely
Dick Hern and Lester Piggott
touched the Newmarket July
meeting with an aura of magic
yesterday. Combining forces for the
first time since Willie Cannon broke
his leg at York in 1981, Britain's
outstanding trainer and the world's
grentest jockey sent the crowd home
happy by landing a double with
Head For Heights and Thoy Fair.
It was good to hear that Carnon's
injuries from his fall in Inly oa
Sanday are not as serious as was
first thought. "He'll be back in two
or three weeks' time," Hern said,
"and he'll come out punching with
both hands. He'll be fit to ride in a
novice chase."
The reigning champion will now

The reigning champion will now have an envable choice as he pouders whether to ride Son Princess or Head For Heights in the King George VI and Queen Elizabeth Diamond Stakes at Ascot on 1919 22

ou July 28.

Head For Heights was giving the Royal trainer his fifth trimaph in this group two contest in the past 11 years. Sent into he lead by Piggott over two farloags from home, over two Mohammed's Shirley Statutes only heat Levely Dancer and Shaikk Mehammed's Shirter Heights colt beat Lovely Dancer and Communcte Run with a fine blead of speed and stamina. Piggott was of speed and stamina. Piggott was impressed. "That was a good performance," the 11-times champion jockey, said "He certainly earned the right to go to Ascot." Since disappointing in the mad behind Durshaan in the French Derby, Head For Heights has gone form strength to strength, yester-

form strength to strength, yester-day's victory following hard on the heels of his win in the King Edward VII Stakes at Royal Ascot. "The colt loves the first ground," Hern continued. "He's pleased me in recent weeks and has improved since Ascot. He could well run in the King

Piggott can afford a look over his shoulder as he brings home Head For Heights (Photograph: Chris Cole).

The merit of this performance can be gauged from the fact that Lovely Dancer had previously finished third to Time Charter in the Coronation Cup. Head For Heights was also meeting Commanche Run and the unplaced Kirmann on 6th worse terms compared with Ascot.

Piggot: employed the same enterprising tactics on Troy Fair in the Piper Champagne Stakes as he had on Head For Heights. Using the two-year-old's previous experience, and the stuming inherited from his sire, the Ill-fated 1979 Derby

sire, the fil-fated 1979 Derby winner, Troy, the pair took up the running some way from home to account for Chiefdom, the 13-8 favourite, and Storm Rainbow.

The return to form of Michael Stoute, which was started by Kuradar at Newcastle a week ago last Saturday, continuing when Top Socialite won the Cherry Hinton Stakes. Ridden with style and judgement by Walter Swinburo, the American-bred filly quickened smoothly to beat Happy Hannah and Hilly. Fatah Flare, the 5-2 on favourite, was in trouble at half-way and finished last but one.

Top Socialite had finished fourth to Hi-Tech Girl in the Queen Mary Stakes at Ascot since her impressive

when he got beaten here last time out," Hern said. "He could go for the Lanson Champagne Stakes at Goodwood, as Petoski is a possibility for the Richmond."

The return to form of Michael Storte, which was started by Candward "Candward"

Waterford Candelabra Stakes at Goodwood."
Mammy's Pleasure was the Bunbury Cap for the second successive year. This victory represented a fine feat of training by Patrick Haslam as the five-year-old had also won Ascot's Victoria Capitalist Ca

race, received consolation when George Duffield rode Sylvan Barnam to a narrow victory over Sajeda and the well-backed favourite, Kiowa, in the Hamilton Hamilton, "William the Goat, their travelling companion, was looking a bit downesst," the Epsona trainer bit downerst, the Epster France, said. "This will cheer him up."

Another Epster trainer, Brien Swift, was also in a happy mood after Prince Sabo had sprinted to an impressive victory over Chaptace in the Chesterfield Stakes. "Prince Sabo and sprinted to an impressive victory over Chaptace in the Chesterfield Stakes. "Prince Sabo and sprinted to an impressive victory over Chaptace in the Chesterfield Stakes." in his only other outing this seasen.
Once again, Tyrone Williams, who had also captured the Royal Hunt Cup on Hawkley for the Newmarket trainer, excelled himself.

Philip Mitchell, disappointed by the running of Korypheos in this formula about it when I'm 70."

# Young Turk surprises

Young Turk continued the return to form of Ian Balding's horses when he made all the running to beat the hot favourite, Get The Message, by a length and a half in yesterday's Welsh Derby at Chep-

Starting at 5-1, Young Turk may have been a little fortunate as Richard Quinn on Get The Message was unable to find a gap between Hoyer and Young Turk. Neil Graham, Balding's assistant, said: "We thought he would need the race today. He has been annihilated by his galloping companion, Gold And Ivory, at home and has done well for a horse who has had such an

easy time."

The race itself now appears to be crying out for a sponsor. Five

runners went to post for yesterday's event, which meant that in five runnings there has been a total of

only 24 runners. The rest of the programme was dominated by Peter Walwyn, the Lambourn trainer and Richard

Holder, who operates in the Bristol Walwyn's first winner. Honing Bay, on ground much 100 firm for him, made heavy weather of landing 3-1 on favouritism by threequarters of a length over the 9-2 shot, Anna-Louise, in the Maple Stakes.

The colt, a 10 length Warwick winner on his debut last week, had to struggle under Joe Mercer after Anna-Louise and Tony McGlone went half a length up at the distance.

CONTRACTS AND TENDERS

### The Film Management Systems by Remarkable Films Limited

Remarkable Films Limited, a New Zealand company is the developer and owner of the Film Management System, a computer software application which has recently been successfully introduced into the Film and Television Industry in North America.

The software is now being used by major Film and Television Studios in both the USA and Commission Agent or Commission Agents to introduce and market this software in the United Kingdom and Europe.

The Film Management System is invaluable for pre-production, production and post-production activities in all areas of film and video production. The package provides modules for film planning, film scheduling, film budgeting, general ledger, estimates to complete, payroll and accounts payable and outstanding orders. The programme has been developed for use on IBM PCXT's and Apple 3 Computers. Multi user network options are available.

Interested parties having a thorough knowledge of both the Film and Computing Industries in Europe and the United Kingdom are invited to register their interest by writing to:

THE FILM MANAGEMENT SYSTEM c/o New Zealand - United Kingdom Chamber of Commerce, Suite 615, 162-168, Regent Street, London W1R 5TB

The colonnaded windows of the

By Christopher Warman

The most important house in London to come on to the market since the

war is for sale today. It is as simple as that, but which is the most important

house? Buckingham Palace is not for sale, nor are any of the other obvious

candidates.
The answer is The Holme in Regent's Park, and Knight Frank and

Rutley, who have been instructed by the Crown Estates Commissioners,

are confident that it is "unquestion-ably" the one. Put in perspective,

Peter Kearon, partner in the firm, says that while Buckingham Palace has grounds of five acres, Lambeth

Palace has 11 acres, and Winfield House, also in Regent's Park and home of the US Ambassador, has 12

acres, The Holme has a 100yd frontage on to the lake in its 4.5 acres.

"We know of no other London house

in the middle of the capital of that size and quality. And we think you cannot find anything like it in any other capital city – New York, Rome, Paris or anywhere."

The Holme is back on the market

because it has reverted to the Crown Estate Commissioners from Bedford

College, University of London, who occupied it from 1947 until last year before the College moved out of

Despite its continuous use, it now

needs full renovation which the purchaser will have to complete at his

own expense, but to the Com-

missioners approval. Subject to

planning consent, the Commissioners'

intention is for the property to return

to its former residential use as a single

ALC: HILLIAM

family house.

The entrance to Burton's Regent's Park masterpiece

There are five main reception rooms on the ground floor including a For this magnificent shell of a house, which has in Mr Kearon's words been "ruined" through its library, ballroom drawing room and dining room, and the total floor space institutional use in the last 40 years, of the building is about 19,000 square Knight Frank and Rutley will not consider any offer under £5m. Even to look around the house a prospective feet. The house has been altered and enlarged over the years, losing its original dome to a balustrade, but buyer will have to pay £20 for the retaining its Regency character. It is situated immediately off the inner illustrated brochure, and once the purchase is made the owner will need circle, the driveway leading to an to spend at least £1m just to put the impressive portico supported by Corinthian pillars, but has succeeded house in good order.

RESIDENTIAL PROPERTY

London's most 'important'

house - say the estate agents

414

"The price will depend on what rich men are prepared to pay," he said. We as valuers cannot relate the property to anything else, but when you think that £7m was recently paid for a Turner painting, that a horse went for £10m and someone paid £30m for a yacht, £5m does not seem too much for the most sensational private house you are likely to see."

The Holme, named after the Anglo-Saxon word for river island is one of the original houses built in the grand Nash design for Regent's Park. It was designed and completed in 1818 by Decimus Burton, tenth son of James Burton, the first acknowledged master builder. Young Decimus, aged 18, built the house for his father who had picked out the best site for a home in Regent's Park, and this first commission launched Burton on his career although it was criticized at the time because it was too unpretentious. Including the second floor and

basement, the house has 40 rooms, with eight bedrooms on the first floor.

The house at present is totally bereft

of furniture and largely without

decoration, although the dining room,

given a flamboyant face lift in the 1930s, remains colourful.

in maintaining Nash's original con-cept for the villas in the park "that they should appear to possess the whole park and yet be invisible to others' From 1818 to 1939 the house was in continuous private residential use? George Dance, the songwriter and impressario, was one of its dis-tinguished owners who carried out extensive alterations just before the first World War, and it was greatly altered again in 1935 by Mrs Marshall Field, later the Hon. Mrs Pleydell-Bouverie. It remains, however, very much the work of Decimus Burton, whose later buildings included the Athenaeum Club, the old Charing Cross Hospital in the Strand, and the

 $\mathcal{F}_{i}^{\sim D}$ 

`. _·.

The Holme has an outstanding pedigree, therefore, and Knight Frank and Rutley are confident that it will break through to a price record for a house in London". Private deals have gone through at a rumoured £4m-£5m on other properties. This - to an approved buyer, not necessarily the highest bidder, in order to safeguard its future - looks certain to top that

### The bridge on the River Wye

Worcester are on the market at about £265.000 through Jackson-Stops and Staff's Cirencester office. The bridge over the River Wye was built in 1797 unusual investment property not least because a tax counsel has given an workshop. There are fishing rights on its 100-yard river frontage and the property includes a tea garden and

Tom Maschler, chairman of the bedrooms and a self-contained teenager/granny flat.

at the same time at the Georgian Long Stratton Manor house, now demolished, is to be auctioned by Harman Healy and Co. at the London Auction Mart, the Connaught Rooms, Great Queen Street, London WC2, on July 19. The house, looking like an outsize brick cannonball, was filled with blocks of ice cut from a nearby pool in winter and carried up to the house twice a week. Last used for this purpose in 1897, the ice house is Grade I listed and could fetch up to

The actress Annabel Leventon, who played Janna in the BBC-TV production of *Penmarric*, and her husband, sculptor John Adams, are selling their early nineteenth century cottage in Mossop Street on the Chelsea/Knightsbridge border, for around £115,000 through Cluttons'

### Cotswold country

Black Hill, a 1930s house at Blackhills, adjoining Esher Common, Surrey, is to be sold by Mr H. L. V. Lobb, architect for the British Pavilion at Brussels EXPO 1958. The 1937 Paris Exhibition and also the projecting bays at the ends, has three Parker, Hill Street, London W1, are

Mancetter Manor, a listed Grade II fourteenth-century house near Atherstone, on the Warwickshire-Leicestershire borders, is for sale through the Cheltenham office of Hampton and Sons, who are asking for about £215,000. The timber-frame building, once the home of Robert Glover, the protestant martyr, was originally built as a great hall. Its upper floor is thought to have been added about 1480. Accommodation includes drawing room, dining room, billiard room, reception room and study, five bedrooms and five bathrooms. There is self-contained, five-bedroom staff accommodation, a stable block and five acres of grounds and gardens.

# New but not true

o, /UU people interviewed who had bought a new house since 1982, only one in four said they would definitely go to the same builder again. That sounds bad, a damning indiciment on housebuilders, but how many accordance in inconvenient, were poorly fitting or warped doors, cracked plasterwork, badly fitting windows and gardens left in an untidy state.

When it came to correcting the faults, owners were not have.

singled out in Granada TV's recent World in Action programme), house-builders are entitled to take some

comfort from the figures.

The report in Which?, magazine of the Consumers' Association, offers a controversy surrounding timber-warning, however. "Fully equipped frame houses in view of criticism that warning, however, "Fully equipped kitchens, fitted carpets and so on may be importent to the first-time buyer with limited means," it says, " but weigh up the pros and cons of these very carefully. As some of the people in our survey found, such a house may not turn out to be such a good investment as you had hoped if you have to resell soon - within a couple

of years or so."
For once Which? admits it cannot pick a best buy - "it is one decision which is partly logical and partly emotional. A new house must feel

providing information about the by its owner on moving in, while a worries of houseowners, has the sort quarter were thought to be in very of statistics supporting it that can be good condition. The most common looked at in almost opposite ways, so faults, which a majority said were take care in interpreting them. Of the minor or inconvenient, were poorly 6,700 people interviewed who had bought a new house since 1982, only plasterwork, badly fitting windows one in four said they made at the case of th

sounds bad, a damning indiciment on housebuilders, but how many people third thought their builder did not would want to have another house by the same builder even if they were all quarter were not completely satisfied without faults? Half said they might with the way in which the builder buy a new house from the same dealt with the fault. About half the builder and one in seven said they builders carried out a routine would not. In the light of criticism of starter months - and the owners involved homes, particularly those offering a were more likely to be satisfied with package of incentives (such as Barratt, the builder.

> There is certainly a lesson there for builders, for owners who receive a check at least feel that they have not been forgotten.

> The report also looks at the wrong or badly installed insulation can lead to rot through condensation. Which? says that no case of damp directly attributable to such conden-sation has yet been discovered in the UK, but it points out that no. independent test work has yet been published. With statistics working both ways,

perhaps the fairest summing up of the end-of-term report on the builders of new houses is "reasonable effort, but could do better."

 You can't complain that you don't know where you are in BBC Bristol's three-part drams series A WINTER HARVEST (BBC2, 9.30pm), set on a West Country farm. Within the first minute, g farm. Within the first minute, geess quack; within a few more, the plot is rolled out like a red carpet. The husband (Mark Wing-Davey) goes into hospital for a gallstone operation, leaving his new, city-bred wife (Cheryl Campbell) to face the realities of farming. She grappies with the cattle, worries over the with the cattle, worries over the bariey, drives a tractor, and runs the gauntiet of patronising neighbours; was it a mistake, she wonders in her turmoil, to embark on country life? Jane Beeson's series may be built on old, stender bones, but the eductive locations and Campbell's thorough, intense performance prevents the structure collapsing. Ironic, though, that the episode's most forceful scene – the hospital

CHOICE visit - takes place far from the farming environment so cherishe by the producer-director. Colin Stuart Paterson's filmed drama

WORKHOUSES (BBC1, 10.20pm) opens a lively series of five plays, End of the Line, set in a Scottish New Town severely hit by the recession. A proper horse is involved – a Chydesdale beauty, tended secretly by the handyman at a school for difficult kids. But most of the workhorses are human - recalcitrant recruits in a Youth Opportunities scheme, ordered to create a market garden in the school grounds. Many talents involved are new to t writer, the director lan Knox (a National Film School graduate), the

producer Tom Kinninmont (from radio) – and some inexperience shows in the muddled exposition. But there is much good humour and wisdom here; a fine performance, too, by Andrew Keir as the obstinate

 Channel Four interrupts its presentation of Peter Brook's Carmen films to show us CARMEN JONES (9.55pm) - Otto Preminger's version of the all-black Broadway Hammerstein's updated treatment, Don José becomes a Gl called Joe, boxing replaces builfighting, and Carmen makes parachutes, not cigarettes. The music is glorious, though only Pearl Balley sings with her own voice; Dorothy Dandridge is dubbed by the opera singer Marilyn

Geoff Brown

Overturned vans and lorries bear silent witness to Fitzwilliam's night of violence.

# Night-long battle of Fitzwilliam

From Craig Seton Fitzwilliam

West Yorkshire police and residents of a mining com-munity clashed yesterday over the causes of the worst public disorder associated with the miners' strike which led to a large crowd surrounding a police station, police and miners fighting in a village pub and £100,000 damage to a nearby drift mine, where vehicles were set on fire and Coal Board managers barri-caded themselves in an office for three hours.

According to the villagers of Fitzwilliam, near Hemsworth, police - some of them in riot gear, and with truncheons draws - "terrorized" the nunity in their search for a

According to West Yorkshire police there was no single cause of the "serious public disorder" which left five people — three of them policemen - injured and eight people, including two women under arrest facing public order and assault charg-

These are the varying versions of what happened at

THE POLICE: Mr John Domaille, Assistant Chief Constable of West Yorkshire, insisted that the trouble had

night when a large "disorderly crowd" gathered outside Hems-worth Police Station nearby. when there were only three policemen inside. Stones were thrown, windows were brokes and police reinforcements were called for.

The crowd dispersed fro the police station after the intervention of an NUM official. Police had been called at 10 pm to the Fitzwilliam pub where a large crowd subjected officers to a hail of stones and missiles. In the incident that followed riot gear had been used for protection.

THE VILLAGERS: Mr

Michael Conway a 26-year-old miner, said that eight police-men had arrived at the home of his brother, Brendan to arrest him "on suspicion". He had refused to open the door and the policeman had gone away "to get a warrant".

In the meantime, word had got about the village of 5,000 that Brendan Conway was to be arrested and 200 people, miners and miners' families, including women and children, had gone to Hemsworth police station, where their father Mr Michael Conway and Mr Frank Clarke, a local NUM branch official had received an that Brendan would not be

Clarke and a solicitor. The crowd dispersed, but later a police transit van passed repeatedly by Brendan's home and a policeman juside shouted and a policeman inside shouted "Brendan, Brendan, we are coming for you."

Mr Conway said at about 10.45pm 80 to 90 policemen, some of them in riot gear, marched on the FitzWilliam pub, where about 200 local people had gathered, and "physically battered them through the main doors into the

rested and handcuffed to a lamp post outside with Peter Hurst, a friend, who was knocked on the head with a truncheon and kept in hospital overnight. Brendan's girifriend had also been arrested and later, in the early hours of the morning, half a dozen police-

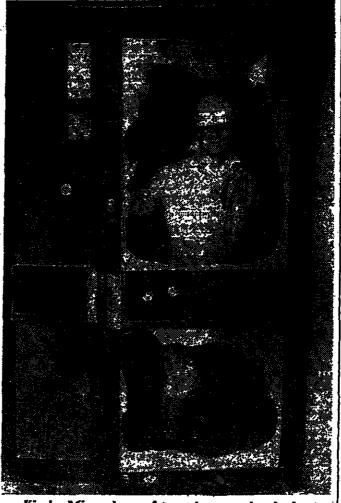

morning, half a dozen policemen in riot gear had gone to the home of his aunt to arrest Denis Doody, his consin.

Mr Tim Doody, aged 55, Denis's father, said: "It was terrifying. If they had come in the right gear, I would have asked them in for a cmp of tea, but I never thought I would see but I never thought I would see the day that this happened. They just told me that they had got a job to do." Mr Brian Willis, landlord of office.

the Fitz william public house, said "It all started when miners the police. Windows were broken and glasses were smashed. There had been no trouble here at all and I certainly did not call the oolice ' THE NUM: Clarke, the

NUM officaial who was called to Hemsworth police station after hearing that a crowd was surrounding it, said: "I talked to an inspector there and got an agreement that the police would not sirest Brendan Conway if I went with him the next day to the police station with a solicitor." He went ho THE COAL BOARD: said

that about 150-200 men had run amok at Kingsley drift mine after the incident at the Fitzwilliam pub. Three management people, four deputies and four security men had barricaded themselves in an office using chairs and filing cabinets and watched as a "mob" smashed windows every building and used forklift to smash down compound gates and take away three vans - two of which were burnt and one smashed. It was after midnight that rlot police with truncheons had arrived and it was 2am before the staff

Kinsley Mine, where safety workers were beseiged.

# Soviet fleet crippled for six months

By Rodney Cowton

Defence Correspondent Russia's northern fleet may have been disabled as a viable force for up to six months by a series of explosions at its base at Severomorsk on the Kola peninsular on May 13. At least 200 people were killed.

The first comprehensive account of the damage is contained in the July 14 edition of Jane's Defence Weekly. The report, which was confirmed as being broadly correct by Western military sources, says it wli

The most severe damage was

in three main areas: the stores area for surface-to-surface missiles. In addition, an unknown surface-to-surface missiles, the number of SS-N-19 missiles first thought that one or more nuclear warheads had been explosive components storage area where non-nuclear missile warheads were kept, and the naval ammunition storage facility. Apart from the 200 killed, Jane's says that a similar number of people were injured.

The main general effect of the destruction is that until the damaged stocks are replaced the most powerful, would not be Approximately 580 of the blast and debris damage. able to rearm its ships once they fleet's stock of 900 SA-N-1 and The report says that a had fired the missiles which SA-N-3 surface-to-air missiles number of buildings and bunk-

# Strike halts key ports

The issue at the centre of the dispute is the 37-year-old docks labour scheme which guarantees work for the so-called registered dockers and outlaws the use of casual labour. It now covers more than 13,000 workers in 54 ports. The industry as a whole

employs 53,000. • More than 100 tankers and cargo ships were immobilized yesterday as Britain's main ports went on strike (Our Transport Editor writes). Lon-don, Liverpool, Southampton, Hull and the South Wales ports stopped, but smaller and non-

dock labour scheme ports like Felixtowe, Dover, Harwich, Fishguard, Newcastle, Hartle-pool, and Portsmouth worked Effects at particular ports we

London: No work all day at London or Tilbury with 3,200 registered dockers on strike. Dover: Not involved at the moment and no visible effect on traffic, according to the Harbour Board.

Liverpool: Complete standstill, with 2,300 registered dockers and 700 clerical workers on strike. Eight ocean-going cargo ships immobi-

A capital case of confusing nouns

Letter from Bonn

Uncle Jack's ward, Cecily Cardew, was not the only foreigner to have complained about the "horrid, horrid" German grammar, nor Oscar Wilde, the only writer to have made fun of a language that made her feel "quite plain" after her German lessons.

An increasing number of Germans are themselves making the kinds of mistakes that beset students of the that beset students of the language: joining the wrong words together, putting capital letters in the wrong place, forgetting the all-important commas and of course choking on an indigestible stew of verbs at the end of the relative clause

The last real codification of the language was over 80 years ago, and since then the Duden lexicons, the German equiva-lent of the Oxford English Dictionary, have periodically added to the already complex regulations. There are now some 50 rules for the correct usage of hyphens, 78 for capital letters and more than 100 for commas, strict regulations for the building of portmanteau words (the mous Danube steamship company makes that little Welsh station look snappy by comparison) and gathering confusion in the defence of the language against a tidal wave of foreign words.

But there is one thing above all that marks out German at first glance and that the reformers now have their eyes on: the use of capitals at the beginning of each noun. Not only does this make typing more time-consuming and typesetting more costly, but it is the source of an estimated 80 per cent of all grammatical mistakes made by even the better educated. Herr Georg Gölter, the Education Minis-ter of Rhineland-Palatinate, who is leading current moves to abolish these capitals, made six mistakes in four sentences of dictation administered to him recently by Der Spiegel four of them involving confusion between upper and

lower case. No other proposal however is so likely to lead to instant argument, which quickly be-comes political (Christian Democrats broadly in favour of retaining capitals, Social Democrats against) and holds up reform of other aspects of the language. In 1973 the conference of education ministers from the 10 states agreed in principle to keep capitals only for proper names, the

beginning of sentences, some abbreviations, and to dis-tinguish sie (she and they) from sie (you).

But nothing has changed. Another conference last month was asked to approve setting up a special com-mission to look at reform and ensure the four Germanspeaking countries - East and West Germany, Austria and Switzerland - moved in step together. Informal soundings have suggested that East Germany is keenest on change, Austria willing, Switzer-land nentral and West Germany hesitant. But no commission members have yet

been named. The lobby against change is fairly strong and includes well-known writers of today and yesterday such as Wilhelm Grimm, Thomas Mann and Gunter Grass, They argue that capitals avoid ambiguity, and cite the difference between "Ich habe in Berlin liebe Genossen" meaning "I have dear comrades in Berlin," and "Ich habe in Berlin Liebe genossen". meaning "I have enjoyed love in Berlin."

Reformers, who range from Jacob Grimm to Bertold Brecht and Heinrich Boll, maintain that only a Social Democrat is likely to use both sentences and therefore raise eyebrows about his meaning, and normally there is no confusion.

They cite the authoritative words of Konrad Duden in 1902, who declared that "the writing of nouns with a capital letter damages the mental and physical health of our young people through useless bur-dening of the memory, as it robs the schools of valuable time and the child of the will to learn and joy in doing so."

10

1

Perhaps a more convincing argument nowadays is the decline in the use of German as a world language, which reformers blame partly on the capital letter issue and partly on the general complexity of the grammar. Some, such as Herr Gölter, have given up reaching agreement on the capitals, but think other simplifications ought not to be

held up. Their arguments have been strengthened by recent worries over the general decline in grammatical-literacy, and the inability of many teachers, civil servants and slogandaubers alike to write correct
